**Material Koinai in the Greek Early Iron Age and Archaic Period**

Anastasia Gadolou, Søren Handberg, 2017-02-01 The ancient Greek word koine was used to describe the new common language dialect that became widespread in the ancient Greek world after the conquests of Alexander the Great. Modern scholars have increasingly used the word to conceptualise regional homogeneities in the material culture of the ancient Mediterranean. In this volume, twenty scholars from various disciplines present case studies that focus on the fundamental question of how to perceive and the social and cultural mechanisms that led to the spread and consumption of material culture in the Greek early Iron Age. Combined, the chapters provide a critical examination of the use of the koine concept as a heuristic tool in historical research and discuss to what degree similarities in material culture reflect cultural connections. The volume will be of interest to scholars interested in archaeological theory and method, the social significance of material culture, and the history of the ancient Greek world in the first half of the first millennium BC. *Lonely Planet Greece* Lonely Planet, Simon Richmond, Kate Armstrong, Stuart Butler, Peter Dragicevich, Trent Holden, Anna Kaminski, Vesna Maric, Kate Morgan, Zora O'Neill, Leonid Ragozin, Kevin Raub, Andrea Schulte-Peevers, Andy Symington, Hugh McNaughtan, Isabella Noble, Greg Ward, 2020-03-01 Lonely Planet The world's leading travel guide publisher Lonely Planet's Greece is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. Mediterranean Archaeologies of Insularity in an Age of Globalization Anna Kouremenos, Jody Michael Gordon, 2020-06-30 Recently complex interpretations of socio cultural change in the ancient Mediterranean world have emerged that challenge earlier models Influenced by today's hyper connected age scholars no longer perceive the Mediterranean as a static place where Greco Roman culture was dominant but rather see it as a dynamic and connected sea where fragmentation and uncertainty along with mobility and networking were the norm Hence a current theoretical approach to studying ancient culture has been that of globalization Certain eras of Mediterranean history e.g. the Roman empire known for their increased connectivity have thus been analyzed from a globalized perspective that examines rhizomal networking cultural diversity and multiple processes of social change Archaeology has proven a useful discipline for investigating ancient globalization because of its recent focus on how identity is expressed through material culture negotiated between both local and global influences when levels of connectivity are altered One form of identity that has been inadequately explored in relation to globalization theory is insularity Insularity or the socially recognized differences expressed by people living on islands is a form of self identification created within a particular space and time Insularity as a unique social identity affected by global forces should be viewed as an important research paradigm for archaeologies concerned with re-examining cultural change The purpose of this volume is to explore how comparative archaeologies of insularity can contribute to discourse on ancient Mediterranean globalization The volume's theme stems from a colloquium session that was chaired by the volume's co-editors at the Annual Meeting of the Archaeological Institute of America in January 2017 Given the current state of the field for globalization studies in Mediterranean archaeology this volume aims to bring together for the first time archaeologists working on different islands and a range of material culture types to examine diachronically how Mediterranean insularities changed during eras when connectivity increased such as the Late Bronze Age the era of Greek and Phoenician colonization the Classical period and during the High and Late Roman imperial eras Each chapter aims to situate a specific island or island group within the context of the globalizing forces and networks that conditioned a particular period and utilizes archaeological material to reveal how islanders shaped their insular identities or notions of insularity at the nexus of local and global influences
