American Aircraft Development Second World War Legacy William J. Norton, 2021-12-02 This volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war. It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea. The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress. These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed. Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow on models or types. Included are military prototype experimental and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow.

Attack Aircraft of the U. S. Navy and Marine Corps Bert Kinzey, 2025-01-04 Attack aircraft of the U S Navy and Marine Corps covers the history of the U S Navy's attack category of carrier based aircraft from its very inception shortly after the end of World War II through the present day. It follows on the heels of three prior Detail Scale books that present a historical look at the U S Navy's carrier based aircraft over the last 80 years. U S Navy and Marine Carrier Based Aircraft of World War II covered every carrier based fighter scout dive bomber and torpedo bomber design that the Navy and Marine Corps brought to at least the flying prototype stage during the war. It was followed by two books that covered Navy jet fighter aviation history. Jet Fighters of the U S Navy and Marine Corps Part 1 the First Ten Years and Jet Fighters of the U S Navy and Marine Corps Part 2 Mach 1 and Beyond brought the reader up to the present day covering both fighters and the multi role fighter attack aircraft flown by the two services. This fourth volume in Detail Scale's look at U S Navy and Marine Corps carrier based aircraft focuses on the attack aircraft types that came into being as World War II came to an end as the Navy combined the roles and capabilities of the scout dive bomber and the torpedo bomber into a single aircraft type. These attack aircraft continued to provide the Navy and Marines with their carrier capable striking ability until the mid 1990s. Thirteen different aircraft are covered in this publication and among them are some of the most iconic aircraft in military aviation history. These include the Douglas AD Skyraider which remains one of the most versatile aircraft ever produced the diminutive Douglas A 4 Skyhawk Grumman's A 6 Intruder which provided the Navy and Marines with an all weather deep strike capability from Vietnam to Desert Storm and the LTV A 7 Corsair II. The heavy attack aircraft in the form of the Douglas A 3 Skywarrior and the North American A 5 Vigilante are covered not only in their

original attack versions but also in the later variants that performed other important missions for the Navy's carrier air wings. Lesser known types like the Vought AU-1 Corsair, the Martin AM Mauler and the North American AJ Savage are covered as is the Douglas A-2D Skyhawk which never made it into operational service. The first truly successful S-VTOL aircraft, the British designed Harrier, is also among the classic aircraft included in this publication. In the 1980s the multi-role F/A-18 Hornets began replacing the Navy's attack aircraft. By the mid-1990s the A-6 Intruder and A-7 Corsair II became the last U.S. Navy attack aircraft to be retired. Today the F/A-18E and F/A-18F Super Hornets have even replaced the fighter aircraft with the last F-14 Tomcat having been retired in 2006. As this book is released in 2022, only one aircraft, the AV-8B Harrier II, continues to serve the Marines as the last specific designed attack aircraft remaining in service and it is in the process of being replaced by the F-35B Lightning II Attack Aircraft of the U.S. Navy and Marine Corps.

This publication is profusely illustrated with 237 pages, 243 high-resolution photographs, 174 of which are in color and 11 full-color profiles.

Historic Naval Aircraft Norman Polmar, 2004. Discover the U.S. Navy's rich aviation heritage through its aircraft.

At the Helm of USS America James E. Wise, Jr., Scott Baron, 2016-04-14. Only the best officers are given command of U.S. Navy ships and only the elite of these are selected for aircraft carriers. The USS America was the third of four Kitty Hawk class super carriers. Commissioned in 1965, decommissioned in 1996, she served three times in Vietnam and once each in Libya, the Persian Gulf, and Bosnia. This book profiles the 23 men who commanded the America and her crew of 5,000 during 31 years. Most of them were combat veterans: World War II, Korea, Vietnam, Mayaguez Rescue Operations, Lebanon, Haiti, Libya, Bosnia, and Desert Storm. Four were Naval Academy graduates, seven were test pilots, one became Inspector General of the Navy, one wore both Navy wings and submariner dolphins, and one was a prisoner of war in Vietnam for nearly six years. Two retired as admirals, one was Chief of Naval Operations, five as vice admirals, and 11 as rear admirals. Each profile gives a career account based on official biographies, published memoirs, and interviews with the commanders or their families.
