Nature Of Ornament Rhythm And Metamorphosis In Architecture:

Nature Of Ornament Kent Bloomer, 2000-10-31 Yet during the twentieth century ornament was scorned Adolf Loos famously called it crime and its study all but eliminated from art and architecture curricula What happened and must we live with the result Is ornament dead The Tender Detail Daniel E. Snyder, 2020-06-25 The Tender Detail tells a story about the repression of sentimentality through architectural ornament The protagonists are Louis H Sullivan and Frank Lloyd Wright two of the most important architects and designers of ornament in American history Interweaving close readings of their architecture and writings with wide ranging discussions about sexuality gender and philosophy the book explores how both men worked to solve the problem of late nineteenth century ornamentation It suggests that their solutions while widely different were both intimately rooted in the tender emotions of sentimentality Viewing ornament in this way reveals much not only about Sullivan and Wright s artistic intentions but also about the role of affect the value of beauty and the agency and ontology of objects Illuminated by personal stories from their respective autobiographies which add a level of human interest unusual in an academic work The Tender Detail is a readable scholarly study which sheds fresh light on Sullivan and Wright s relationship their work and on the nature of ornament itself

Contemporary Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2024-06-15 The book presents themes related to contemporary architecture as the results of diverse cultural influences and architectural legacies manifested in a rich variety of styles materials and spatial perceptions It consists of 24 chapters written by authors from various continents and contains the result of research highlighting contemporary architecture in relation to multiple aspects that are distinguished by their eclectic nature characterized by the integration of diverse cultural and architectural influences The book examines aspects involving material aspects technologies design history salvage technologies and digitization The aspects covered are always filtered through research which objectively integrates traditional and innovative approaches Thus the focus is to explore the contemporary lexicon not only in the field of architecture and engineering but in all those areas where this theme can be read with a meaningful vision Contemporary architecture is constantly evolving reflecting the changing needs of society and anticipating the challenges of the future Material Cultures in Southeast Asia Sabine Chaouche, 2025-05-30 This book investigates everyday objects in Southeast Asia as integral forms of cultural heritage examining their functions significance and the diverse values and emotions they have embodied over time By foregrounding material culture the chapters delve into how these objects ranging from utilitarian tools to artefacts of personal and communal identity reveal the social economic and cultural dimensions of life across different historical periods Through rigorous case studies spanning various regions of Southeast Asia the book offers fresh insights into the interplay between materiality and cultures It underscores how objects function not merely as remnants of the past but as dynamic carriers of heritage that continue to shape contemporary society By bridging perspectives from anthropology history and cultural studies this book enhances our comprehension of the region

s intricate social landscapes and contributes to broader discourses on heritage preservation and curation the transmission of cultural values and the ways in which everyday objects serve as conduits for collective memory and identity Ultimately it facilitates the de centring of Western perspectives in research on Southeast Asia Material Cultures in Southeast Asia provides a better understanding of past and present societies in Southeast Asia and it will be of interest to researchers in the fields of Southeast Asian studies memory studies and heritage studies

Ornament and Symbol in French Romantic Architecture Ralph Ghoche, 2025-08-12 For Simon Claude Constant Dufeux 1801 1871 a radical French architect and chair of perspective at the cole des Beaux Arts in Paris the study and composition of ornament were essential pursuits Architectural emblems and ornaments were symbols that conveyed concise and immediate meaning they were also a crucial element in realizing the Romantic ideal of the synthesis of the arts Through the lens of Constant Dufeux s work *Ornament and Symbol in French Romantic Architecture* explores the sudden proliferation of ornamental motifs in France challenging the understanding that the twentieth century modernist avant garde developed in direct opposition to ornament Ralph Ghoche examines architectural ornament from the July Monarchy to the Second Empire revealing its connections to Romantic theories of symbolism and ideas about the power of form to elicit emotional responses Ghoche repositions Constant Dufeux as a pivotal figure in developing new forms of symbolic signification in architecture establishing him as one of Romanticism s key theoreticians *Ornament and Symbol in French Romantic Architecture* reconstructs vibrant debates surrounding theories of the symbol the public function of architecture and the quest for the synthesis of the arts revealing architectural ornamentation to be part of a process of modernization that continued into the next generation of architects and artists ultimately culminating in the advent of art nouveau

