Nature, Culture, and History K. R. Howe, 2000-03-01 Explores the changing ways in which Pacific Islanders have been seen and represented by outsiders over the last 200 years The Pacific Islands has been a testing ground for various Western ideas and ideologies and the author looks at this long intellectual history as an artifact of the Western imagination Of particular concern is to see how concepts of nature culture and history have defined Western perceptions of Pacific Islanders

The Culture of Nature Alexander Wilson, 1991 In this celebrated work Alexander Wilson

examines environments built over the past fifty years as humans have continued to discover exploit protect restore and sometimes re enchant a natural world in convulsion Extensively illustrated Beyond Nature and Culture Philippe Descola,2013 *Cultures of Habitat* Gary Paul Nabhan,1997 Twenty four essays explore the deep and complex connections between nature and people Concentrating on cultures of habitat human communities with long histories of interacting with one particular kind of terrain and its wildlife the author considers such topics as the correlation between upheavals in human communities and the incidence of endangered species the perils of monoculture in the Tequila fields of Mexico and the nature of aggression and the struggle for limited resources Annotation copyrighted by Book News Inc Portland OR *Living according to Nature. Volume Two: Nature and Culture* ,2025-01-23 This edited collection is the second of two volumes offering critical philosophical and interdisciplinary perspectives on contemporary and historic accounts of living in accordance with the broad natural world as at the center of a good and wise life It also explores the meaning and idea of nature in these different perspectives as it relates to and is distinguished from cultural life It builds on the work of Pierre Hadot and others on the connection that philosophers mystics scholars and others ancient and modern have seen between nature as articulated in physics metaphysics ontologies ecologies biologies and evolutionary theories and forms of self communal cultivation **Humans and Their Environment, Beyond the Nature/Culture Opposition** Claude Calame,2023-04-10 The modern concept of nature appeared during the 17th Century nature as a mechanical object to be submitted to reason man A long tradition refers to the concept of nature in the Greek phusis It is referring to a dynamic process that engages in criticizing the modern paradigm of nature as opposed to culture As it is the principle of the domination and exploitation by humans of what we consider as nature is at the heart of the ideological economic and financial models imposed by neoliberal capitalism Based on the objective of growth this model shapes and destroys human communities as well as the environment on which they rely and sustain The climatic urgency as well as the limited capacity of the resources of the earth require a transition towards an ecosocialism for another world The anthropological confrontation with the Greek phusis invites to a break with capitalism based on a large scale and speedy use of technologies and with the only objective of financial gain The result has been destructive productivism Instead we have to take into account the complexity of and interactions between human societies and their technical practices in their environment The survival of one or the other is at stake In sum nature is culture Contents Preface to the English Edition 3 Introduction 9 Between Nature and Culture 15 I Humans and Their Milieu in Ancient Greece 19 II From the Enlightenment Philosophers to Modern Anthropologists 37 III Beyond Anthropological Determinisms Permeabilities 47 IV The Human Being and its Environment Interactive Relationships 57 V For an Ecosocialist Understanding of Humans and their Milieu 65 **Nature and Culture in the Andes** Daniel W. Gade,1999 This text reveals the intimate and unexpected relationships of plants animals and people in western South America Daniel Gade encourages the reader to look beyond the obvious to see the true

complexity of ecological relationships **Patterned Ground** Stephan Harrison, Steve Pile, N. J. Thrift, 2004 Patterned Ground unravels the entangled relationships between nature and culture Around 100 entries by leading names in new geography and related disciplines focus on various objects in the landscape from beaches to battlefields bees to horses police stations to post offices trees to tractors Each entry written by an expert in the field explores the way in which we understand that object and its relationship to the world around it This book is neither encyclopaedia nor dictionary but a knowledgeable and impassioned engagement with the world In this sense it chimes with earlier experiments in understanding the earth and its landscapes whether these endeavours have been conducted within the sciences the social sciences or the arts Patterned Ground backtracks from familiar and obvious ways of seeing patterns in the world in order to discover the world anew It opens up new possibilities for thinking about the relationships between ourselves objects and the ground on which we walk

