*Violence and Resilience in Latin American Cities* Kees Koonings, Dirk Kruijt, 2015-11-15 Why are Latin American cities amongst the most violent in the world Over the past decades Latin America has not only become the most urbanised of the regions of the so called global South it has also been the scene of the urbanisation of poverty and exclusion Overall regional homicides rates are the highest in the world a fact closely related to the spread and use of firearms by male youths who are frequently involved in local and translocal forms of organised crime In response governments and law enforcements agencies have been facing mounting pressure to address violence through repressive strategies which in turn has led to a number of consequences law enforcement is often based on excessive violence and the victimisation of entire marginal populations Thus the dynamics of violence have generated a widespread perception of insecurity and fear Featuring much original fieldwork across a broad array of case studies this cutting edge volume focuses on questions not only of crime insecurity and violence but also of Latin American cities ability to respond to these problems in creative and productive ways

*Gangs in the Caribbean* Randy Seepersad, 2013-09-17 The present volume represents the first published book on gangs in the Caribbean The study of criminal gangs is both timely and of the utmost importance to policy and security in the region In many countries across the Caribbean criminal gangs are increasing in number and prominence and official crime data indicate that they are responsible for an increasing proportion of violent crimes The Caribbean region experienced a dramatic increase in murder rates from 14.3 murders per 100 000 inhabitants in 2000 to 28.1 murders per 100 000 inhabitants in 2010 In some of

the countries with comparatively high murder rates such as Jamaica and Trinidad and Tobago the proportion of gang related murders has reached alarming levels In the case of Trinidad and Tobago for example for the period 2001 to 2012 29.5% of all murders which occurred were classified as gang related with fully 38% being so classified in 2012 The Caribbean represents a diverse region with very different cultures and security issues Foreign experiences and research on gangs may not generalize to the region nor may foreign policy be entirely relevant The present volume represents an attempt to come to terms with the phenomenon of gangs in the Caribbean and presents a wealth of empirical data as well as an analysis of the varying issues from a number of disciplinary perspectives Much of what is currently known about gangs in the Caribbean is brought together in this volume with the primary aims of understanding the varying issues and examining relevant strategies for dealing with the proliferation of criminal gangs

The Caribbean poses a significant drugs problem for the UK and the US as the recent phenomenon of yardie gangs in British cities graphically illustrates But in the islands themselves ganja crack cocaine and the policies to control them have become as this book demonstrates a veritable social disaster The authors who are among the leading local researchers and engaged professionals in the region as well as the former regional head of the UN Drugs Control Programme bring together new research investigations insightful policy analysis and practical experience of on the ground interventions putting demand reduction into practice The dimensions of the illicit drugs market in the Caribbean are made clear The origins of the problem lie in part it is argued with the impact of neoliberal economic policies that have opened up the region's borders and gravely undermined its traditional sources of employment and exports like bananas and sugar The islands in part under external US pressure have adopted a region wide policy of criminalization This has involved the creation of specialized drug courts and serious human and social consequences as a result of criminalizing traditional cultural practices around ganja consumption Fascinating light is thrown on the difficulties facing drug abuse and rehabilitation centres and the dilemmas they throw up Harm reduction as a fundamentally alternative approach to the drugs problem is also explored This is the first book to examine the experiences of Caribbean countries since they adopted a coordinated approach to the drugs problem There are valuable lessons to be learned at both policy and practical levels for other countries and in particular those like the UK and US with large Caribbean populations

the local as a site where citizenship is re defined mediated interpreted performed and given meaning While there is a dominant security discourse which focuses on state security individuals at the local level articulate their own narratives which reflect lived experiences and the particularities of socio political milieu

Mexico's Unrule of Law Niels Uildriks,2010-04-02 Mexico s crisis of security is unrelenting Why is it so hard to establish the rule of law and why does the country s justice system continue to struggle to deliver both security and adherence to democratic values and human rights To answer these questions Mexico Unrule of Law Implementing Human Rights in Police and Judicial Reform under Democratization looks at recent Mexican criminal justice reforms placing this Mexico City case study of the social and institutional realities of the evolving police and justice system within the county s long term transition from authoritarian to democratic governance In spite of the democratization on the electoral front profound distrust has continued to characterize not only the relationship between citizens and state institutions but also social inter state and intra state relations Against this background the book analyses extensive and penetrating police surveys and interviews to offer innovative ideas on how to simultaneously achieve

greater community security democratic policing and adherence to human rights      *Policing Insecurity* Niels Uildriks, 2009-04-16

Profound distrust commonly characterizes not only the relationship between citizens and state institutions but also social as well as inter and intra state relations. This impacts the effectiveness and quality of the service provided by state institutions. The degree to which police and judicial reforms are able to generate trust on these fronts is therefore an important yardstick to judge their relevance under varying circumstances of post authoritarian rule but this question is largely ignored in the current literature on policing and reform. From this perspective *Policing Insecurity: Police Reform, Security and Human Rights in Latin America* suggests an agenda of future reforms for the region drawing and building upon policing reform experiences throughout the Latin America looking at issues such as impunity, professionalization, community policing as well as accountability and training of the police. By explicitly linking issues of state social trust, democratic transition, human rights and security, these case studies provide a basis for the wider discussion in the book about prerequisites for the success or failure of police reforms thus adding to our empirical and theoretical knowledge in these areas and introducing an important dimension to the literature on police reform, security and human rights.