Dynamic Patterns Karen M'Closkey, Keith VanDerSys, 2017-03-27 *Dynamic Patterns* explores the role of patterns in designed landscapes Patterns are inherently relational and the search for and the creation of patterns are endemic to many scientific and artistic endeavors Recent advances in optical tools sensors and computing have expanded our understanding of patterns as a link between natural and cultural realms Looking beyond the surface manifestation of pattern M'Closkey and VanDerSys delve into a multifaceted examination that explores new avenues for engagement with patterns using digital media Examining the theoretical implications of pattern making they probe the potential of patterns to conjoin landscape s utilitarian and aesthetic functions With full color throughout and over one hundred and twenty images *Dynamic Patterns* utilizes work from a wide range of artists and designers to demonstrate how novel modes of visualization have facilitated new ways of seeing patterns and therefore of understanding and designing landscapes

Kingly Splendor Allison R. Miller, 2020-12-01 The Western Han dynasty 202 BCE 9 CE was a foundational period for the artistic culture of ancient China a fact particularly visible in the era s funerary art Iconic forms of Chinese art such as dazzling suits of jade cavernous rock cut mountain tombs fancifully ornate wall paintings and armies of miniature terracotta warriors were prepared for the tombs of the elite during this period Many

of the finest objects of the Western Han have been excavated from the tombs of kings who administered local provinces on behalf of the emperors Allison R Miller paints a new picture of elite art production by revealing the contributions of the kings to Western Han artistic culture She demonstrates that the kings were not mere imitators of the imperial court but rather innovators employing local materials and workshops and experimenting with new techniques to challenge the artistic hegemony of the imperial house Tombs and funerary art Miller contends functioned as an important vehicle of political expression as kings strove to persuade the population and other elites of their legitimacy Through case studies of five genres of royal art Miller argues that the political structure of the early Western Han with the emperor as one ruler among peers benefited artistic production and innovation Kingly Splendor brings together close readings of funerary art and architecture with nuanced analyses of political and institutional dynamics to provide an interdisciplinary revisionist history of the early Western Han

Nature by Design Stephen R. Kellert, 2018-04-17 Biophilia is the theory that people possess an inherent affinity for nature which developed during the long course of human evolution In recent years studies have revealed that this inclination continues to be a vital component to human health and wellbeing Given the pace and scale of construction today with its adversarial dominative relationship with nature the integration of nature with the built environment is one of the greatest challenges of our time In this sweeping examination Stephen Kellert describes the basic principles practices and options for successfully implementing biophilic design He shows us what is and isn't good biophilic design using examples of workplaces healthcare facilities schools commercial centers religious structures and hospitality settings This book will appeal to architects designers engineers scholars of human evolutionary biology and with more than one hundred striking images of designs anyone interested in nature inspired spaces

Ornament and European Modernism Loretta Vandt, 2017-09-22 These in depth historical and critical essays study the meaning of ornament the role it played in the formation of modernism and its theoretical importance between the mid nineteenth century and the late twentieth century in England and Germany Ranging from Owen Jones to Ernst Gombrich through Gottfried Semper Alois Riegl August Schmarsow Wilhelm Worringer Adolf Loos Henry van de Velde and Hermann Muthesius the contributors show how artistic theories are deeply related to the art practice of their own times and how ornament is imbued with historical and social meaning

Handbook of Research on Visual Computing and Emerging Geometrical Design Tools Amoroso, Giuseppe, 2016-04-11 Visual computing and descriptive geometry are multidisciplinary fields addressing the handling of images 3D models and other computer graphics These ideas are experiencing a revival due to emergent technologies and applications available to developers Based in traditional forms of design and architecture these fields are currently experiencing a bounty of new research based on old principles The Handbook of Research on Visual Computing and Emerging Geometrical Design Tools seeks to add to this knowledge base by considering these technologies from a designer's perspective rather than reiterating the principles of computer science It combines aspects of geometry and representation

with emerging tools for CAD generation and visualization while addressing the digital heritage of such fields This book is an invaluable resource for developers students of both graphic and computer generated design researchers and designers

Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well

Biophilic Design Stephen R. Kellert, Judith Heerwagen, Martin Mador, 2011-09-26 When nature inspires our architecture not just how it looks but how buildings and communities actually function we will have made great strides as a society Biophilic Design provides us with tremendous insight into the why then builds us a road map for what is sure to be the next great design journey of our times Rick Fedrizzi President CEO and Founding Chairman U S Green Building Council Having seen firsthand in my company the power of biomimicry to stimulate a wellspring of profitable innovation I can say unequivocally that biophilic design is the real deal Kellert Heerwagen and Mador have compiled the wisdom of world renowned experts to produce this exquisite book it is must reading for scientists philosophers engineers architects and designers and most especially businesspeople Anyone looking for the key to a new type of prosperity that respects the earth should start here Ray C Anderson founder and Chair Interface Inc The groundbreaking guide to the emerging practice of biophilic design This book offers a paradigm shift in how we design and build our buildings and our communities one that recognizes that the positive experience of natural systems and processes in our buildings and constructed landscapes is critical to human health performance and well being Biophilic design is about humanity's place in nature and the natural world's place in human society where mutuality respect and enriching relationships can and should exist at all levels and should emerge as the norm rather than the exception Written for architects landscape architects planners developers environmental designers as well as building owners Biophilic Design The Theory Science and Practice of Bringing Buildings to Life is a guide to the theory science and practice of biophilic design Twenty three original and timely essays by world renowned scientists designers and practitioners including Edward O Wilson Howard Frumkin David Orr Grant Hildebrand Stephen Kieran Tim Beatley Jonathan Rose Janine Benyus Roger Ulrich Bert Gregory Robert Berkebile William Browning and Vivian Loftness among others address The basic concepts of biophilia its expression in the built

environment and how biophilic design connects to human biology evolution and development The science and benefits of biophilic design on human health childhood development healthcare and more The practice of biophilic design how to implement biophilic design strategies to create buildings that connect people with nature and provide comfortable and productive places for people in which they can live work and study Biophilic design at any scale from buildings to cities begins with a few simple questions How does the built environment affect the natural environment How will nature affect human experience and aspiration Most of all how can we achieve sustained and reciprocal benefits between the two This prescient groundbreaking book provides the answers

Thinking about Architecture Colin Davies, 2011-10-17 In order to understand architecture in all its cultural complexity it is necessary to grasp such basic concepts as representation form and space The aim of this book is to provide teachers students practising architects and general readers with a set of ideas that will enrich their conversation their writing and above all their thinking about architecture The book is divided into eight chapters each covering a particular aspect of architecture and introduces difficult concepts gradually Architectural theorists and philosophers are mentioned in passing and their works are listed in the bibliography but they are not the subject of the book Architecture rather than philosophy is at the centre of the picture The aim is to enable the reader to understand architecture in all its aspects rather than to learn the names of particular theorists Written in a conversational style Thinking about Architecture is an invaluable and accessible standard introduction to architectural theory

exlibris Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimization In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences

Inside Information Sally Stone, Edward Hollis, 2022-03-01 Every built structure has an interior whether it takes the rough form of a rudimentary shelter the grey walls of a hospital or the finessed decoration of a one off residence We spend most of our time inside buildings Shut your eyes and you will find yourself in your own interior You will always be inside Mastering the language thinking and history of the interior is critical to understanding and designing spaces This essential primer transcends the boundaries and genres that often define interiors providing a comprehensive view of the concepts and vocabulary of interior design Written as an accessible treasury of principal terms and ideas Inside Information engages with the past uncovering the future potential of the interior and its design Introduces the reader to 26 key terms from ante to zeitgeist Covers areas of study from the very practical structures decoration and sustainability to the philosophical gender space and light Features sources ranging from Le Corbusier to Norman Foster Jacques Derrida to Noam Chomsky Virginia Woolf to George Orwell Highly illustrated with over 100 photographs and drawings

Merleau-Ponty Patricia M. Locke, Rachel McCann, 2016-01-25 Phenomenology has played a decisive role in the

emergence of the discourse of place now indispensable to many disciplines in the humanities and social sciences and the contribution of Merleau Ponty's thought to architectural theory and practice is well established Merleau Ponty Space Place Architecture is a vibrant collection of original essays by twelve eminent philosophers who mine Merleau Ponty's work to consider how we live and create as profoundly spatial beings The resulting collection is essential to philosophers and creative artists as well as those concerned with the pressing ethical issues of our time Each contributor presents a different facet of space place or architecture These essays carve paths from Merleau Ponty to other thinkers such as Irigaray Deleuze Ettinger and Piaget As the first collection devoted specifically to developing Merleau Ponty's contribution to our understanding of place and architecture this book will speak to philosophers interested in the problem of space architectural theorists and a wide range of others in the arts and design community Contributors Nancy Barta Smith Edward S Casey Helen Fielding Lisa Guenther Galen A Johnson Randall Johnson D R Koukal Suzanne Cataldi Laba Patricia M Locke Glen Mazis Rachel McCann David Morris and Dorothea Olkowski