BOOK JACKET **Genetic Nature/Culture** Prof. Alan H. Goodman, Prof. Deborah Heath, M. Susan Lindee, 2003-11-06 The so called science wars pit science against culture and nowhere is the struggle more contentious or more fraught with paradox than in the burgeoning realm of genetics A constructive response and a welcome intervention this volume brings together biological and cultural anthropologists to conduct an interdisciplinary dialogue that provokes and instructs even as it bridges the science culture divide Individual essays address issues raised by the science politics and history of race evolution and identity genetically modified organisms and genetic diseases gene work and ethics and the boundary between humans and animals The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking and the dynamic connections linking culture biology nature and technoscience The volume offers critical perspectives on science and culture with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis An invaluable resource and a provocative introduction to new research and thinking on the uses and study of genetics Genetic Nature Culture is a model of fruitful dialogue presenting the quandaries faced by scholars on both sides of the two cultures debate Nature and Identity in Cross-Cultural Perspective Anne Buttimer, L. Wallin, 1999-07-31 Nature and Identity in Cross Cultural Perspective presents 20 essays which explore diverse cultural interpretations of the earth's surface Contrasted with each other and with the potentially cosmopolitan culture of science these detailed studies of ways in which different cultures conceptualise nature appear in the context of global environmental change Understanding across cultural lines has never been more important This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints Through such writing a discourse of understanding and common action becomes possible The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes Audience This volume is of interest to academics and professionals working in the fields of cultural geography environmental history environmental studies history of environmental ideas environmental education landscape and literature nature and culture It

can be used for courses in the above mentioned areas and seminars in comparative literature It can also be used as a complimentary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment

Cultural Sustainability and the Nature-Culture Interface Inger Birkeland, Rob Burton, Constanza Parra, Katriina Siivonen, 2018-03-14 As contemporary socio ecological challenges such as climate change and biodiversity preservation have become more important the three pillars concept has increasingly been used in planning and policy circles as a framework for analysis and action However the issue of how culture influences sustainability is still an underexplored theme Understanding how culture can act as a resource to promote sustainability rather than a barrier is the key to the development of cultural sustainability This book explores the interfaces between nature and culture through the perspective of cultural sustainability A cultural perspective on environmental sustainability enables a renewal of sustainability discourse and practices across rural and urban landscapes natural and cultural systems stressing heterogeneity and complexity The book focuses on the nature culture interface conceptualised as a place where experiences practices policies ideas and knowledge meet are negotiated discussed and resolved Rather than looking for lost unities or an imaginary view of harmonious relationships between humans and nature based in the past it explores cases of interfaces that are context sensitive and which consciously convey the problems of scale and time While calling attention to a cultural or culturalised view of the sustainability debate this book questions the radical nature culture dualism dominating positive modern thinking as well as its underlying view of nature as pre given and independent from human life Nature, Culture and Gender P. Mary Vidya Porselvi, 2016-04-20 Folktales in India have been told heard read and celebrated for many centuries In breaking new ground Indian folktales have been reread and examined in the light of the Mother Earth discourse as it manifests in the lifeworlds of women nature and language The book introduces ecofeminist criticism and situates it within an innovative folktale typology to connect women and environment through folklore The book proposes an innovative paradigm inspired by the beehive to analyze motifs relationships concerns worldviews and consciousness of indigenous women and men who live close to nature as well as other socially marginalized groups In the current global context fraught with challenges for ecology and hopes for sustainable development this book with its interdisciplinary approach will interest scholars and researchers of literature environmental studies gender studies and cultural anthropology **Nature and Culture** Sarah Pilgrim, Jules N. Pretty, 2010 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures

presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity **Nature, Culture and Society** Gísli Pálsson, 2016

Reflecting upon the changing human condition Pálsson addresses various conflated zones of life at particular times and scales Engaging with topical issues on the public agenda from personal genomics to human animal relations to the global environment the book sets out a compelling case for meaningful change **Montreal 2010 - Facing Multiplicity: Psyche, Nature, Culture** Pramila Bennett, Jungian analysts from all over the world gathered in Montreal from August 22 to 27 2010

