*Natural Life Extension* Leon Chaitow, 1992      **Life Extension and Tomorrow's Elderly** United States. Congress. House. Select Committee on Aging. Subcommittee on Human Services, 1978      *Regulating the End of Life* Sue Westwood, 2021-09-09

Regulating the End of Life Death Rights is a collection of cutting edge chapters on assisted dying and euthanasia written by leading authors in the field Providing an overview of current regulation on assisted dying and euthanasia both in the UK and internationally this book also addresses the associated debates on ethical moral and rights issues It considers whether just as there is a right to life there should also be a right to death especially in the context of unbearable human suffering The unintended consequences of prohibitions on assisted dying and euthanasia are explored and the argument put forward that knowing one can choose when and how one dies can be life extending rather than life limiting Key critiques from feminist and disability studies are addressed The overarching theme of the collection is that death is an embodied right which we should be entitled to exercise with appropriate safeguards as and when we choose Making a novel contribution to the debate on assisted dying this interdisciplinary book will appeal to those with relevant interests in law socio legal studies applied ethics medical ethics politics philosophy and sociology      **A World Growing Old** Daniel Callahan, 1996-08-01

For much of the developed world health care for a surging elderly population looms as one of the most daunting problems of the coming decade In this book contributors from diverse disciplinary backgrounds and countries discuss resource allocation for the elderly and debate plans for the years ahead Essays focus on five general issues the meaning of old age the goals of medicine and health care for the elderly the balance between the needs of the young and old the pressures of other social priorities and the role of families especially the burden on women in long term care In consideration of the difficult moral and practical issues involved the editors conclude the volume with a special report containing policy recommendations from representatives of eight countries the United States Belgium the Czech Republic Germany Hungary the Netherlands Sweden and the United Kingdom This important volume will be of interest to policymakers and a broad spectrum of health care professionals as well as to anyone interested in the fate of the elderly or in coming health care challenges      *The Quest for Human Longevity* Lewis D. Solomon, 2006

Over the past decade impressive results have been achieved in targeting the mechanisms and pathways of aging Solomon considers these scientific studies by exploring the principal biomedical and anti aging techniques In this book he considers cutting edge research on mental enhancements and assesses the scientific doubts of skeptics      **Lifespanners** M. P. Rogers, 2011-07-14

A story of greatness through severe trial and hope of betrayal when hope is fulfilled the interaction of twin planets and the power of destiny prevailing still in the unknowable depths of the human psyche after fourteen hundred years from Earth The story deals with twin planets First Planet is toxic A million people are housed there comfortably under a technologically perfect hemispheric Dome They are quite brilliant but their lives are short Immortals living on Sister World a paradise provide for and reward

