Nauka I Religija:

Marxism and Religion in Eastern Europe R.T. De George, Robert H. Scanlan, 2012-12-06 Since the Bolshevik revolution of 1917 two of the most significant but at the same time least understood areas of that revolution's cultural impact have been philosophy and religion. The impact has of course been massive not only in the Soviet Union but after the second World War in Soviet dominated Eastern Europe as well. Yet the consequences of Communism for philosophy and religion throughout the Soviet orbit are far from having the simplicity suggested by the stereotypes of a single monolithic Marxism and a consistent crushing assault on the Church and on religious faith. Unquestionably Marxism is the ruling philosophy throughout Eastern Europe. In the Soviet Union Marxism Leninism or dialectical materialism is the official and the only tolerated philosophy and most of the other countries of Eastern Europe follow the Soviet lead in philosophy as in other fields. But in the latter countries Marxism was imposed only after World War II and its development has not always copied the Soviet model. Original thinkers in Yugoslavia, Czechoslovakia, Poland, and Hungary have thought their own way through the writings of Marx and his followers and have arrived at Marxist positions which are considerably at variance with the Soviet interpretations and often with each other. Moreover in recent years the Soviet philosophers themselves have been unable to ignore the theoretical questions raised by the other East of Marxism in the West. *Nauka i religija kroz vekove* Milija Stanić, 1952

Demythologizing Marxism F.J. Adelman, 2012-12-06 This second volume of the Boston College Studies in Philosophy commemorates the one hundred and fiftieth anniversary of the birth of Karl Marx. This dedication bespeaks the evolution permeating the entire world today not only in the sense of a development of ideas but more especially of the inner and sincere quest for peace intensifying in the hearts of all men. We Christians rejoice in the drive onward toward the fulfillment of peace on earth. We are sorry however that it is so late in Christian history and that it received its impulse more from the fear of nuclear armaments than from the development of Christian ideas. Nonetheless here in the midst of so much bewilderment we add an optimistic note in the realization that these ideas can now touch at long last offer hope for a peaceful future. Strange as it may seem there is currently a new interest in the philosophy of Marxism. This stems in part from the renewed study of the writings of the young Marx and a concentration on that aspect of his work which is more philosophical than politico-economic such as is more prominent in the later *Das Kapital*. But even more our interest in Marxism has occurred because of what has happened to the contemporary Marxists themselves. First of all after Stalin's time a certain new openness not yet perfect but nonetheless real has developed in Russia to the benefit of scholars. **Scientific Atheism**

in East Germany (1963-1990) Eva Guigo-Patzelt, 2024-12-02 This book offers an in-depth archive-based analysis of scientific atheism focused on the development of the field in the German Democratic Republic (GDR). Scientific atheism was established as a Soviet import in 1963 at Jena University with a presence in East German universities, propaganda, and politics for nearly 30 years. The chapters explore the sociological work done by scientific atheists such as Olof Klohr, how they

defined religion and atheism and their role as actors of atheisation in various fields As well as reflecting on the specific religious and political context in East Germany the author makes comparison with other communist ruled countries Drawing on extensive and unique documentation this book will be of interest to scholars of atheism and secularism religion and politics religious history German history and East European studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

The Early Solov'ev and His Quest for Metaphysics Thomas Nemeth, 2013-10-18 This volume offers a critical examination of the early works of Vladimir Solov v Russia s most famous and systematic philosopher It presents a philosophical critique of his early writings up to 1881 from an immanent viewpoint and examines Solov v s intended contributions to philosophy against the background of German Idealism including Schopenhauer and the positivism of his day Examining contemporary reactions to his writings by leading figures of his day such as Chicherin and Kavelin The Early Solov v and His Quest for Metaphysics reveals the small but vibrant philosophical community in Russia during the immediate decades before the Bolshevik Revolution It provides a detailed discussion of Solov v s confrontation with his philosophical opponents and shows how his emphasis on developing a metaphysical ontology rather than epistemology exerted a virtual paradigmatic influence on Russian philosophy for years to come This volume also sets Solov v s writings against a detailed intellectual biography of these early years drawing on letters to friends and relatives including reminiscences and challenges many of the received

claims concerning his actions and positions particularly his alleged youthful mystical visions In addition the book features two appendices one that sketches the early Russian reception of French positivism against which Solov v reacted in the name of metaphysics and another that presents a fascinating look at the Solov v family background which produced at once intellectual as well as dysfunctional members Presenting a rare picture of the non Marxist intellectual scene in 19th century Russia The Early Solov v and His Quest for Metaphysics will be of interest to graduate students and researchers looking for a philosophically informed approach to this unique thinker and era

The Later Solov'ëv Thomas Nemeth,2019-07-24 This volume offers a critical examination of the later philosophical views of Vladimir Solov v arguably Russia s most famous and most systematic philosopher It offers a philosophically informed approach to this pivotal figure and to his era Inside readers will discover a detailed portrait of the often overlooked evolution of the philosopher s views during the final two decades of his life The author explores Solov v s still evolving aesthetic philosophy and his entry into the lively Russian discussion of free will The work then turns to the philosopher s mature statements on many figures from within the history of philosophy This includes Kant and Hegel Next readers will learn about his disagreements with several contemporaries as well as contemporaneous movements These include positivism and materialism In addition the coverage includes an elucidation and examination of Solov v s final expression of his ethical philosophy as set forth in his major ethical treatise Justification of the Moral Good The overall picture that emerges is of a much more vibrant and heated philosophical community than typically portrayed in Western secondary literature The book ends with a reflection on the rise of Solov v as a religious mystic at the expense of a critical evaluation of his thought

Communicating Religion and Atheism in Central and Eastern Europe Jenny Vorpahl,Dirk Schuster,2020-06-08 This book brings together case studies dealing with historical as well as recent phenomena in former socialist nations which testify the transfer of knowledge about religion and atheism The material is connected on a semantic level by the presence of a historical watershed before and after socialism as well as on a theoretical level by the sociology of knowledge With its focus on Central and Eastern Europe this volume is an important contribution to the research on nonreligion and secularity The collected volume deals with agents and media within specific cultural and historical contexts Theoretical claims and conceptions by single agents and or institutions in which the imparting of knowledge about religion and atheism was or is a central assignment are analyzed Additionally procedures of transmitting knowledge about religion and atheism and of sustaining related institutionalized norms interpretations roles and practices are in the focus of interest The book opens the perspective for the multidimensional and negotiating character of legitimation processes being involved in the establishment or questioning of the institutionalized opposition between religion

and atheism or religion and science **Intl Biblio Pol SC 1965** International Committee for Social Science Information and Documentation, 1966 First published in 1966 Routledge is an imprint of Taylor Francis an informa company
