Contemplative Science B. Alan Wallace, 2007 B. Alan Wallace renowned Buddhist scholar integrates the contemplative methodologies of Buddhism and Western science into a single discipline contemplative science The science of consciousness investigates the mind through Buddhist contemplative techniques such as shamatha an organized detailed system of training the attention Just as scientists make observations and conduct experiments with the aid of technology contemplatives have long tested their theories with the help of highly developed meditative skills of observation and experimentation Contemplative science allows for a deeper knowledge of mental phenomena and its emphasis on strict mental discipline counteracts the effects of cognitive intention and desire attentional cognitive and affective imbalances Just as behaviorism psychology and neuroscience shed light on the cognitive processes enabling us to survive and flourish contemplative science offers a groundbreaking perspective for expanding our capacity to realize genuine well being It also forges a link between the material world and the realm of the subconscious transcending a traditional science based understanding of the self

Wheel of Initiation Julie Tallard Johnson, 2010-07-12 A guide to personal spiritual initiation through the transformation of habitual patterns apathy and resistance Based on the Native American medicine wheel the Vedic wheel and the universal initiatory mandala Enables readers from any tradition to initiate themselves through practices of thought transformation narrative medicine meditation exercises rituals and journaling Facilitates breaking through personal and societal illusions that perpetuate resistance and apathy Intentions and spiritual principles meditation and contemplation ritual and risk taking are the conditions that comprise an initiated life Regrettably in modern society we do not have rites of initiation that break through the personal and societal illusions that instill and perpetuate negative habits that keep us in states of resistance Lacking initiation practices we often remain trapped in ways of being in the world that were formed by our past conditions and attachments We tend to identify too strongly with the status quo which must be challenged to prevent stagnation and to encourage happiness and authenticity Julie Tallard Johnson shows how to become initiated into an authentic life through practices of thought transformation cultivating attention journaling storytelling and rituals found in the four directions of the universal mandala She begins the Wheel of Initiation in the South where initiates set their intentions then moves into the

West where they free themselves from habitual patterns and core beliefs then into the North the direction of cultivating attention and unity and finishes in the East the direction of regeneration and initiation Drawing upon the life experiences of those who have successfully navigated the wheel Johnson demonstrates that once fears assumptions and ingrained beliefs are confronted and transformed initiates emerge ready to reenter society with renewed energy and vision that will enrich their own lives and their communities

Tibetan Rituals of Death Margaret Gouin, 2012-09-10 This book describes and analyses the structure and performance of Tibetan Buddhist death rituals and situates that performance within the wider context of Buddhist death practices generally Drawing on a detailed and systematic comparative survey of existing records of Tibetan funerary practices including historical travel accounts anthropological and ethnographic literature Tibetan texts and academic studies it demonstrates that there is no standard form of funeral in Tibetan Buddhism although certain elements are common The structure of the book follows the twin trajectories of benefiting the deceased and protecting survivors in the process it reveals a rich and complex panoply of activities some handled by religious professionals and others by lay persons This information is examined to identify similarities and differences in practices and the degree to which Tibetan Buddhist funeral practices are consistent with the mortuary rituals of other forms of Buddhism A number of elements in these death rites which at first appear to be unique to Tibetan Buddhism may only be Tibetan in their surface characteristics while having roots in practices which predate the transmission of Buddhism to Tibet Filling a gap in the existing literature on Tibetan Buddhism this book poses research challenges that will engage future scholars in the field of Buddhism Tibetan Buddhism and Anthropology

Hidden Dimensions B. Alan Wallace, 2010-02-22 B Alan Wallace introduces a natural theory of human consciousness that has its roots in contemporary physics and Buddhism Wallace s special theory of ontological relativity suggests that mental phenomena are conditioned by the brain but do not emerge from it Rather the entire natural world of mind and matter subjects and objects arises from a unitary dimension of reality Wallace employs the Buddhist meditative practice of samatha

to test his hypothesis creating a kind of telescope to examine the space of the mind He then proposes a more general theory in which the participatory nature of reality is envisioned as a self excited circuit In comparing these ideas to the Buddhist theory known as the Middle Way philosophy Wallace explores further aspects of his general theory of ontological relativity which can be investigated through vipasyana or insight meditation He then focuses on the theme of symmetry in quantum cosmology and the problem of frozen time relating these issues to the theory and practices of the Great Perfection school of Tibetan Buddhism He concludes with a discussion of complementarity as it relates to science and religion

