Environmental Pragmatism Eric Katz, Andrew Light, 2013-04-15 Environmental pragmatism is a new strategy in environmental thought. It argues that theoretical debates are hindering the ability of the environmental movement to forge agreement on basic policy imperatives. This new direction in environmental thought moves beyond theory advocating a serious inquiry into the merits of moral pluralism. Environmental pragmatism as a coherent philosophical position connects the methodology of classical American pragmatic thought to the explanation solution and discussion of real issues. This concise well focused collection is the first comprehensive presentation of environmental pragmatism as a new philosophical approach to environmental thought and policy.

John Dewey and

Environmental Philosophy Hugh P. McDonald, 2012-02-01 Hugh P McDonald s John Dewey and Environmental Philosophy breaks new ground by applying Dewey s insights to a new approach to philosophy of the environment the concern for the rights of animals the preservation of rare species habitats and landscapes and the health of the whole ecology. The book summarizes much of the current literature on environmental ethics concentrating on the writings of major figures in the movement Tom Regan J Baird Callicott Holmes Rolston and Bryan Norton. The heart of the book consists of a detailed analysis of Dewey s ethics his theory of intrinsic value and his holistic approach to moral justification. Arguing against the idea that Dewey s philosophy is anthropocentric McDonald makes a strong case that using Dewey s philosophy will result in a superior framework for environmental ethics.

The Poetics of Transition Jonathan Levin, 1999 Considers the work of American pragmatists and of three major literary modernists and reveals how their work foregrounds William James s concept of transitional consciousness.

Post-Materialist Religion Mika T. Lassander, 2014-08-28 Post Materialist Religion discusses the transformations of the individual s worldview in contemporary modern societies and the role general societal value change plays in these. In doing so Mika Lassander brings into conversation sociological theories of secularisation and social psychological theories of interpersonal relations the development of morality and the nature of basic human values. The long term decline of traditional religiosity in Europe and the emerging ethos that can be described as post secular have brought religion and values back into popular discussion. One important theme in these discussions is about the links between religion and values with the most common assumption being that religions are the source of individuals values. This book argues for the opposite view suggesting that religions or people s worldviews in general reflect the individual s priorities. Mika Lassander argues that the transformation of the individual s worldview is a direct consequence of the social

and economical changes in European societies since the Second World War He suggests that the decline of traditional religiosity is not an indication of linear secularisation or of forgetting traditions but an indication of the loss of relevance of some aspects of the traditional institutional religions Furthermore he argues that this is not an indication of the loss of ethical value base but rather a change in the value base and consequently the transformation of the legitimating framework of this value base **Rethinking Nature** Bruce V. Foltz, Robert Frodeman, 2004-11-02 Rethinking Nature brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems This far reaching and lively volume affords firm ground for thinking about the multiple ways that humans engage nature Contributors are David Abram Edward S Casey Daniel Cerezuelo Ron Cooper Bruce V Foltz Robert Frodeman Trish Glazebrook James Hatley Robert Kirkman Irene J Klaver Alphonso Lingis Kenneth Maly Diane Michelfelder Elaine P Miller Robert Mugerauer Stephen David Ross John Sallis Ingrid Leman Stefanovic Bruce Wilshire David Wood and Michael E Zimmerman Nature Sir Norman Lockyer, 1924

