Trinidad: Its Geography, Natural Resources, Administration, Present Condition, and Prospects Louis Antoine Aimé Gaston De Verteuil, 1884 **Natural Resource Management for Sustainable Development in the Caribbean** Ivan Goodbody, Elizabeth M. Thomas-Hope, 2002 At the International Earth Summit convened in Rio de Janeiro in 1994 all nations of the world were mandated to protect the environment for the benefit of present and future generations This collection introduces the reader to the major issues involved in the management of a number of resources critical to Caribbean development The chapters discuss the sustainability of water fisheries and agriculture in the region from a variety of perspectives Particular emphasis is also given to the use of energy recreation and coastal resource management and their impact on the fragile ecosystem The book makes a contribution to the ongoing debate of sustainable environmental management within the region and the world *Trinidad & Tobago Natural Resources and Environmental Management Project* ,1993 **Trinidad and Tobago** ,1994 **The Economics of Natural Resources in Latin America** Osmel E. Manzano M., Fernando Navajas, Andrew Powell, 2017-11-15 Revenues from commodities are extremely important for Latin America and the Caribbean yet there is very little literature on the structure of these industries and on the various ways in which the state obtains commodity revenues This book aims to understand the trade off between the degree of taxation overall the profitability of the relevant industry and the amount of investment and subsequent production in the region as well as the relevance of institutions in the performance of the sector This volume focuses on economic efficiency where Latin America stands in terms of the current tax system for the extractive sector how policies have changed in this regard and how policies may be improved The Economics of Natural Resources in Latin America is timely since this new era of lower and volatile prices and possible reconfiguration of investment flows poses a challenge to natural resource tax systems in the world The argument of the book will be made by a collection of papers around the issue of tax efficiency in the region and concludes with chapters on institutions and the role of transparency This book shows that there are varieties of experiences in resource taxation and management of revenues in Latin America that could be used to shape policy interventions in other regions This variety is not only related to their diverse impact on welfare but also on the policy challenges faced by the countries in the region This volume is well suited for those who study and find interest in development economics political economy and public finance as well as policy *Natural Resources in Latin America and the Caribbean* Emily Sinnott, John Nash, Augusto de la Torre, 2010-01-01 The question of how to treat commodity production and how to manage recurrent cycles of booms and busts has always been a challenge for policymakers in commodity dependent countries including many in the LAC region These challenges have led to allegations of a commodity curse that retards development in these countries but as of yet there is no consensus as to whether such a curse exists and if so how can negative effects be minimized This book contributes to this debate Much of the report is focused on an examination of specific channels through which

commodity dependence may affect the economic and institutional development of countries This includes broadly 4 sets of concerns one set dealing with the direct economic effects of commodity dependence and the implications for long term growth one dealing with the interactions between commodity production and the rents it generates on the one hand and a country's institutions on the other a third dealing with the macroeconomic challenges of managing the volatility of revenue flows including the distributional implications at the household level posed by cyclicalities of social spending and a final set associated with potential negative environmental and social impacts The book finds that some commonly accepted negative effects of dependence on natural resources are largely myths while some are realities But all can be managed and the book draws on the best available information in existing literature as well as original analysis to provide practical advice on how to do so It also presents descriptive facts and analysis of the impacts in LAC of the recent commodity boom helping the reader understand the implications for the region's development and policies It should be of great interest to policy makers and analysts as well as laypersons interested in the economics of commodity markets and their role in economic development

Natural Resources, Neither Curse nor Destiny Daniel Lederman, William F Maloney, 2006-10-23 Natural Resources Neither Course nor Destiny brings together a variety of analytical perspectives ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources The evidence suggests that natural resources are neither a curse nor destiny Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation Furthermore natural resource abundance need not be the only determinant of the structure of trade in developing countries In fact the accumulation of knowledge infrastructure and the quality of governance all seem to determine not only what countries produce and export but also how firms and workers produce any good

