Atlas of Maritime History Richard Natkiel, Antony Preston, 1987 Atlas of Maritime History Christopher Lloyd, 1975

Maritime History at the Crossroads Frank Broeze, 2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume's publication date of 1995. The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows: Australia, Canada, China, Denmark, Germany, Greece, Ibero America, India, the Netherlands, the Ottoman Empire, Spain, the United States, and a final chapter concerning historians and maritime labour in Britain, Australia, and New Zealand. One concern made evident by the collection is the lack of stable identity and cohesive aims within maritime history; the subject holds many conflicting definitions and concepts. The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct and define maritime historiography toward a solid position in the field of history. **A Supplement (1971-1986) to Robert G.**

Albion's Naval & Maritime History, an Annotated Bibliography, Fourth Edition Benjamin Woods Labaree, 1988 This comprehensive annotated bibliography works and Ph D theses in the English language was compiled by a pioneering maritime historian, the late Robert Albion. This volume covers titles through 1970. Later works are contained in Benjamin Labaree's Supplement. *Historical Atlas of Indonesia* Robert Cribb, 2013-02-01 This pioneering volume traces the history of the region which became Indonesia from early times to the present day in over three hundred specially drawn full colour maps with detailed accompanying text. In doing so, the Atlas brings fresh life to the fascinating and tangled history of this immense archipelago. Beginning with the geographical and ecological forces which have shaped the physical form of the archipelago, the *Historical Atlas of Indonesia* goes on to chart early human migration and the changing distribution of ethnic groups. It traces the kaleidoscopic pattern of states in early Indonesia and their gradual incorporation into the Netherlands Indies and eventually into the Republic of Indonesia. **The Weidenfeld Atlas of Maritime History** Richard

Maritime History John Carter Brown Library, Daniel Elliott, 1979 **Brown-, Green- and Blue-Water Fleets** Michael Lindberg, Daniel Todd, 2001-11-30 From riverine operations in the American Civil War and China in the 1860s to the major fleet engagements of the World Wars plus more recent naval actions in the Falklands, Malvinas War, and Gulf War, Lindberg and Todd methodically show how geography has shaped the strategy, tactics, and tools of naval warfare. Alfred T. Mahan was perhaps the first naval professional to recognize and acknowledge fully the influence of geography on navies and naval warfare. Many of his principles of seapower were inherently geographical and influenced both what kind of naval force a state would possess and how it would be utilized. In the time that has passed since Mahan made his observations, naval warfare and navies have experienced major technological changes yet geographical factors continue to exert their influence on how

navies fight how they are structured and the design of the ships that they deploy After providing a comprehensive review of geostrategic theory and its application to naval warfare the book is organized by major operational environments in which such warfare occurs the high seas littoral regions and inland waterways Lindberg and Todd illustrate how such geographical factors as distance location surface and subsurface conditions influence naval operations including fleet to fleet engagements amphibious assault coastal defense logistical support and riverine actions A separate chapter takes an in depth look at the ways in which geography influences navies themselves with issues such as primary mission type force structure development and ship design Through the use of historical case studies this volume applies long held geographical concepts to fundamental naval theories and practices to illustrate just how pervasive geography s influence has been during the past 140 years