Animal Ethics and Philosophy Elisa Aaltola, John Hadley, 2014-11-24 Debate in animal ethics needs reenergizing To date philosophers have focused on a relatively limited number of specific themes whilst leaving metaphysical issues that require urgent attention largely unexamined This timely collection of essays brings together new theory and critical perspectives on key topics in animal ethics foregrounding questions relating to moral status moral epistemology and moral psychology Is an individualistic approach based upon capacities the best way to ground the moral status of non human animals or should philosophers pursue relational perspectives What does it mean to know animals and speak for them What is the role of emotions such as disgust empathy and love in animal ethics and how does emotion inform the rationalism inherent in analytic animal ethics theory The collection aims to broaden the scope of animal ethics rendering it more inclusive of important contemporary philosophical themes and pushing the discipline in new directions Contemporary Pragmatism. Sherman,2014 Metasemantics comprises new work on the philosophical foundations of linguistic semantics by a diverse group of established and emerging experts in the philosophy of language metaphysics and the theory of content The science of semantics aspires to systematically specify the meanings of linguistic expressions in context The paradigmatic metasemantic question is accordingly what more basic or fundamental features of the world metaphysically determine these semantic facts Efforts to answer this question inevitably raise others Where are the boundaries of semantics What is the essence of the meaning relation Which framework should we use for semantic theorizing What are the intrinsic natures of semantic values Are the semantic facts metaphysically determinate What is semantic competence Metasemantic inquiry has long been recognized as a central part of the philosophy of language but recent developments in metaphysics and semantics itself now allow us to approach these classic questions with an unprecedented degree of precision The essays collected here provide promising new perspectives on old problems pose questions that suggest novel research projects and taken together greatly sharpen our understanding of linguistic representation *Subject Catalog* Library of Congress, [Classical American Pragmatism](#) Martin A. dispositions strictly proscribes unnecessarily harming organisms and it also gives us moral reason to act in ways that benefit such organisms Svoboda's account engages the recent literature on environmental virtue including Rosalind Hursthouse Philip Cafaro Ronald Sandler Thomas Hill and Louke van Wensveen and provides an original argument for an environmental ethic firmly rooted in Kant's moral philosophy **Natural Philosophy** Paul Thagard, 2019 Volume 3 Natural philosophy from social brains to knowledge reality morality and beauty **Kant, Science, and Human Nature** Robert

Hanna, 2006-10-19 Robert Hanna argues for the importance of Kant's theories of the epistemological metaphysical and practical foundations of the exact sciences relegated to the dustbin of the history of philosophy for most of the 20th century Hanna's earlier book *Kant and the Foundations of Analytic Philosophy* OUP 2001 explores basic conceptual and historical connections between Immanuel Kant's 18th century Critical Philosophy and the tradition of mainstream analytic philosophy from Frege to Quine The central topics of the analytic tradition in its early and middle periods were meaning and necessity But the central theme of mainstream analytic philosophy after 1950 is scientific naturalism which holds to use Wilfrid Sellars's apt phrase that science is the measure of all things This type of naturalism is explicitly reductive Kant Science and Human Nature has two aims one negative and one positive Its negative aim is to develop a Kantian critique of scientific naturalism But its positive and more fundamental aim is to work out the elements of a humane realistic and nonreductive Kantian account of the foundations of the exact sciences According to this account the essential properties of the natural world are directly knowable through human sense perception empirical realism and practical reason is both explanatorily and ontologically prior to theoretical reason the primacy of the practical *Green Politics* Dustin Mulvaney, 2011-06-28 Colorful bracelets funky brooches and beautiful handmade beads young crafters learn to make all these and much more with this fantastic step by step guide In 12 exciting projects with simple steps and detailed instructions budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble Following the successful Art Smart series Craft Smart presents a fresh fun approach to four creative skills knitting jewelry making papercrafting and crafting with recycled objects Each book contains 12 original projects to make using a range of readily available materials There are projects for boys and girls carefully chosen to appeal to readers of all abilities A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills **The Landscape of Reform** Ben A. Minteer, 2006 In *The Landscape of Reform* Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive

conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic *A Sand County Almanac* Minteer argues that these writers blazed a significant third way in environmental ethics and practice a

more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help bring about a new civic minded environmentalism today [The Essential Dewey, Volume 1](#) John Dewey, 1998-08-22 Based on the award winning 37 volume critical edition of Dewey s work The Essential Dewey presents for the first time a collection of Dewey s writings that is both manageable and comprehensive
