Poisons Of The Past:

Poisons of the Past Mary Allerton Kilbourne Matossian, 1989-01-01 Did food poisoning cause the Black Plague the Salem witch hunts and other significant events in human history In this pathbreaking book historian Mary Kilbourne Matossian argues that epidemics sporadic outbursts of bizarre behavior and low fertility and high death rates from the fourteenth to the eighteenth centuries may have been caused by food poisoning from microfungi in bread the staple food in Europe and America during this period A bold book with a stimulating thesis Matossian s claims for the role of food poisoning will need to be incorporated into any satisfactory account of past demographic trends John Walter Nature Matossian s work is innovative and original modest and reasoned and opens a door on our general human past that historians have not only ignored but often did not even know existed William Richardson Environmental History Review This work demonstrates an impressive variety of cross national sources Its broad sweep also reveals the importance of the history of agriculture and food and strengthens the view that the shift from the consumption of mold poisoned rye bread to the potato significantly contributed to an improvement in the mental and physical health of Europeans and Americans Naomi Rogers Journal of American History This work is a true botanical historical tour de force Rudolf Schmid Journal of the International Association of Plant Taxonomy Intriguing and lucid William K Beatty Journal of the American Medical Association *Poisons on the Inside* Rendon Noel, 2015-01-16 One of the reasons poisons keep stalking you is because there is something within you that keeps attracting it Do you find it difficult at times to understand why things keep holding you down and keep you from moving forward in your personal growth and relationships with the opposite sex In this book Rendon Noel shares his thoughts inspiration experiences and wisdom exposing the core of our issues and conditions and the relationship hurdles that we find ourselves facing and having a hard time demolishing This book will help you understand and give you the tools to take your personal relationship and growth to the next level bringing you closer to yourself spiritually mentally emotionally and physically *Clinical Memoranda on Economic Poisons* Communicable Disease Center (U.S.). Technical Development Laboratories, Savannah, 1956 **Poison Mysteries in History, Romance and Crime** Charles John Samuel Thompson, 1923 *Clinical Memoranda on Economic Poisons* Communicable Disease Center (U.S.), 1956 **Clinical Memoranda on Economic Poisons** Communicable Disease Center (U.S.). Technical Development Laboratories, United States. Public Health Service, 1956 **Poison's Dark Works in Renaissance England** Miranda Wilson, 2013-12-24 *Poison's Dark Works in Renaissance England* considers the ways sixteenth and seventeenth century fears of poisoning prompt new models for understanding the world even as the fictive qualities of poisoning frustrate attempts at certainty Whether English writers invoke literal poisons as they do in so many revenge dramas homicide cases and medical documents or whether poisoning appears more metaphorically as it does in a host of theological legal philosophical popular and literary works this particular invisible weapon easily comes to embody the darkest elements of a more general English appetite for imagining

the hidden correlations between the seen and the unseen This book is an inherently interdisciplinary project This book works from the premise that accounts of poisons and their operations in Renaissance texts are neither incidental nor purely sensational rather they do moral political and religious work which can best be assessed when we consider poisoning as part of the texture of Renaissance culture Placing little known or less studied texts medical reports legal accounts or anonymous pamphlets alongside those most familiar to scholars and the larger public such as poetry by Edmund Spenser and plays by William Shakespeare and Thomas Middleton allows us to appreciate the almost gravitational pull exerted by the notion of poison in the Renaissance Considering a variety of texts written for disparate audiences and with diverse purposes makes apparent the ways this crime functions as both a local problem to be solved and as an apt metaphor for the complications of epistemology

Poison, detection and the Victorian imagination Ian Burney, 2021-01-26 This fascinating book looks at the phenomenon of murder and poisoning in the nineteenth century Focusing on the case of William Palmer a medical doctor who in 1856 was convicted of murder by poisoning it examines how his case baffled toxicologists doctors detectives and judges The investigation commences with an overview of the practice of toxicology in the Victorian era and goes on to explore the demands imposed by legal testimony on scientific work to convict criminals In addressing Palmer's trial Burney focuses on the testimony of Alfred Swaine Taylor a leading expert on poisons and integrates the medical legal and literary evidence to make sense of the trial itself and the sinister place of poison in wider Victorian society Ian Burney has produced an exemplary work of cultural history mixing a keen understanding of the contemporary social and cultural landscape with the scientific and medical history of the period Journal Missouri State Medical Association, 1914

Poisoning is a far more serious health problem in the U S than has generally been recognized It is estimated that more than 4 million poisoning episodes occur annually with approximately 300 000 cases leading to hospitalization The field of poison prevention provides some of the most celebrated examples of successful public health interventions yet surprisingly the current poison control system is little more than a loose network of poison control centers poorly integrated into the larger spheres of public health To increase their effectiveness efforts to reduce poisoning need to be linked to a national agenda for public health promotion and injury prevention *Forging a Poison Prevention and Control System* recommends a future poison control system with a strong public health infrastructure a national system of regional poison control centers federal funding to support core poison control activities and a national poison information system to track major poisoning epidemics and possible acts of bioterrorism This framework provides a complete system that could offer the best poison prevention and patient care services to meet the needs of the nation in the 21st century
