Handbook of Parenting: Being and becoming a parent Marc H. Bornstein, 2002 Completely revised and expanded from four to five volumes this new edition of the Handbook of Parenting appears at a time that is momentous in the history of parenting Parenting and the family are today in a greater state of flux question and redefinition than perhaps ever before We are witnessing the emergence of striking permutations on the theme of parenting blended families lesbian and gay parents and teen versus fifties first time moms and dads One cannot but be awed on the biological front by technology that now not only renders postmenopausal women capable of childbearing but also presents us with the possibility of designing babies Similarly on the sociological front single parenthood is a modern day fact of life adult child dependency is on the rise and parents are ever less certain of their own roles even in the face of rising environmental and institutional demands that they take increasing responsibility for their offspring The Handbook of Parenting concerns itself with different types of parents mothers and fathers single adolescent and adoptive parents basic characteristics of parenting behaviors knowledge beliefs and expectations about parenting forces that shape parenting evolution genetics biology employment social class culture environment and history problems faced by parents handicap marital difficulties drug addiction and practical concerns of parenting how to promote children's health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and closely allied with many other fields

Natural History Magazine, 1928 **The Natural History of Society in the Barbarous and Civilized State** William Cooke Taylor, 1840 *The natural history review*, 1864 *Religious Parenting* Christian Smith, Bridget Ritz, Michael Rotolo, 2021-11-02 How do religiously observant American parents pass on their

religion to their children Sociologist Christian Smith and his team sought to answer this question by interviewing over two hundred parents from across the U S affiliated with religious congregations of various types The book presents the voices of parents from diverse socioeconomic and religious backgrounds interested in passing on their religious convictions and practices to their children with the focus on why they think this matters and how they do it What Smith and his team found was surprising Almost all the parents interviewed whether Catholic Evangelical Jewish Muslim Mormon or Hindu and whether politically or theologically conservative or liberal view the transmission of religion in much the same way Most religious parents do not expect professional clergy and youth ministries to play a large role in imparting to young people a taste for continued religious affiliation and participation Rather they expect to do this work themselves viewing their children as ongoing projects Moreover very few of these religious parents regard what we might call the truth of religious claims beliefs in salvation or the trinity for example the afterlife heaven etc as important reasons for the centrality of religion in their lives and the lives of their children For nearly all including the most conservative religion is almost always about community morality and a sense of purpose all of which lead to a better quality of life for themselves and their children in the here and now Smith and his co authors ground their discussion of religious parenting in a broader set of theoretical claims about the way in which religious transmission occurs Drawing on cognitive anthropology and inspired by work in cognitive science the authors present and describe the background cultural models that American religious parents hold and use to inform their parenting

A General Introduction to the Natural History of Mammiferous Animals William Charles Linnaeus Martin, 1841

The Life History of the Parental Shield Bug, *Parastrachia japonensis* Lisa Filippi, Shintaro Nomakuchi, 2022-10-13

This book presents the discoveries made during nearly three decades of research on the parental shield bug *Parastrachia japonensis* inhabiting Kyushu Island Japan. *P. japonensis* has evolved a unique and fascinating life history characterized by extreme behavioral and physiological adaptations that have culminated in a singularly dependent relationship with its lone host tree *Schoepfia jasminodora* Olacaceae which is a generally scarce and unreliable resource. It is expected that the evolution of parental care behaviors in the strictly semelparous *P. japonensis* was more directly influenced by the benefit to females that arises from enhanced survivorship of current offspring rather than any possible cost the females might incur in terms of reduced future reproductive success because no future reproduction is possible. The authors explain how the different parental cares in this species enhance offspring survivorship in the context of the ecological conditions it has experienced over evolutionary time. The book begins with a recap of the earliest studies, the reports through 1991, and then introduces the many fascinating aspects of the life history, neurobiology, physiology, and behavior of *P. japonensis* that have been newly discovered since, and those aspects that have been confirmed through experimentation over the past thirty years. This comprehensive review of information will be useful for comparative studies of parental care in other semelparous and iteroparous organisms experiencing both similar and different ecological constraints. The book will be of academic interest to undergraduate and graduate students of entomology, zoology, behavior, and behavioral ecology.

A History of Intelligence and 'Intellectual Disability' C. F. Goodey, 2011. Autism, Down syndrome, and other such labels assume that intellectual disability is a permanent aspect of human nature. C. F. Goodey demonstrates that intellectual disability and even intelligence are instead historically contingent creations which are rooted in early modern cultural and religious matrices and corresponding forms of social organization and which have subsequently undergone continuous change. This paradigm-shifting book is also an urgent and compassionate appeal for us to consider through the prism of history how the apparent certainties of modern biology, medicine, and psychology came to question the ethical status of some of us.

In the Shadow of Illness Myra Bluebond-Langner, 2000-06-19. A revealing account of how families adapt to living with a chronically ill child. What is it like to live with a child who has a chronic life-threatening disease? What impact does the illness have on well siblings in the family? Myra Bluebond-Langner suggests that understanding the impact of the illness lies not in identifying deficiencies in the lives of those affected but in appreciating how family members carry on with their lives in the face of the disease's intrusion. *The Private Worlds of Dying Children*, Bluebond-Langner's previous book, now considered a classic in the field, explored the world of terminally ill children. In her new book, she turns her attention to the lives of those who live in the shadow of chronic illness: the parents and well siblings of children who have cystic fibrosis. Through a series of narrative portraits, she draws us into the daily lives of nine families of children at different points in the natural history of the illness.

from diagnosis through the terminal phase In these portraits as family members talk about their experiences in their own words we see how parents well siblings and the ill children themselves struggle in different ways to contain the intrusion of the disease into their lives Bluebond Langner looks at how parents adjust their priorities and their idea of what constitutes a normal life how they try to balance the needs of other family members while caring for the ill child and how they see the future This context helps us understand how well siblings view the illness and how they relate to their ill sibling and parents Since the issues raised are not unique to cystic fibrosis but are common to other chronic and life threatening illnesses this book will be of interest to all who study care for or live with the seriously ill
