Royal Navy in South America, 1920-1970 Jon Wise, 2014-01-30 This book demonstrates the importance of the presence of the Royal Navy in South America Historically there have been no treaty obligations and few strategic considerations in the region yet it is frequently referred to as forming part of Britain's unofficial empire The role of the Navy in supporting foreign relations and promoting commerce is examined during a period of the twentieth century which is often associated with the decline of the British Empire The Role of the Royal Navy in South America 1920 1970 shows how the Royal Navy reacted to changing circumstances during the post war decades by adopting a more pro active attitude towards the imperative of supporting naval exports It provides a scholarly investigation of this important peacetime role for the service and offers the first book length study of the Navy's involvement in the region during this period *Book Review Digest*, 1919 **The**

Maritime Archaeology of a Modern Conflict Innes McCartney, 2014-10-24 Over the last 30 years hydrographical marine surveys in the English Channel helped uncover the potential wreck sites of German submarines or U boats sunk during the conflicts of World War I and World War II Through a series of systemic dives nautical archaeologist and historian Innes McCartney surveyed and recorded these wrecks discovering that the distribution and number of wrecks conflicted with the published histories of U boat losses Of all the U boat war losses in the Channel McCartney found that some 41% were heretofore unaccounted for in the historical literature of World War I and World War II This book reconciles these inaccuracies with the archaeological record by presenting case studies of a number of dives conducted in the English Channel Using empirical evidence this book investigates possible reasons historical inconsistencies persist and what Allied operational and intelligence based processes caused them to occur in the first place This book will be of interest to scholars and researchers in the fields of nautical archaeology and naval history as well as wreck explorers John Tyler, the
