Nature Culture And Big Old Trees:

Nature, Culture, and Big Old Trees Kit Anderson, 2010-06-04 Big old trees inspire our respect and even affection The poet Walt Whitman celebrated a Louisiana live oak that was solitary in a wide flat space Uttering joyous leaves all its life without a friend a lover near Groves and alleys of live oaks remain as distinctive landscape features on Louisiana s antebellum plantations while massive individuals still cast their shade over churches graveyards parks and roads Cajuns have adopted the Evangeline Oak as one of their symbols And the attachment that Louisianians feel for live oaks is equaled by that of Guatemalans for ceibas the national tree of Guatemala Long before Europeans came to the Americas the ceiba tallest of all native species was the Mayan world tree the center of the universe Today many ceibas remain as centers of Guatemalan towns spreading their branches over the central plaza and marketplace In this compelling book Kit Anderson creates a vibrant portrait of the relationship between people and trees in Louisiana and Guatemala Traveling in both regions she examined and photographed many old live oaks and ceibas and collected the stories and symbolism that have grown up around them She describes who planted the trees and why how the trees have survived through many human generations and the rich meanings they hold for people today Anderson also recounts the natural history of live oaks and ceibas to show what human use of the landscape has meant for the trees This broad perspective blending cultural geography and natural history adds a new dimension to our understanding of how big old trees and the places they help create become deeply meaningful even sacred for human beings

The Cultural Value of Trees Jeffrey Wall, 2022-06-01 This volume focuses on the tree as a cultural and biological form and examines the concept of folk value and its implications for biocultural conservation Folk value refers to the value of the more than human living world to cultural cohesion and survival as opposed to individual well being This field of value comprising cosmological aesthetic eco erotic sentimental mnemonic value and much more serves as powerful motivation for the local performance of environmental care The motivation to maintain and conserve ecology for the purpose of cultural survival will be the central focus of this book as the conditions of the Anthropocene urgently require the identification understanding and support of enduring self perpetuating biocultural associations The geographical scope is broad with chapters discussing different tree species from the Americas and the Caribbean East Asia Eurasia and Australia and Africa By focusing on the tree one of the most reliably cross culturally valued and cross culturally recognized biological forms and one which invariably defines expansive landscapes this work illuminates how folk value binds the survival of more than human life forms with the survival of specific peoples in the era of biocultural loss the Anthropocene As such this collection of cross cultural cases of tree folk value represents a low hanging fruit for the larger project of exploring the power of cultural value of the more than human living world This book will be of great interest to students and scholars of conservation biodiversity biocultural studies and environmental anthropology

Representation in Latin America Mark Anderson, Zélia M. Bora, 2016-10-04 Worldwide environmental crisis has become increasingly visible over the last few decades as the full scope of anthropogenic climate change manifests itself and large scale natural resource extraction has expanded into formerly remote areas that seemed beyond the reach of industrialization Scientists and popular culture alike have turned to the term Anthropocene to capture the global scale of environmental and even geological transformations that humans have carried out over the last two centuries The chapters in Ecological Crisis and Cultural Representation in Latin America examine the dynamics and interplay between local cultures and the expansion of global capitalism in Latin America emphasizing the role of art in bearing witness to and generating awareness of

environmental and social crises but also its possibilities for formulating solutions They take particular care to draw out the ways in which local environmental crises in Latin American nations are witnessed and imagined as part of a global system focusing on the problems of time scale and complexity as key terms in conceiving the dimensions of crisis At the same time they question the notion of the Anthropocene as a species wide human historical project making visible the coloniality of natural resource extraction in Latin America and its dire effects for local people cultures and environments Taking an ecocritical approach to Latin American cultural production including literature film performance and digital artwork the chapters in this volume develop a notion of ecological crisis that captures not only its documentary sense in the representation of environmental destruction the degradation of the oikos but also the crisis in the modern worldview logos that the acknowledgment of crisis provokes In this sense crisis is also the promise of a turning point of the possibilities for change Latin American representations of ecological crisis thus create the conditions for projects that decolonize environments developing new sustainable ways of conceiving of and relating to our world or returning to old ones