Natural Resources and Economic Growth Marc Badia-Miró, Vicente Pinilla, Henry Willebald, 2015-05-22 The relationship between natural capital and economic growth is an open debate in the field of economic development Is an abundance of natural resources a blessing or a curse for economic performance The field of Economic History offers an excellent vantage to explore the relevance of institutions technical progress and supply demand drivers Natural Resources and Economic Growth contains theoretical and empirical articles by leading scholars who have studied this subject in different historical periods from the 19th century to the present day and in different parts of the world Part I presents the theoretical issues and discusses the meaning of the curse and the relevance of the historical perspective Part II captures the diversity of experiences presenting thirteen independent case studies based on historical results from North and South America Africa Asia Oceania and Europe This book emphasizes that an abundance of natural resources is not a fixed situation It is a process that reacts to changes in the structure of commodity prices and factor endowments and progress requires capital labour technical change and appropriate institutional arrangements This abundance is not a given but is part of the evolution of the economic system History shows that institutional quality is the key

factor to deal with abundant natural resources and especially with the rents derived from their use and exploitation This wide ranging volume will be of great relevance to all those with an interest in economic history development economic growth natural resources world history and institutional economics *Social protection to foster sustainable management of natural resources and reduce poverty in fisheries- dependent communities* Food and Agriculture Organization of the United Nations,2018-05-31 FAO Fisheries and Aquaculture Proceedings This report calls for a stronger conceptual framework to reconcile socio economic development and natural resource conservation in fisheries dependent communities It highlights the need for a better understanding of the links between these areas and explores how the alignment between social protection and fisheries policies can be promoted at country level *Selected Water Resources Abstracts* ,1977 *The International Politics of Natural Resources* Zuhayr Mikdashi,2019-06-30 An impartial and shrewd observer here takes a close look at the major producers of today s most sought after commodities Mr Mikdashi deals with the ever shifting pattern of cooperation and antagonism between transnational enterprises companies owned by corporations in developed countries and active in more than one nation and their host governments especially those in the developing world Comparing operations in various countries and in various industries he describes how governments and transnationals work together and separately to exploit market opportunities Petroleum copper iron sulfur uranium bauxite and tin these are among the resources he examines He illuminates the policies strategies and relationships of the protagonists under different market and environmental conditions discussing the relations among the governments themselves and the alliances they have formed such as OPEC and CIPEC Finally he offers suggestions for cooperative action that could both serve the needs of the less developed areas and promote international harmony Practical in approach and original in concept the book clarifies complex contemporary problems and points the way toward solving them *The Natural Resources of Trinidad and Tobago* St. George C. Cooper,1981 *Natural Forest Management in the American Tropics* Francis E. Putz,1991 **Home-based Economic Activities and Caribbean Urban Livelihoods** Hebe Verrest,2007 Poor urban households in the economic south deploy various livelihood activities One of these is a Home Based Economic Activity HBEA e g sales of home made snacks or car maintenance This study examines the prevalence organisation and relevance of HBEAs in four neighbourhoods in the Caribbean cities Paramaribo Suriname and Port of Spain Trinidad and Tobago Recent economic developments in these countries diverge Suriname recovers slowly from a crisis while Trinidad and Tobago s economy is buoyant These economic features together with local political developments have produced distinct institutional contexts This gives ground for a comparison between the two cities In addition the study discusses the relevance of currently popular policies on entrepreneurship and micro finance The above issues have been assessed through use of multiple quantitative and qualitative methods The study shows that forty percent of households in the examined neighbourhoods earn money through operating HBEAs These are mainly operated by women and assist households in improving their livelihoods from a level of

survival to a level of security Most HBEA operators aim at earning additional incomes and reducing vulnerability Only a small group meets the image of the classic operator who innovates takes risk and aims at growth and profit The two groups organize their HBEA in very distinct ways Differences between Suriname and Trinidad and Tobago are small First of all economic growth has limited impact on assets and vulnerability of low income groups Moreover policies aiming at stimulation of entrepreneurship such as micro credit are relevant to classic entrepreneurs and not to the large group of security seeking HBEA operators
