The police of Paris, 1718-1789 Alan John Williams, 1976 **The Police of Paris, 1718-1789** Alan Williams, 1979

Police Detectives in History, 1750-1950 Clive Emsley, 2017-09-29 While the history of the uniformed police has prompted considerable research the historical study of police detectives has been largely neglected confined for the most part to a chapter or a brief mention in books dealing with the development of the police in general The collection redresses this imbalance Investigating themes central to the history of detection such as the inchoate distinction between criminals and detectives the professionalisation of detective work and the establishment of colonial police forces the book provides a the first detailed examination of detectives as an occupational group with a distinct occupational culture Essays discuss the complex relationship between official and private law enforcers and examine the ways in which the FBI in the U S A and the Gestapo in Nazi Germany operated as instruments of state power The dynamic interaction between the fictional and the real life image of the detective is also explored Expanding on themes and approaches introduced in recent academic research of police history the comparative studies included in this collection provide new insights into the development of both plain clothes policing and law enforcement in general illuminating the historical importance of bureaucratic and administrative changes that occurred within the state system **The Policing of Politics in the Twentieth Century** Mark

Mazower, 1997 The role of the police has from its beginnings been ambiguous even janus faced This volume focuses on one of its controversial aspects by showing how the police have been utilized in the past by regimes in Europe the USA and the British Empire to check political dissent and social unrest Ideologies such as anti Communism emerge as significant influences in both democracies and dictatorships And by shedding new light on policing continuities in twentieth century Germany and Italy as well as Interpol this volume questions the compatibility of democratic government and political policing

Disenchanted Night Wolfgang Schivelbusch, 1995-12-20 Wolfgang Schivelbusch tells the story of the development of artificial light in the nineteenth century Not simply a history of a technology *Disenchanted Night* reveals the ways that the technology of artificial illumination helped forge modern consciousness In his strikingly illustrated and lively narrative Schivelbusch discusses a range of subject including the political symbolism of streetlamps the rise of nightlife and the shopwindow and the importance of the salon in bourgeois culture **Policing the Metropolis of Scotland: A History of**

the Police and Systems of Police in Edinburgh & Edinburghshire, 1770-1833 , *Theories and Origins of the Modern Police* Clive Emsley, 2017-07-05 This volume is the first of four that will provide some of the most significant English language articles on the historical development of the police institution The articles included in this volume are broadly of two kinds The first introduce some of the theoretical outlines that have been suggested for the origins and development of modern police institutions across Europe The second explore the systems of enforcement and the criticisms of them that had emerged on the eve of the revolutionary upheavals which convulsed Europe and inflicted a terminal blow to the ancien regime at the

close of the eighteenth century *A Short History of Police and Policing* Clive Emsley, 2021-02-25 The police are constantly under scrutiny They are criticized for failings praised for successes and hailed as heroes for their sacrifices Starting from the premise that every society has norms and ways of dealing with transgressors *A Short History of Police and Policing* traces the evolution of the multiple forms of policing that existed in the past It examines the historical development of the various bodies individuals and officials who carried these out in different societies in Europe and European colonies but also with reference to countries such as ancient Egypt China and the USA By demonstrating that policing was never the exclusive dominion of the police and that the institution of the police as we know it today is a relatively recent creation Professor Emsley explores the idea and reality of policing and shows how an institution we now call the police came to be virtually universal in our modern world Theory of the Border Thomas Nail, 2016-08-02 Despite and perhaps because of increasing global mobility there are more types of borders today than ever before in history Borders of all kinds define every aspect of social life in the twenty first century From the biometric data that divides the smallest aspects of our bodies to the aerial drones that patrol the immense expanse of our domestic and international airspace we are defined by borders They can no longer simply be understood as the geographical divisions between nation states Today their form and function has become too complex too hybrid What we need now is a theory of the border that can make sense of this hybridity across multiple domains of social life Rather than viewing borders as the result or outcome of pre established social entities like states Thomas Nail reinterprets social history from the perspective of the continual and constitutive movement of the borders that organize and divide society in the first place Societies and states are the products of bordering Nail argues not the other way around Applying his original movement oriented theoretical framework kinopolitics to several major historical border regimes fences walls cells and checkpoints *Theory of the Border* pioneers a new methodology of critical limology that provides fresh tools for the analysis of contemporary border politics Police in the Age of Improvement David Barrie, 2008-05-01 The study of police history in Scotland has largely been neglected Little is known about the Scottish police s origins development and character despite growing interest in the machinery of law enforcement in other parts of the United Kingdom This book seeks to remedy this deficiency Based on extensive archival research its central aim is to provide an in depth analysis of the economic social intellectual and political factors that shaped police reform development and policy in Scottish burghs during the Age of Improvement The key issues addressed include the workings of traditional forms of law enforcement and why these were increasingly deemed to be unsuitable by the late eighteenth and early nineteenth centuries why and in what ways the pattern nature and origins of police development in urban Scotland differed from elsewhere in Britain in what ways the Scottish police model compared and contrasted with other British models the impact of police reform on urban governance and the struggle between social groups for control of the local state the concerns and priorities behind police policy In addressing these questions *Police in the Age of Improvement* moves beyond many of the problem

