**RD Boyd**

## **Natures Fading Chorus Classic And Contemporary Writings On Amphibians:**

**Nature's Fading Chorus** Gordon Miller, 2000-05 Naturalists in every age have been intrigued by frogs toads and salamanders They have seen these amphibians in a variety of guises as beings with magical powers or implicit moral lessons as the products of spontaneous generation as heralds of the seasons as evidence of evolution or material for biological experiments or most recently as ecological barometers for the biosphere *Nature's Fading Chorus* presents an anthology of writings on amphibians drawn from the entire Western natural history tradition beginning with Aristotle's *Inquiry Concerning Animals* written in the fourth century B C E and continuing through recent scientific accounts of the relatively sudden and alarming global declines and deformities in amphibian species The offerings not only reveal much about amphibian life but also provide fascinating insight into the worldviews of the many writers scientists and naturalists who have delved into the subject The book is divided into five sections The first three offer selections from the most influential contributors to the Western canon of natural history writing and contain classic texts that illustrate central themes in the changing understanding of amphibians and of the natural world The fourth section offers engaging essays by leading twentieth century nature writers that portray a variety of amphibians in diverse terrains Part five covers the various aspects of and research on the problem of amphibian declines and deformities Featured are more than thirty five pieces including works from Pliny the Elder Gilbert White William Bartram Henry David Thoreau Charles Darwin T H Huxley Loren Eiseley Stephen Jay Gould George Orwell Annie Dillard Terry Tempest Williams and many others Arranged chronologically the writings provide an intriguing look at the ways in which humankind's understanding of its place in nature has changed through the course of Western history and of the niche amphibians have occupied in that evolution

*We Are Amphibians* R. S. Deese, 2014-11-24 *We Are Amphibians* tells the fascinating story of two brothers who changed the way we think about the future of our species As a pioneering biologist and conservationist Julian Huxley helped advance the modern synthesis in evolutionary biology and played a pivotal role in founding UNESCO and the World Wildlife Fund His argument that we must accept responsibility for our future evolution as a species has attracted a growing number of scientists and intellectuals who embrace the concept of Transhumanism that he first outlined in the 1950s Although Aldous Huxley is most widely known for his dystopian novel *Brave New World* his writings on religion ecology and human consciousness were powerful catalysts for the environmental and human potential movements that grew rapidly in the second half of the twentieth century While they often disagreed about the role of science and technology in human progress Julian and Aldous Huxley both believed that the future of our species depends on a saner set of relations with each other and with our environment Their common concern for ecology has given their ideas about the future of *Homo sapiens* an enduring resonance in the twenty first century The amphibian metaphor that both brothers used to describe humanity highlights not only the complexity and mutability of our species but also our ecologically precarious situation

**Snakes** Stephen J. Mullin, Richard A. Seigel, 2009 In the first book

on snakes written with a focus on conservation editors Stephen J Mullin and Richard A Seigel bring together leading herpetologists to review and synthesize the ecology conservation and management of snakes worldwide **Facing the Wild** Chilla Bulbeck, 2012-06-25 What do wild animals mean to humans Will they survive both rampant habitat loss and extinction caused by human encroachment and as ecotourists our enthusiasm for them With ecotourism now the fastest growing segment of tourism and encounters with wild animals be it swimming with dolphins going on safari or bird watching ever more popular these are critical questions Yet until now little has been known about why people crave encounters with wild animals and the meaning for the ecotourism industry conservation efforts and society at large Facing the Wild is the first serious empirical examination of why people seek out animals in their natural environment what the desire for this experience tells us about the meanings of animals nature authenticity and wilderness in contemporary industrialized societies and whether visitors change their environmental perspectives and behaviour as the custodians of wildlife parks would like them to The book explores the contradictions and ambivalence that so many people experience in the presence of wild nature in loving it we may diminish it and in the act of wanting to see it we may destroy it Ultimately the book makes a case for respectful stewardship of a hybrid nature and provides insight for both practitioners and ecotourists alike **The Magic Ring** Piero Mella, 2014-05-06 This book presents a gradual path toward educating readers in understanding how Control Systems truly operate and in recognizing simulating and improving them in all fields of activity Starting from the hypothesis that knowledge of Control Systems is not only a technical fact but also represents a discipline that is A discipline is a developmental path for acquiring certain skills or competencies To practice a discipline is to be a lifelong learner You never arrive you spend your life mastering disciplines Senge 2006 p 10 Piero Mella has set the objective of making Control Systems a topic that is in a certain sense simple and attractive by turning to the effective symbolism typical of Systems Thinking models and avoiding too technical and formal a treatment of the subject Thus readers should know that this is not an engineering physics biology or economics text nor a mathematics one either Technical or mathematical tools are not necessary to construct Control Systems instead the book adopts a highly simple and universal logic behind the notion itself of control process and the simple and universal action of the Control Systems that produce this process The Magic Ring Systems Thinking Approach to Control Systems is divided into 10 chapters Chapter 1 seeks to review the basic language of Systems Thinking and the models it allows us to create while Chapter 2 introduces the control process presenting the theoretical structure of four simple Control Systems we all can observe and manage In Chapter 3 a general typology of Control Systems is proposed with examples taken from observations of reality The view of Control Systems is broadened in Chapter 4 by introducing two important generalizations 1 multi lever Control Systems with levers that are independent or dependent of each other 2 multi objective systems with independent or interdependent objectives Chapter 5 outlines the guidelines for recognizing observing or designing Control Systems and presents the problems that arise regarding their

