**The Naval Institute Guide to World Naval Weapons Systems, 1997-1998** Norman Friedman, 1997 Covers the vital systems sensors fire control and tracking that support naval weapons and often determine their effectiveness **United States Naval Institute Proceedings**, 1999 **Naval Expeditionary Logistics** National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Naval Studies Board, Committee on Naval Expeditionary Logistics, 1999-02-09 At the request of the Chief of Naval Operations the National Research Council NRC conducted a study to determine the technological requirements operational changes and combat service support structure necessary to land and support forces ashore under the newly evolving Navy and Marine Corps doctrine The Committee on Naval Expeditionary Logistics operating under the auspices of the NRC's Naval Studies Board was appointed to 1 evaluate the packaging sealift and distribution network and identify critical nodes and operations that affect timely insertion of fuels ammunition water medical supplies food vehicles and maintenance parts and tool blocks 2 determine specific changes required to relieve these critical nodes and support forces ashore from assault through follow on echelonment and 3 present implementable changes to existing support systems and suggest the development of innovative new systems and technologies to land and sustain dispersed units from the shoreline to 200 miles inland In the course of its study the committee soon learned that development of OMFTS is not yet at a stage to allow directly detailed answers to many of these questions As a result the committee addressed the questions in terms of the major logistics functions of force deployment force sustainment and force medical support and the fundamental logistics issues related to each of these functions **The Tools of Owatatsumi** Desmond Ball, Richard Tanter, 2015-01-21 Japan is quintessentially by geography a maritime country Maritime surveillance capabilities underwater shore based and airborne are critical to its national defence posture This book describes and assesses these capabilities with particular respect to the underwater segment about which there is little strategic analysis in publicly available literature Since the end of the Cold War Chinese oceanographic and navy vessels have intruded into Japanese waters with increasing frequency not counting their activities in disputed waters such as around the Senkaku Diaoyu Islands and Okinotorishima where China and Japan have overlapping territorial claims These intrusions have increasingly involved warships including submarines sometimes acting quite aggressively Japan maintains an extraordinary network of undersea hydrophone arrays connected to shore stations which are typically equipped with electronic intelligence ELINT systems for monitoring identifying and tracking submarine and surface traffic in its internal straits and surrounding seas Some parts of this network are operated jointly with and are of crucial importance to the US Navy Japan's superlative submarine detection capabilities would be of decisive advantage in any submarine engagement But the relevant facilities are relatively vulnerable which makes them very lucrative targets in any conflict This introduces compelling escalatory dynamics including the involvement of US forces and possible employment of nuclear options *Instruments of War* Spencer C. Tucker, 2015-07-28

This highly detailed and well illustrated single volume work documents the evolution of warfare across history through weaponry and technological change. In war the weapons and technologies employed have direct effects on how battles are waged. When new weapons are introduced they can dramatically alter the outcomes of warfare and consequently change the course of history itself. This reference work provides a fascinating overview of the major weapon systems and military technologies that have had a major impact on world history. Addressing weapons as crude as the club used by primitive man to the high tech weapons of today such as unmanned drones. *Instruments of War: Weapons and Technologies That Have Changed History* offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures. The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole. The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change. *The Naval Institute Guide to Combat Fleets of the World*, 2002

**Arms Diffusion** Thomas W. Zarzecki, 2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War. Despite the absence of an overarching superpower conflict, armaments and related technologies have continued to spread throughout the international system. This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent. This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997. *People's Liberation Army Navy* James Bussert, Bruce Elleman, 2011-07-01 Rare among books on weapon systems technologies, this work traces China's development from a coastal defense force of obsolete ships with crude weapons to its current complex missile catamarans and Aegis like destroyers with vertical launch weapons and long range cruise missiles. As the only book devoted solely to all combat systems on Chinese warships, it is a convenient one stop reference filled with tables that break down specifications and parameters into specific areas such as sensors and weapons for specific hulls. The book is divided into sections on frigates, destroyers, submarines, patrol craft, and aircraft. Antisubmarine, anti air, anti surface, and mine warfare are covered separately. For war gamers, there are tables with frequencies, load outs, and ranges. The authors prompt readers to discern areas of weakness and strength in the Chinese combat systems. **The Modernisation of the Republic of Korea Navy** Ian Bowers, 2018-08-11 This book sheds light on one of the most understudied but powerful navies in the world. Using a multifaceted approach, it examines how the Republic of Korea Navy (ROKN) has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East Asia and beyond. The project argues that peninsular and regional security dynamics, technological developments, the US-South Korea alliance, and internal politics combine to inform and shape ROKN modernisation. **Exploration and Monitoring of the Continental Shelf Underwater Environment** Iftikhar B.

