On the Edge Roger McCoy,2012-07-18 With our access to Google Maps Global Positioning Systems and Atlases that cover all regions and terrains and tell us precisely how to get from one place to another we tend to forget there was ever a time when the world was unknown and uncharted a mystery waiting to be solved In *On the Edge* Roger McCoy tells the captivating and often harrowing story of the 400 year effort to map North America's Coasts Much of the book is based on the narratives of mariners who sought a passage through the continent to Asia and produced maps as a byproduct of their journeys These courageous explorers had to rely on the most rudimentary mapping tools and to contend with unimaginably harsh conditions ship crushing ice floes the threat of frostbite scurvy and starvation gold fever and mutiny ice that could lock them in for months on end and inevitably the failure to find the elusive Northwest passage Telling the story from the explorers perspective McCoy allows readers to see how maps of their voyages were made and why they were so full of errors as well as how they gradually acquired greater accuracy especially after the longitude problem was solved *On the Edge* tracks the dramatic voyages of John Cabot John Davis Captain Cook Henry Hudson Martin Frobisher John Franklin who nearly starved to death and become known in England as the man who ate his boots and others concluding with Robert Peary Otto Sverdrup and Vihjalmur Steffanson in the early twentieth century Drawing upon diaries journals and other primary sources and including a set of maps charting the progress of exploration over time *On the Edge* shows exactly how we came to know the shape of our continent

True North Bruce Henderson,2012-04-16 Nail biting true adventure Kirkus Reviews In 1909 two men laid rival claims to this crown jewel of exploration A century later the battle rages still This book is about one of the most enduring and vitriolic feuds in the history of exploration What a consummate cur he is said Robert Peary of Frederick Cook in 1911 Cook responded Peary has stooped to every crime from rape to murder They had started out as friends and shipmates with Cook a doctor accompanying Peary a civil engineer on an expedition to northern Greenland in 1891 Peary's leg was shattered in an accident and without Cook's care he might never have walked again But by the summer of 1909 all the goodwill was gone Peary said he had reached the Pole in September 1909 Cook scooped him presenting evidence that he had gotten there in 1908 Bruce Henderson makes a wonderful narrative out of the claims and counterclaims and he introduces fascinating scientific and psychological evidence to put the appalling details of polar travel in a new context