Thompson, 2014-11-18 A renowned philosopher of the mind also known for his groundbreaking work on Buddhism and cognitive science Evan Thompson combines the latest neuroscience research on sleep dreaming and meditation with Indian and Western philosophy of mind casting new light on the self and its relation to the brain Thompson shows how the self is a changing process not a static thing When we are awake we identify with our body but if we let our mind wander or daydream we project a mentally imagined self into the remembered past or anticipated future As we fall asleep the impression of being a bounded self distinct from the world dissolves but the self reappears in the dream state If we have a lucid dream we no longer identify only with the self within the dream Our sense of self now includes our dreaming self the I as dreamer Finally as we meditate either in the waking state or in a lucid dream we can observe whatever images or thoughts arise and how we tend to identify with them as me We can also experience sheer awareness itself distinct from the changing contents that make up our image of the self Contemplative traditions say that we can learn to let go of the self so that when we die we can witness its dissolution with equanimity Thompson weaves together neuroscience philosophy and personal narrative to depict these transformations adding uncommon depth to life s profound questions Contemplative experience comes to illuminate scientific findings and scientific evidence enriches the vast knowledge acquired by contemplatives **Unearthing**

Himalayan Treasures Volker Caumanns, Marta Sernesi, Nikolai Solmsdorf, 2019-04-08 The Festschrift celebrates Franz Karl Ehrhard Professor of Tibetan and Buddhist Studies at the Ludwig Maximilian University of Munich from 2003 to 2019 Offered on the occasion of his 65th birthday it comprises 26 papers by friends and colleagues to honour his outstanding and far reaching contributions to the field of Tibetan Studies Mirroring Franz Karl Ehrhard s research interests the papers centre on the religious and literary traditions of Tibet and the Himalayas including sacred geography religious history philosophy and studies in textual production and transmission Mind in the Balance B. Alan Wallace, 2014-09-02 By establishing a dialogue in which the meditative practices of Buddhism and Christianity speak to the theories of modern philosophy and

science B Alan Wallace reveals the theoretical similarities underlying these disparate disciplines and their unified approach to making sense of the objective world Wallace begins by exploring the relationship between Christian and Buddhist meditative practices He outlines a sequence of meditations the reader can undertake showing that though Buddhism and Christianity differ in their belief systems their methods of cognitive inquiry provide similar insight into the nature and origins of consciousness From this convergence Wallace then connects the approaches of contemporary cognitive science quantum mechanics and the philosophy of the mind He links Buddhist and Christian views to the provocative philosophical theories of Hilary Putnam Charles Taylor and Bas van Fraassen and he seamlessly incorporates the work of such physicists as Anton Zeilinger John Wheeler and Stephen Hawking Combining a concrete analysis of conceptions of consciousness with a guide to cultivating mindfulness and profound contemplative practice Wallace takes the scientific and intellectual mapping of the mind in exciting new directions

The Hidden History of the Tibetan Book of the Dead Bryan J. Cuevas,2005-12-08 In 1927 Oxford University Press published the first western language translation of a collection of Tibetan funerary texts the Great Liberation upon Hearing in the Bardo under the title The Tibetan Book of the Dead Since that time the work has established a powerful hold on the western popular imagination and is now considered a classic of spiritual literature Over the years The Tibetan Book of the Dead has inspired numerous commentaries an illustrated edition a play a video series and even an opera Translators scholars and popular

devotees of the book have claimed to explain its esoteric ideas and reveal its hidden meaning Few however have uttered a word about its history Bryan J Cuevas seeks to fill this gap in our knowledge by offering the first comprehensive historical study of the Great Liberation upon Hearing in the Bardo and by grounding it firmly in the context of Tibetan history and culture He begins by discussing the many ways the texts have been understood and misunderstood by westerners beginning with its first editor the Oxford educated anthropologist Walter Y Evans Wentz and continuing through the present day The remarkable fame of the book in the west Cuevas argues is strikingly disproportionate to how the original Tibetan texts were perceived in their own country Cuevas tells the story of how The Tibetan Book of the Dead was compiled in Tibet of the lives of those who preserved and transmitted it and explores the history of the rituals through which the life of the dead is imagined in Tibetan society This book provides not only a fascinating look at a popular and enduring spiritual work but also a much needed corrective to the proliferation of ahistorical scholarship surrounding The Tibetan Book of the Dead
