

# The Polar Regions

The polar regions are the areas around both the North Pole, also known as the Arctic, and the South Pole, also known as Antarctica.

## The Arctic

### Location

The Arctic is located in the northernmost part of Earth and lies within the Arctic Circle (a line of latitude near the top of the Earth).

### Landscape

The Arctic is largely covered by water, the Arctic Ocean, and most of this is frozen. These frozen areas are known as sea ice. Usually, a thick blanket of snow covers the sea ice.

### Climate

- The Arctic is persistently cold with temperatures often as low as  $-34^{\circ}\text{C}$  ( $-30^{\circ}\text{F}$ ).
- In winter, it is continuously dark often with clear skies.
- In summer, there is continuous daylight and cloudy near the coasts.

### Wildlife

Animals in the Arctic have adapted to survive its harsh weather conditions. These include:

- musk oxen
- polar bears
- Arctic foxes

## Antarctica

### Location

Antarctica is a continent and is located in the southernmost part of the Earth within the Antarctic Circle. Its name means 'opposite to the Arctic'. It is surrounded by the Southern Ocean.

### Landscape

Antarctica is around 14.2 million square kilometres (5.5 million square miles) in size. Around 98% of the land is covered in thick ice.

### Climate

- Antarctica is the coldest, windiest, and driest continent on Earth.
- It experiences extreme low temperatures.
- Like the Arctic, Antarctica experiences continuous darkness in winter and continuous daylight in summer.

### Wildlife

Many species of penguin live in Antarctica including the emperor penguin. Other animals living there include:

- orcas
- leopard and elephant seals