The 11 plenary presentations and the 100 break out sessions attest to the complex dynamics and dilemmas facing the community in present day culture The Pre Congress Workshop on Movement as Active Imagination papers are also recorded There is a foreword by Tom Kelly with the opening address of Joe Cambray and the farewell address of Hester Solomon The plenary presentations are printed in this volume From the Contents Jacques Languirand From Einstein's God to the God of the Amerindians John Hill One Home Many Homes Translating Heritages of Containment Denise Ramos Cultural Complex and the Elaboration of Trauma from Slavery Christian Roesler A Revision of Jung's Theory of Archetypes in light of Contemporary Research Neurosciences Genetics and Cultural Theory A Reformulation Margaret Wilkinson Ruth Lanius Working with Multiplicity Jung Trauma Neurobiology and the Healing Process a Clinical Perspective Beverley Zabriskie Emotion The Essential Force in Nature Psyche and Culture Guy Corneau Cancer Facing Multiplicity within Oneself Marta Tibaldi Clouds in the Sky Still Allow a Glimpse of the Moon Cancer Resilience and Creativity Astrid Berg Tristan Troudart Tawiq Salman What could be Jungian About Human Rights Work Bou Yong Rhi Like Lao Zi's Stream of Water Implications for Therapeutic Attitudes Linda Carter Jean Knox Marcus West Joseph McFadden The Alchemy of Attachment Trauma Fragmentation and Transformation in the Analytic Relationship Sonu Shamdasani Nancy Furlotti Judith Harris John Peck Jung after The Red Book **Nature, Culture, and Food in Monsoon Asia** Satoshi Yokoyama, Jun Matsumoto, Hitoshi Araki, 2020-02-04

The giant Asian monsoon has formed a diverse climate and natural environment The Asian monsoon climate manifests itself in manifold ways depending not just on the latitude or altitude of an area but also on physical conditions such as topography and vegetation and even the size of its human population Likewise the livelihoods of people in the affected area are diverse This book focuses on nature and agriculture food and climate and culture as an excellent framework for understanding the relationship between humans and the environment in complex Monsoon Asia Through the discussions in this book what the authors have sought to demonstrate is that the livelihoods in Monsoon Asia demonstrate unique forms in a limited environment while the Asian monsoon climate has one of the largest movements of any natural phenomenon on a macroscopic scale These manifest forms are diverse both on a time scale and on a spatial scale and are extremely diversified in limited regions Such diversity is not only due just to the effects of the natural environment but also results from social and cultural forces In this area of Monsoon Asia traditional and religious social norms are becoming entangled with new

economic and political norms brought in from the outside world by globalization Nature, Culture, and Race in Colonial Cuba Lee Sessions, 2024-06-18 A new and necessary examination of how nineteenth century Cuban white elites viewed the natural world material culture and political power as intertwined In the decades before the Cuban wars of independence white elites exploited the island's natural history and culture to redefine racial identity and reassert authority These practices occurred in the face of challenges to their political power from Cubans of mixed race and as Cuba's dependence on sugar led to ecological and economic precarity Lee Sessions uses close visual analysis to investigate how white elites wielded power by manipulating material culture placing in conversation for the first time the natural history museums botanical gardens and thousands of paintings drawings and prints produced in and about Cuba from 1820 to 1860 This important and novel book explores how groups used material culture to imagine their own future at a moment when racial and political dynamics were changing rapidly while facing an ecological disaster of unimaginable scale *God, Religion, Science, Nature, Culture, and Morality* Yemant and Friends, 2014-11-11 Most of us have never bothered to find out why we believe what we believe That's especially true for our thoughts and convictions about religion Perhaps we were otherwise too engaged Perhaps we simply adopted what our elders and peers appeared to believe Whatever the case isn't it time for us all to examine matters of religiosity more carefully At least we a bunch of retired professors no longer absorbed by professional duties thought the time had come to ponder why we had taken so much for granted Amazon.com