logical realization introducing the fundamental distinction between symptomatic and structural control Chapters 6-9 undertake a mental journey through various environments increasingly broader in scope suggesting to the reader how to recognize therein Control Systems that by their ubiquitous presence make the world possible in all its manifestations Finally Chapter 10 covers ideas about a Discipline of Control Systems and the human aspects of control

**The Amphibian Class** Rebecca Stefoff, 2008 Barking frogs giant cane toads six foot long Chinese salamanders and tiny dwarf sirens all these and many more are amphibians who live in the two worlds of water and land The Amphibian Class describes the origins and ways of life of the three main kinds of amphibians with a look at many weird and wonderful species It covers the amphibian life cycle from tadpole to tree frog introduces the strange and seldom seen creatures called caecilians and even answers the age old question What's the difference between a frog and a toad The Amphibian Class also explains why many scientists fear that these ancient animals are in serious trouble today and looks at some of the things being done to help them survive into the future Book jacket

**Keeping Things Whole** Joseph Coulson, Donald Whitfield, Ashley L. Preston, 2003 *The Nature of Life*, 2001 Transactions of the Illinois State Academy of Science Illinois State Academy of Science, 2003 Vol 1 covers the organizational meeting Springfield Dec 7 1907 and the first regular meeting Decatur Feb 22 1908

**Forthcoming Books** Rose Army, 2000-06 Choice, 2000 *The Publishers Weekly*, 2000 *Library Journal*, 2000 The Zoological Record, 2002 *Natural Areas Journal*, 2001 *Inland Island* Walt Anderson, 2004

**Walking the High Ridge** Robert Michael Pyle, 2000 Autobiographical sketch by writer and naturalist Robert Pyle Bibliography of Agriculture with Subject Index, 2000

**Teaching North American Environmental Literature** Laird Christensen, Mark C. Long, Frederick O. Waage, 2008 From stories about Los Angeles freeways to slave narratives to science fiction environmental literature encompasses more than nature writing The study of environmental narrative has flourished since the MLA published *Teaching Environmental Literature* in 1985 Today writers evince a self consciousness about writing in the genre teachers have incorporated field study into courses technology has opened up classroom possibilities and institutions have developed to support study of this vital body of writing The challenge for instructors is to identify core texts while maintaining the field's dynamic open qualities The essays in this volume focus on North American environmental writing presenting teachers with background on environmental justice issues ecocriticism and ecofeminism Contributors consider the various disciplines that have shaped the field including African American American Indian Canadian and Chicana/o literature The interdisciplinary approaches recommended treat the theme of predators in literature ecology and ethics conservation and film A focus on place based literature explores how students can physically engage with the environment as they study literature The volume closes with an annotated resource guide organized by subject matter

**National Wetlands Newsletter**, 2000

This is likewise one of the factors by obtaining the soft documents of this **Natures Fading Chorus Classic And Contemporary Writings On Amphibians** by online.
