Encyclopedia of the Environment in American Literature Geoff Hamilton, Brian Jones, 2014-01-10 This encyclopedia introduces readers to American poetry fiction and nonfiction with a focus on the environment broadly defined as humanity's natural surroundings from the discovery of America through the present The work includes biographical and literary entries on material from early explorers and colonists such as Columbus Bartolome de Las Casas and Thomas Harriot Native American creation myths canonical 18th and 19th century works of Jefferson Emerson Thoreau Whitman Hawthorne Twain Dickinson and others to more recent figures such as Jack London Ernest Hemingway Norman Mailer Stanley Cavell Rachel Carson Jon Krakauer and Al Gore It is meant to provide a synoptic appreciation of how the very concept of the environment has changed over the past five centuries offering both a general introduction to the topic and a valuable resource for high school and university courses focused on environmental issues

Ethics and Justice for the Environment Adrian Armstrong, 2012-05-31 Examining the issues of ethics and justice as they apply to the environment this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution It grew out of the US civil rights movement the liberal tradition of rights and Rawls' description of justice as fairness It is thus almost exclusively anthropocentric and does not address the question of justice for the environment By contrast environmental ethical studies are a wide ranging collection of approaches that are concerned with caring for the earth and the justifications for it but rarely consider the issue of justice Although the two movements do not come together at the theoretical level they do so at the grass roots activist level An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches particularly based on the capability ideas of justice developed by Martha Nussbaum

The History Teacher: Adventure in Estonia Fred Phillips, 2019-03-14 In this third instalment of The History Teacher

trilogy John Stevens the history teacher takes a trip to Estonia where he is drawn into an extraordinary adventure of hope and intrigue Intent on changing the course of human history an international group of do gooders gathers in this tiny Eastern European country to map out a strategy for change First though they must overcome the power structures and attitudes meant to maintain the global status quo All too often people ask what we as individuals can do to contribute to meaningful change feeling too uninformed and powerless to take direct action The History Teacher Adventure in Estonia provides simple guidance on how spiritual consciousness and divine love can overcome this dilemma It transcends country cultural racial religious and gender borders to remind us that we are all in this together sharing a common source and purpose The story also examines one of the great challenges of human evolution the steadfast and sometimes violent resistance to change Similar to the first two editions of this trilogy the protagonist receives guidance on his journey through dreams angel visits and synchronistic encounters amidst a delightfully informative blend of spirituality history and rock n roll The Great and Small Game of Europe, Western & Northern Asia and America Richard Lydekker,1901 Quest for Truth Arnold H. Boyd,17-09-05 An important and timely recipe for hope for humans and all forms of life *Palila v Hawaii* New Zealand s *Te Urewera Act* *Sierra Club v Disney* These legal phrases hardly sound like the makings of a revolution but beyond the headlines portending environmental catastrophes a movement of immense import has been building in courtrooms legislatures and communities across the globe Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales and lawmakers are ending the era of keeping these intelligent animals in captivity In Hawaii and India judges have recognized that endangered species from birds to lions have the legal right to exist Around the world more and more laws are being passed recognizing that ecosystems rivers forests mountains and more have legally

enforceable rights And if nature has rights then humans have responsibilities In The Rights of Nature noted environmental lawyer David Boyd tells this remarkable story which is at its heart one of humans as a species finally growing up Read this book and your world view will be altered forever