Abbasov,2018-09-14 Dedicated to the unique developments of hydroacoustical equipment to monitor the sea coastal shelf environment this groundbreaking unique study presents a survey of modern methods and technical monitoring facilities including the diagnostics of underwater engineering when monitoring offshore There is still so much about the oceans that scientists do not know and exploring the continental shelves of the world is a huge part of finding out more about these underwater environments Further to that it is extremely important that while scientists and engineers explore and monitor the continental shelf no damage is done to these precious environments That is the needle that this study intends to thread giving scientists and engineers a better method and processes for exploring these underwater mysteries while protecting the environment and wildlife thriving beneath Written by a proven scientist in this area this book is dedicated to the unique developments of hydroacoustical equipment to monitor the coastal shelf The results of the original experimental sonar studies with application of the parametric antenna are presented The book presents a survey of the modern methods and technical monitoring facilities of the coastal aqueous environment The basic characteristics of the parametric antennas are given considering propagation of the acoustic waves in the environments with dispersion and acoustical absorption The author and his colleagues consider the questions of formation of the parametric antenna field in layered heterogeneous media and the peculiarities of sounding of the interfaces and bottom sediments Ecological monitoring methods of the basic parameters of quality and condition of the aqueous environment are analyzed The peculiarities of diagnostics of the underwater engineering constructions when monitoring the offshore strips are described For both veteran engineers and students in the field alike this breakthrough study is a must have for any scientific library concerned with studying the oceans and especially the continental shelf      *Knowledge-Based Intelligent Information and Engineering Systems* Bogdan Gabrys,Robert J. Howlett,2006-09-27 The three volume set LNAI 4251 LNAI 4252 and LNAI 4253 constitutes the refereed proceedings of the 10th International Conference on Knowledge Based Intelligent Information and Engineering Systems KES 2006 held in Bournemouth UK in October 2006 The 480 revised papers presented were carefully reviewed and selected from about 1400 submissions The papers present a wealth of original research results from the field of intelligent information processing      **The ABCs of Cold War History** Bruce A. Elleman,2024-12-03 A short but highly relevant history of the Cold War 1919 1994 and its significance today The 75 year Cold War pitted the Anglo American world against the Soviet Bloc with China the ultimate prize Chapter A will examine the creation of the Anglo American Special Relationship the end of World War I 1919 Versailles Peace Treaty and the lead in to World War II Chapter B will examine the Bolshevik revolution 1919 Comintern creation 1924 Soviet Bloc creation the tumultuous 1930s World War II plus Soviet competition with America and England through 1949 Chapter C will discuss a China torn between West and East finally joining the Soviet bloc in 1949 but by 1979 rejoining the West and cooperating to destroy the USSR from 1979 to 1994 when the final Russian troops left Germany In the Conclusion the Cold War s impact and strategic significance today will be discussed From 1979 to 1994 the

U S government attempted to use its relations with China to exert diplomatic economic and military pressure on the USSR Beginning in the late 1970s and continuing through the 1980s China began to import high technology equipment from the United States to fill key sensor and weapon roles With the end of the Cold War in particular the Soviet navy was eliminated almost overnight as the world s second most powerful naval force Russia s Pacific fleet is now so poorly supplied and equipped that it rarely leaves port This unprecedented reversal of fortunes has created a maritime vacuum throughout East Asia that China hopes to fill In recent years however the former Sino U S cooperation has changed as rising Chinese sponsored tensions in the South China Sea have led to many possible points of alliance between Beijing and Moscow Joint Sino Russian Naval Exercises are just one example Vladimir Putin and Xi Jinping appear to once again be combining against the Anglo American led West Will history rhyme as Mark Twain says allowing the Anglo American West to win Cold War II or will events turn out differently this time

**Poseidon** Steven R. Schwankert,2013-10-01 Royal Navy submarine HMS Poseidon sank in collision with a freighter during routine exercises in 1931 off the Chinese coast Thirty of its fifty six man crew scrambled out of the hatches as it went down Of the twenty six who remained inside eight attempted to surface using an early form of diving equipment five of them made it safely to the surface in the first escape of this kind in submarine history and became heroes The incident was then forgotten eclipsed by the greater drama that followed in World War II until news emerged that for obscure reasons the Chinese government had salvaged the wrecked submarine in 1972 This lively account of the Poseidon incident tells the story of the accident and its aftermath and of the author s own quest to discover the shipwreck and its hidden history

**All Hands** ,2000 *Choice* ,1998 **Russian civil-military relations and the origins of the second Chechen war** Sz&ászdi, Lajos F.,2008-08-29 This book has relevance for those interested in

understanding Russia's course in international relations under the leadership of Vladimir Putin. This book will inform the reader and is especially relevant in light of the events of 2008 in the Caucasus and the war in Georgia in particular. The author explains the ideology of Neo Eurasianism which in turn inspires the policy thinking of the Kremlin. Also studied is Putin's origins in the KGB from the previous posts of Secretary of the Security Council and Director of the FSB and his rise to power in the crucial year of 1999 when he became Russian Prime Minister. The author highlights the continuing trend of appointing high ranking officers of the Russian intelligence community to senior positions in the government studying this in the context of Russian civil military intelligence relations. The author reached the conclusion back in 2003 that the members of Russian intelligence hold the reins of power above the civilian and military elements of the Russian government. The author returns to the Kosovo Crisis of 1999 discussing also the motives that led the Kremlin and Putin to invade Chechnya for a second time in a decade. Parallels can be drawn to the 2008 Russian invasion of Georgia and the roots of the Neo Eurasianist ideology that is behind the two invasions are examined. This book will help the reader understand Russia's current and future distribution of power in the Caucasus, the Balkans and the world at large. Moscow's search for a multipolar world and its opposition to U.S. hegemony. **Naval Engineers Journal**, 2001. *Nautical Research Journal*, 2006. **21st Century Chinese Cyberwarfare** William Hagestad II, 2012-03-05. 21st Century Chinese Cyberwarfare draws from a combination of business, cultural, historical and linguistic sources as well as the author's personal experience to attempt to explain China to the uninitiated. The objective of the book is to present the salient information regarding the use of cyber warfare doctrine by the People's Republic of China to promote its own interests and enforce its political, military and economic will on other nation states. The threat of Chinese Cyberwarfare can no longer be ignored. It is a clear and present danger to the experienced and innocent alike and will be economically, societally and culturally changing and damaging for the nations that are targeted.
