Adaptive Co-Management Derek Armitage, Fikret

Berkes, Nancy Doubleday, 2010-10-01 In Canada and around the world governments are shifting away from regulatory models for governing natural and cultural resources New concerns with adaptive processes feedback learning and flexible partnerships are reshaping environmental governance Meanwhile ideas about collaboration and learning are converging around the idea of adaptive co management This book provides a comprehensive synthesis of the core concepts strategies and tools in this emerging field informed by a diverse group of researchers and practitioners with over two decades of experience It also offers a diverse set of case studies that reveal the challenges and implications of adaptive co management thinking and synthesizes lessons for natural and cultural resource governance in a wide range of contexts Adaptive Co

Management is not only a timely book but also a useful concept for resource governance in a world marked by rapid socio ecological change It will be of interest to researchers environmental practitioners policy makers and students in fields across the political and environmental spectrum Complexity and Creative Capacity Kelly Chapman,2015-11-06 Complexity theories gained prominence in the 1990s with a focus on self organising and complex adaptive systems Since then complexity theory has become one of the fastest growing topics in both the natural and social sciences and touted as a revolutionary way of understanding the behaviour of complex systems This book uses complexity theory to surface and challenge the deeply held cultural assumptions that shape how we think about reality and knowledge In doing so it shows how our traditional approaches to generating and applying knowledge may be paradoxically exacerbating some of the wicked environmental problems we are currently facing The author proposes an innovative and compelling argument for rejecting old constructs of knowledge transfer adaptive management and adaptive capacity The book also presents a distinctively coherent and comprehensive synthesis of cognition learning knowledge and organizing from a complexity perspective It concludes with a reconceptualization of the problem of knowledge transfer from a complexity perspective proposing the concept of creative capacity as an alternative to adaptive capacity as a measure of resilience in socio ecological systems Although written from an environmental management perspective it is relevant to the broader natural sciences and to a range of other disciplines including knowledge management organizational learning organizational management and the philosophy of science

Green Utopianism Karin Bradley,Johan Hedrén,2014-03-21 Utopian thought and experimental approaches to societal organization have been rare in the last decades of planning and politics Instead there is a widespread belief in ecological modernization that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco labeling urban densification and recycling However in the context of the current crisis in which resource depletion climate change uneven development and economic instability are seen as interlinked this belief is increasingly being questioned and alternative developmental paths sought This collection demonstrates how utopian thought can be used in a contemporary context as critique and in exploring desired futures The book includes theoretical perspectives on changing global socio environmental relationships and political struggles for alternative development paths and analyzes micro level practices in co housing alternative energy provision use of green space transportation co production of urban space peer to peer production and consumption and alternative economies It contributes research perspectives on contemporary green utopian practices and strategies combining theoretical and empirical analyses to spark discussions of possible futures *The SAGE Handbook of Environment and Society* Jules Pretty,Andy Ball,Ted Benton,Julia Guivant,David R Lee,David Orr,Max Pfeffer,Professor Hugh Ward,2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking

world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links Complex Systems, Smart Territories and Mobility Patricia Sajous,Cyrille Bertelle,2021-01-27 This book reflects the outcome of contribution by the plural community and of the interactions between disciplines With the mass of data available through Information and Communication Technologies ICT in an unprecedented quantity since the Human History it is now possible to access dimensions of knowledge that though not hidden could not be grasped in the same way in the past The question of how this information can be used for the benefit of institutional and economic actors to foster the development of a territory Tackling the issue from a resolutely interdisciplinary perspective the authors explore the theories and methods of complex systems in order to discuss how they can contribute in these new circumstances to territorial intelligence and to the development practices in which it is embodied This book illustrates how today s research explores the multiple facets of territorial systems in order to reproduce their richness It invites readers to learn about the challenges ideas results and advances present in this domain *Practices in Social Ecological Research* Andrea Rawluk,Ruth Beilin,Helena Bender,Rebecca Ford,2019-11-16 Aimed at those at the forefront of social ecological thinking this book presents a practice oriented process to navigate the complex interdisciplinary challenges of our time The book brings together insights from the social sciences and beyond to introduce readers to adaptive doing a continuous and iterative process of experiential learning that provides an accessible structure and process for integrating a range of knowledge and practices As part of the adaptive doing learning cycle the authors argue for a common platform symbolically called the agora where multiple ways of understanding can be discussed In this space participants can work from practice and narratives toward meaning knowledge

formation and practice change The book demonstrates three reframing tools for social ecological practice that provide readers with multiple ways of holistically entering the social ecological domain and expanding their perspectives with a view to changing practice Adaptive doing is presented as a catalyst for a new generation of social ecological research in which participants honour their disciplinary foundations while being ready to collaborate within each new system and each new engagement being able to act now for social ecological recognition and change

5th International Marine Conservation Congress E. Christien Michael Parsons, Edward Jeremy Hind-Ozan, Leslie Cornick, Mariana Padron, Jason Paul Landrum, 2022-03-29 *Contested Forms of Governance in Marine Protected Areas* Natalie Bown, Tim S. Gray, Selina M. Stead, 2013-01-17 In this book the authors examine the governance of marine protected areas MPA and in particular they compare two different forms of governance co management CM and adaptive co management ACM CM is characterized by the decentralization of the decision making process incorporating the governed as well as the government ACM is characterized by the dynamic process whereby co management decision making is made continuously responsive to the changing ecological and socio economic circumstances of the MPA The authors carry out a comprehensive critical analysis of CM and ACM before applying these concepts to the case study of the Cayos Cochinos Marine Protected Area off Honduras to assess two successive management cycles 2004 9 and 2008 13 The area was designated as an MPA in 1993 a governmental decision which was met with resentment by local communities CM was introduced in 2004 to involve these local stakeholders in the decision making process but achieved limited success In an attempt to deal with these deficiencies ACM was adopted in the second management plan in 2008 but whereas the position of the local communities improved it tipped the scales too far away from conservation A third management plan is currently being prepared that promises to strike a better balance between ecological and socio economic objectives A central theme of the book is to examine how far the CCMPA adhered to the principles of CM and ACM respectively in its first two management plans

Routledge Handbook of Environmental Anthropology Helen Kopnina, Eleanor Shoreman-Ouimet, 2016-08-12 Environmental Anthropology studies historic and present human environment interactions This volume illustrates the ways in which today s environmental anthropologists are constructing new paradigms for understanding the multiplicity of players pressures and ecologies in every environment and the value of cultural knowledge of landscapes This Handbook provides a comprehensive survey of contemporary topics in environmental anthropology and thorough discussions on the current state and prospective future of the field in seven key sections As the contributions to this Handbook demonstrate the subfield of environmental anthropology is responding to cultural adaptations and responses to environmental changes in multiple and complex ways As a discipline concerned primarily with human environment interaction environmental anthropologists recognize that we are now working within a pressure cooker of rapid environmental damage that is forcing behavioural and often cultural changes around the world As we see in the breadth of topics presented in this volume these environmental challenges have inspired renewed foci on

traditional topics such as food procurement ethnobiology and spiritual ecology and a broad new range of subjects such as resilience nonhuman rights architectural anthropology industrialism and education This volume enables scholars and students quick access to both established and trending environmental anthropological explorations into theory methodology and practice

Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