them for their creativity in art and scientific inventions treating them as a brain farm After four hundred years two men escape from the Dome They discover their origins by use of a marvelous instrument a Vade Mecum which belongs to Immortals and is illegal in their possession The planet kills the men but the Vade Mecum by the numinous quality of its sensors returns to the Dome with its recorded information The daughter of one of the men writes a history from its revelation which challenges the Immortals to a crisis of decision they would do anything to avoid The catalyst of all this is the Immortal Seneschal lone mediator of the peoples He lives alone on First Planet in a beautiful Glass City and oversees all providence for the Dome which is carried out by robots His senses are omnipresent and he is aware of all vicissitudes of the Vade Mecum but reveals nothing to his people on Sister World He has a purpose of his own unsuspected by either peoples and reveals his abilities to no one not even the woman he loves the great Lifespanner musician Felice who leaves him because he will not grant her the prime award of immortality she so well deserves nor does he explain himself But their love is great and has its own effect The result of this is irruption on both planets      Look Younger, Live Longer Francisco Contreras,2016-06-07 Are you a baby boomer facing the hard facts of aging in your own life Or are you young and determined to stay that way for as long as possible Genesis 6 3 suggests that God set the human life span at one hundred twenty years Breakthrough scientific research has unlocked many of the secrets of aging proving the biblical age limitation to be correct Dr Francisco Contreras offers proven research that will improve your health and perhaps reverse any illness or disease once and for all According to Dr Contreras you have the power right now to greatly increase your life span and to feel better and look younger      The Fountain of Youth Stephen G. Post,Robert H. Binstock,2004-04-08 If effective anti aging interventions were achieved they would likely bring about profound alterations in the experiences of individual and collective life What if modern scientists could find the modern equivalent to the Fountain of Youth that Ponce de Leon sought This book addresses this question by exploring the ramifications of possible anti aging interventions on both individual and collective life Through a series of essays it examines the biomedical goal of prolongevity from cultural scientific religious and ethical perspectives offering a sweeping view into the future of aging      Humanism and Technology Anthony B. Pinn,2016-11-23 This book interrogates the ways in which new technological advances impact the thought and practices of humanism Chapters investigate the social political and cultural implications of the creation and use of advanced forms of technology examining both defining benefits and potential dangers Contributors also discuss technology s relationship to and impact on the shifting definitions we hold for humankind International and multi disciplinary in nature and scope the volume presents an exploration of humanism and technology that is both racially diverse and gender sensitive With great depth and self awareness contributors offer suggestions for how humanists and humanist organizations might think about and relate to technology in a rapidly changing world More broadly the book offers a critical humanistic interrogation of the concept of progress especially as it relates to technological advancement      Biobusiness Gurinder S. **Time Biases** Meghan Sullivan,2018 Should you care less about your distant future What about events in your life that have already happened How should the passage of time affect your planning and assessment of your life Most of us think it is irrational to ignore the future but completely harmless to dismiss the past But this book argues that rationality requires temporal neutrality if you are rational you don t engage in any kind of temporal discounting The book draws on puzzles about real life planning to build the case for temporal neutrality How much should you save for retirement Does it make sense to cryogenically freeze your brain after death How much should you ask to be compensated for a past injury Will climate change make your life meaningless Meghan Sullivan considers what it is for you to be a person extended over time how time affects our ability to care about ourselves and all of the ways that our emotions might bias our rational planning Drawing substantially from work in social psychology economics and the history of philosophy the book offers a systematic new theory of rational planning

*The Ethical Imagination* Margaret Somerville,2009 Developing a boundary crossing ethics by paying attention to our stories myths and moral intuition

*Beyond Human* Eve Herold,2016-08-16 Never before in the history of medicine has mankind faced such hope and peril as those of us poised to embrace the radical medical technologies of today Eve Herold s Beyond Human examines the medical technologies taking shape at the nexus of computing microelectronics engineering nanotechnology cellular and gene therapies and robotics These technologies will dramatically transform our lives and allow us to live for hundreds of years Yet with these blessings come complicated practical and ethical issues some of which we can predict but many we cannot Beyond Human taps the minds of doctors scientists and engineers engaged in developing a host of new technologies while telling the stories of some of the patients courageously testing the radical new treatments about to come into the market Beyond Human asks the difficult questions of the scientists and bioethicists who seek to ensure that as our bodies and brains become ever more artificial we hold onto our humanity In this new world will everyone have access to technological miracles or will we end up living in a world of radical disparities How will society accommodate life spans that extend into hundreds of years Will we and our descendants be able to bring about the dream of a future liberated by technology or will we end up merely serving the machines and devices that keep us healthy smart young and alive

**Financial Security and Personal Wealth** Lewis D. Solomon,2017-07-05 America s elderly population is soaring presenting numerous challenges for policymakers in

the United States Other developed nations with aging populations face similar problems There will be fewer workers relative to retirees in coming decades and the elderly are also expected to live longer The impact of these demographic changes in the United States is likely to be challenging especially for America s system of social security Solomon offers new perspectives on how to meet the future costs of social security without bankrupting the next generation or gravely damaging the U S economy He also shows more broadly how to provide for the financial security of America s senior populations Over the past two decades primary responsibility for providing a financially adequate retirement has shifted from the federal government and employers to individuals For most Americans social security alone will not provide enough income Most companies have shed their pension plans for 401 k plans to which companies and employees contribute and in which participants must make their own investment decisions Consequently achieving financial security in retirement has increasingly become one s personal responsibility Solomon deals extensively with the politics of social security past and present He examines the presidential leadership of Franklin D Roosevelt and Ronald Reagan both of whom revived the nation s spirit in times of crisis both of whom introduced economic policies that remain controversial to the present day He also considers in detail contemporary efforts to rethink social security focusing on fundamental reform of the social security system and the expansion and simplification of employer sponsored retirement plans and individual retirement arrangements Richly textured informed and informative Financial Security and Personal Wealth encompasses history demography political economy public finance social policy     *The Reform Advocate* ,1921     *Handbook of Medical Sociology, Sixth Edition* Chloe E.
