Mason Malmuth,1999 Absolutely must reading for all serious gamblers Most people who gamble are basically attracted by the action and the excitement that this form of entertainment offers But a small number of people are quite successful at it How is this so What helps these few to make decisions that devastate their opponents And what do you need to do to become successful at this extremely challenging occupation This text attempts to answer these questions You will be introduced to the dynamic concept of non self weighting strategies and shown how these strategies apply not only at the very exciting gaming tables but in real life as well In addition risk and fluctuations are discussed in terms of the standard deviation and their relationship to each other and to your bankroll Some of the other topics addressed are bankroll requirements win rate accuracy free bets which blackjack count is best lottery fallacies dangerous ideas poker tournament strategies including when it is correct to rebuy settling up in tournaments pai gow poker super pan nine the world s greatest gamblers and building pyramids      *On Living Our Explanations* Lee Thayer,2017-02-08 People have always tried to explain whatever they want to talk about or have to deal with in their worlds To explain something to oneself or to others makes it comprehensible If the explanation becomes socially tenable it provides a person or a tribe with a perspective on their world a way of knowing it That perspective becomes their reality It is a virtual reality created by people for the use of those people Virtual realities are products of our talk and our minds which archive and channel the meaning of things First our minds get created and then our minds create us personally and collectively All human worlds that we know anything about function as they do based upon the meaning of their worlds and them in it Most of the other animals on earth dont have much to say about their pasts or their future People do because they invented the concept of the past and the concept of the future in order to think and talk about them Those who superseded us in our particular cultures invented explanations to give virtual reality to everything they wanted to talk about or do something about We live in and through those explanations as we understand them We invent our explanations on top of those we inherit and that we and our progenies will grow up living in and through This counter intuitive premise is that we do not live in any natural world We live consciously and even subconsciously in our worlds as we have explained them or could explain them Physiological or biological events certainly do occur But we deal with them

according to what they meant to us Random events like accidents do occur But we can explain them before they occur and after they occur There is nothing that occurs in our worlds that we cannot explain or justify in some way Whether or not it rains is something we do not control But to talk about it or think about it we have to do so in and through our explanations Your lover may be dumping you for his or her own a priori explanations How you deal with it depends upon how you explain it to yourself We live and we die in accordance with our explanations of our worlds and of us in them We live our explanations
