The present volume bridges a considerable gap in English literature available on women from twelve west European countries and their work in the biological and medical sciences, mathematics and social sciences. A fascinating analysis of the work of notable women by national group giving thorough data comparing the contributions of women in choice fields. Among the women presented are more than a few colorful personalities representative of the entire social scale from a royal princess to the daughter of a Paris slum shopkeeper. Researchers in the field of women's history and science history will find this indexed volume a valuable resource.
