NATURE OF CAPITAL AND INCOME IRVING. FISHER, 2018

The Rate of Interest: Its Nature, Determination and Relation to Economic Phenomena Irving Fisher, 1907

The Nature of Capital and Income Irving Fisher, James Tobin, Thorstein Veblen, Edwin Wilson, 2011-09-05 The Nature of Capital and Income was regarded by Schumpeter as one of three of Fisher's 1906 major contributions of first class importance and originality The other two were Fisher's Mathematical Investigations 1892 and his statistical method for measuring the marginal utility of income 1927 Fisher admitted that he had not appreciated the element of time when he was writing his doctoral thesis 1892 and accordingly he had not understood the importance of distinguishing between capital and income Just as accountants distinguish sharply between capital accounts or balance sheets relating to a point in time and income accounts relating to a period of time Fisher came to realize that the theory of capital and income should be built along similar lines Fisher's basic concept of capital is simple and comprehensive Capital embraces all stocks of material objects that yield services that human beings like Thus Fisher would include land and other natural resources as well as reproducible goods objects owned by households and governments as well as by businesses houses and other consumer durable goods as well as producers

durables objects whose yields are always in kind like houses occupied by their owners as well as those whose yields are marketed for cash the bodies of human beings perhaps their minds too as well as nonhuman objects Contemporaries schooled in the classical trilogy of land labor capital found Fisher's comprehensive view hard to take The Concept of Income Fisher's nature of capital was controversial at the time but it is much less so now His nature of income defined as consumption was even more controversial then and it remains controversial to this day The Rate of Interest published the following year deserves Samuelson's judgment as the greater of the two books Most important is the idea that the value of an asset is the capitalization of the stream of future services expected to be thrown off by the asset James Tobin 1918 2002 recipient of the Nobel Memorial Prize in Economics in 1981 The book includes additional content A commentary adapted by James Tobin 1991 a review by Thorstein Veblen 1908 and another review by Edwin Bidwell Wilson 1908 of MIT The Works of Irving Fisher Irving Fisher, 1997 **Federal Income Tax Treatment of Capital Gains and Losses** United States. Department of the Treasury. Tax Advisory Staff of the Secretary, 1951 7000-7999, Social sciences, 8000-8999, Natural sciences; 9000-9999, Technology Princeton University. Library, 1920 The Journal of Political Economy, 1907 Deals with research and scholarship in economic theory Presents analytical interpretive and empirical studies in the areas of monetary theory fiscal policy labor economics planning and development micro and macroeconomic theory international trade and finance and industrial organization Also covers interdisciplinary fields such as history of economic thought and social economics *Papers and Proceedings of the Annual Meeting* American Economic Association, 1928 **The Bulletin of the National Tax Association** National Tax Association, 1916 **Reports of Tax Cases**, 1922 **A Concise Treatise on the Law of Capital and Income as Between Life-tenant and Remainderman** William Henry Gover, 1901 *National Income and Nature: Externalities, Growth and Steady State* J.J. Krabbe, Wim Heijman, 2012-12-06 Since the environmental revolution began in the late 1960s economists have done a lot of work in the field of economic theory building on the preservation of nature Meanwhile environmental economic literature has swelled to a large stream of articles in journals of different signature As a result a coherent economic view of the phenomenon of environmental degradation has emerged Several kinds of green public policies and their impacts on both nature and the performance of the economy have been analysed The feasibility of specific types of policy has also been discussed The aim of the book is to provide an insight into the ways economists analyse the problems of environmental pollution and the depletion of natural resource To this purpose a number of articles have been selected Some of them have a fundamental character others an applied nature and are foremost practically oriented The presentation of the collection emphasizes our belief that economists are able to deliver an essential contribution to the design of policies to protect nature It is clear that nature and environment may no longer be regarded as free gifts to society Rather they have to be seen as scarce resources and environmental disruption and resource depletion as allocation problems If a natural resource is scarce a price must be charged in accordance with the degree of scarcity since

otherwise society will be confronted with misallocations In this connection there are two topics which are of particular interest to economists Common Sense Versus Judicial Legislation John Osborne Sargent,1871 **Common Sense Versus Judicial Legislation; Being the Review of a Law Recently Enacted by the Supreme Court of Massachusetts. By a Layman [i.e. J. O. Sargent].** John Osborne SARGENT,1871
