Point Of View Talks On Education:

Education from a Whiteheadian Point of View Vesselin Petrov, 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead's 1861-1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead's in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity's addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development **Science Education for Gifted Learners** Keith S. Taber, 2007-04-13 Asks how science teachers can make their classes more stimulating and challenging for the most able students to encourage them to continue their science education beyond compulsory schooling **Exploring Talk in School** Neil Mercer, Steve Hodgkinson, 2008-09-23 Selected as an Outstanding Academic Title by Choice Magazine January 2010 Classroom talk by which children make sense of what their peers and teachers mean is the most important educational tool for guiding the development of understanding and for jointly constructing knowledge So what practical steps can teachers take to develop effective classroom interaction Bringing together leading international researchers and drawing on the pioneering work of Douglas Barnes this book considers ways of improving classroom talk Chapters cover classroom communication and managing social relations talk in science classrooms using critical conversations in studying literature exploratory talk and thinking skills talking to learn and learning to talk in the mathematics classroom the emerging pedagogy of the spoken word With an accessible blend of theory research and practice the book will be a valuable resource for teachers teacher trainers policy makers researchers and students **Observational Filmmaking for Education** Nigel Meager, 2019-02-21 This book places observational filmmaking in the context of the rapidly developing landscape of creativity and arts based research in education The author uses observational filmmaking as a lens to address debates surrounding video based and arts based research Utilising the work of Dewey and Deleuze as the theoretical underpinnings of the volume this is combined with numerous practical examples of observational filmmaking in

schools The author argues that observational video camera and editing techniques combine careful observation with rigorous visual analysis they place sensory affectual and aesthetic qualities in experience centre stage While observational filmmaking in itself has enormous potential as a methodology for education research it may also become a fulcrum for children s learning Children record their experiences in the world around them as they look carefully with a video camera This pioneering yet practical book will be of interest and value to students and scholars of creativity learning and education research methods as well as constituting a useful guide for teachers arts practitioners and education policy makers The Humanities, Higher Education, and Academic Freedom Michael Bérubé,J. Ruth,2015-04-30 This book is a lively passionate defence of

contemporary work in the humanities and beyond that of the university system that makes such work possible The book s stark accounts of academic labour and its proposals for reform of the tenure system are novel controversial timely and very necessary The Law School - Global Issues, Local Questions Fiona Cownie,2019-01-04 First published in 1999 this international collection of essays on legal education addresses the following issues The Law School and the University Research into legal education has often been regarded as a marginal activity as compared with research into substantive areas of law However recent years have seen a growing interest in discussions about the purpose of the university law school and the ways in which law is taught within it Are we educating professional lawyers or legal scholars What do we really mean when we say we want to offer a liberal education in the law What effect are the current changes in higher education funding and policy having on law schools and what takes place within them The international group of scholars who have contributed to this collection come from very different jurisdictions but they have written about topics which while they have local resonances are of concern globally Global Issues Local Questions addresses matters which concern all law teachers whatever their field of substantive legal expertise **The Primary Science and Technology Encyclopedia** Christopher Collier,Dan Davies,Alan Howe,Kendra McMahon,2010-12-13 The book provides clear descriptions definitions and explanations of difficult scientific concepts carefully chosen to reflect the needs of those involved in primary science education **The Changing Academic Library** John Budd,2018 Previous edition published Chicago Association of College and Research Libraries 2005

The Common Law Tradition George Liebmann,2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback The Common Law Tradition is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn s commitment to empirical research underpinned his work on the Uniform Commercial Code

Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history. Davis was an energetic comparativist in his work on administrative law. What distinguished these Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications. The group's diversity, the tolerant atmosphere in which they taught and wrote, and the attachment of its individual members to empirical approaches differentiate them from today's legal scholars and make their ideas of continuing importance.

Let's Talk About Law in Elementary School

Wanda Cassidy, Ruth Yates, 1998-01-01. Fun, easy ways to teach the law to elementary students. There is growing interest from teachers at the elementary level in addressing legal topics, concepts, and skills with their students. Let's Talk About Law in Elementary School addresses their need for relevant ideas and materials that can be integrated into the core subjects of social studies, language arts, and science. It also provides information on where to obtain other useful materials for classroom use, as well as law resources to assist them in developing their own classroom materials. The contributors are active in law-related education, either at the public school level in program administration or at the post-secondary level.

Clark Kerr, 1991-02-12. Clark Kerr, former President of the University of California and a leader in higher education policymaking, offers his views of the turbulent decades when colleges and universities scrambled to provide faculty and facilities for the burgeoning student population, only to be faced later with economic depression and subsequent conservatism. From his unique vantage point, Kerr offers insights into the role of higher education, its performance under pressure, its changing climate, its efforts to serve the multiplicity of demands made upon it, and its success or failure in meeting those demands.

Teaching Children's Literature Christine H. Leland, Mitzi Lewison, Jerome C. Harste, 2022-11-17. Now in its third edition, this indispensable text offers a critical perspective on how to integrate children's literature into the curriculum in effective, purposeful ways. Structured around three mantras that build on each other: Enjoy, Dig deeply, Take action, the book is rich with real examples of teachers implementing critical pedagogy and tools to support students' development as enthusiastic readers and thinkers. The materials and practical strategies focus on issues that impact children's lives, building from students' personal experiences and cultural knowledge by using language to question the everyday world, analyze popular culture and media, understand how power relationships are socially constructed, and consider actions that can be taken to promote social justice. Each chapter features classroom vignettes showcasing the use of literature and inviting conversation, three key principles elaborating the main theme of the chapter, and connecting theory with practice and related research on the topics and their importance for curriculum. Thoroughly revised, the third edition includes new recommendations for teaching with a critical edge and exploring alternative approaches to standardized assessment. With

more attention to culturally and linguistically diverse learners and addressing new topics such as censorship and controversial texts the new edition is essential for courses on teaching children s literature and English Language Arts methods and for every preservice elementary and middle school English teacher A companion website to enrich and extend the text includes an annotated bibliography of literature selections suggested text sets resources by chapter ideas for professional development and recommendations for further reading
