Kluczycki, 1835 Habsburg Galicia and the Romanian Kingdom Raluca Goleşteanu-Jacobs, 2023-12-01

This comparative attempt intended for postgraduates and scholars of Eastern Central Europe investigates the political economic and cultural landscape of Habsburg Galicia and the Romanian Kingdom in the second half of the 19th century. Often in historiography and in the public sphere alike the two cases under study have been separately regarded as contexts that provided atypical answers to modernity and parts of a region that has been regarded as atypical in itself. Recently efforts have been made to integrate each of the cases in a post imperial paradigm identifying the complex interactions between their socio political modernisation and historical memory. This book continues this trend by investigating for the first time the two cases together as parts of a space of alterity as labs of shifting ideologies and labels. The public figures and the institutions depicted in the book are physically located in Central and in Eastern Europe but by sometimes competing experiences they are illustrative for several identities and historical realms local regional and continental. Secondly the current work addresses dilemmas related to Nationalism and nation building for the sake of separating those discourses which reflected on civic nationalism from those which directed the public mind to the values of ethnic nationalism.