Baobab John Rashford, 2023-06-28 Modern humans descendants of a founding population that separated from chimpanzees some five to eight million years ago are today the only living representative of a branching group of African apes called hominins Because of its extraordinary size and shape the baobab *Adansonia digitata* L has long been identified as the most striking tree of Africa s mosaic savanna the landscape generally regarded as the environment of hominin evolution This book makes the case for identifying the baobab as the tree of life in the hunter gatherer adaptation that was the economic foundation of hominin evolution The argument is based on the significance of the baobab as a resource rich environment for the Hadza of northeastern Tanzania who continue to be successful hunter gatherers of the African savanna

Urban Space as Heritage in Late Colonial Cuba Paul Niell, 2015-05-15 According to national legend Havana Cuba was founded under the shade of a ceiba tree whose branches sheltered the island s first Catholic mass and meeting of the town council cabildo in 1519 The founding site was first memorialized in 1754 by the erection of a baroque monument in Havana s central Plaza de Armas which was reconfigured in 1828 by the addition of a neoclassical work El Templete Viewing the transformation of the Plaza de Armas from the new perspective of heritage studies this book investigates how late colonial Cuban society narrated Havana s founding to valorize Spanish imperial power and used the monuments to underpin a local sense of place and cultural authenticity civic achievement and social order Paul Niell analyzes how Cubans produced heritage at the site of the symbolic ceiba tree by endowing the collective urban space of the plaza with a cultural authority that used the past to validate various place identities in the present Niell s close examination of the extant forms of the 1754 and 1828 civic monuments which include academic history paintings neoclassical architecture and idealized sculpture in tandem with period documents and printed texts reveals a dissonance of heritage in other words a lack of agreement as to the works significance and use He considers the implications of this dissonance with respect to a wide array of interests in

late colonial Havana showing how heritage as a dominant cultural discourse was used to manage and even disinherit certain sectors of the colonial population *Latin American Research Review* ,2007 *Louisiana History* ,2004 **Ash** Edward Parker,2021-05-19 Ash is a beautifully illustrated account of the botanical and cultural faces of the ash tree The book maps the tree s evolution and geographical spread across the entire Northern Hemisphere over the last 44 million years and describes the 43 species that grace the planet today Edward Parker also explores the botany cultural history and medicinal uses of the tree from its significance in ancient Indo European cultures to its remarkable properties in treating Alzheimer s disease In addition he looks at topical issues such as the devastating effects that the spread of the emerald ash borer beetle and the ash dieback fungal infection are having on Northern Hemisphere forests **Proceedings of the III International Chestnut Congress** Carlos Gomes de Abreu,2005 **Peopled Landscapes** Simon Haberle,Bruno David,2012-01-01 This volume brings together a collection of papers from a diverse field of international scholars exploring the multiple ways that East Timorese communities are making and remaking their connections to land and places of ancestral significance The work is explicitly comparative and highlights the different ways Timorese language communities negotiate access and transactions in land disputes and inheritance especially in areas subject to historical displacement and resettlement Consideration is extended to the role of ritual performance and social alliance for inscribing connection and entitlement Emerging through analysis is an appreciation of how relations to land articulated in origin discourses are implicated in the construction of national culture and differential contributions to the struggle for independence Publisher s description **Nature in Literary and Cultural Studies** ,2006-01-01 Nature in Literary and Cultural Studies is a collection of essays written by European and North American scholars who argue that nature and culture can no longer be thought of in oppositional mutually exclusive terms They are united in an effort to push the theoretical limits of ecocriticism towards a more rigorous investigation of nature s critical potential as a concept that challenges modern culture s philosophical assumptions epistemological convictions aesthetic principles and ethical imperatives This volume offers scholars and students of literature culture history philosophy and linguistics new insights into the ongoing transformation of ecocriticism into an innovative force in international and interdisciplinary literary and cultural studies *Nature Magazine* ,1927 An illustrated monthly with popular articles about nature **Forthcoming Books** Rose Arny,2003
