Philosophy of Nature Paul K. Feyerabend, 2016-09-26 Philosopher physicist and anarchist Paul Feyerabend was one of the most unconventional scholars of his time His book *Against Method* has become a modern classic Yet it is not well known that Feyerabend spent many years working on a philosophy of nature that was intended to comprise three volumes covering the period from the earliest traces of stone age cave paintings to the atomic physics of the 20th century a project that as he conveyed in a letter to Imre Lakatos almost drove him nuts *Damn the Naturphilosophie* The book's manuscript was long believed to have been lost Recently however a typescript constituting the first volume of the project was unexpectedly discovered at the University of Konstanz In this volume Feyerabend explores the significance of myths for the early period of natural philosophy as well as the transition from Homer's aggregate universe to Parmenides uniform ontology He focuses on the rise of rationalism in Greek antiquity which he considers a disastrous development and the associated separation of man from nature Thus Feyerabend explores the prehistory of science in his familiar polemical and extraordinarily learned manner The volume contains numerous pictures and drawings by Feyerabend himself It also contains hitherto unpublished biographical material that will help to round up our overall image of one of the most influential radical philosophers of the twentieth century

FEELING the great need of stories founded upon good literature which are within the comprehension of little children I have written the following stories hoping that they may suggest to primary teachers the great wealth of material within our reach Many teachers who firmly believe that reading should be something more than mere word getting while the child's reading habit is forming are practically helpless without the use of a printing press We will all agree that myths and fables are usually beautiful truths clothed in fancy and the dress is almost always simple and transparent Who can study these myths and not feel that nature has a new language for him and that though the tales may be thousands of years old they are quite as true as they were in the days of Homer If the trees and the flowers the clouds and the wind all tell wonderful stories to the child he has sources of happiness of which no power can deprive him And when we consider that here too is the key which unlocks so much of the best in art and literature we feel that we cannot rank too highly the importance of the myth in the primary schoolroom