response interpretations which have preoccupied many police historians and locates reform within the wider contexts of urban improvement municipal administration and Scottish Enlightenment thought It will be essential reading for anyone interested in the history of policing urban management and social change in the late eighteenth and nineteenth centuries

Police Innovation and Control of the Police L. Green, David Weisburd, Craig Uchida, 2012-12-06 Police Innovation and Control of the Police Problems of Law Order and Community brings together an impressive array of scholars and analysts to examine the impact of the development of crime control strategies on problems of police corruption and abuse The text provides an historical overview of the development of legal control of the police and examines the challenges that recent innovations such as community or problem oriented policing present to the traditional historical mechanisms for maintaining control of the police Additionally a comparative perspective is featured that draws upon the experiences of the Gorbachev era in the Soviet Union as well as on the history of European law enforcement over the last century This book is instrumental for encouraging discussion and debate of police innovation and its impact on the ability of society to control the police abuse In light of the Los Angeles riots of the Spring of 1992 scholars practitioners and students of crime prevention studies criminology and psychology will find this volume timely topical and provocative **A Critical Theory of Police Power**

Mark Neocleous, 2021-01-12 The ubiquitous nature and political attraction of the concept of order has to be understood in conjunction with the idea of police Since its first publication this book has been one of the most powerful and wide ranging critiques of the police power Neocleous argues for an expanded concept of police able to account for the range of institutions through which policing takes place These institutions are concerned not just with the maintenance and reproduction of order but with its very fabrication especially the fabrication of a social order founded on wage labour By situating the police power in relation to both capital and the state and at the heart of the politics of security the book opens up into an understanding of the ways in which the state administers civil society and fabricates order through law and the ideology of crime The discretionary violence of the police on the street is thereby connected to the wider administrative powers of the state and the thud of the truncheon to the dull compulsion of economic relations Police Administration in Africa James S. E.

Opolot, 2008 In Police Administration in Africa Ejakait S E Opolot lays the foundation for future developments and trends in police administration in the former British colonies in Africa Opolot emphasizes the dynamism between theory and practice As such Police Administration in Africa establishes a model to be replicated in other parts of the Third World *Cities*

Beyond Borders Nicolas Kenny, Rebecca Madgin, 2016-05-23 Drawing on a body of research covering primarily Europe and the Americas but stretching also to Asia and Africa from the mid eighteenth century to the present this book explores the methodological and heuristic implications of studying cities in relation to one another Moving fluidly between comparative and transnational methods as well as across regional and national lines the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life the way cities are occupied and organised

on a daily basis but also the urban mindscape the way cities are imagined and represented In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries A History of Police and Masculinities, 1700-2010 David Barrie,Susan Broomhall,2012-07-26 This unique collection brings together leading international scholars to explore how ideologies about masculinities have shaped police culture policy and institutional organization from the eighteenth century to the present day It addresses an under researched area of historical inquiry providing the first in depth study of how gender ideologies have shaped law enforcement and civic governance under old and new police models tracing links continuities and changes between them The book opens up scholarly understanding of the ways in which policing reflected sustained embodied and enforced ideas of masculinities in historic and modern contexts as well as how conceptions of masculinities were and continue to be interpreted through representations of the police in various forms of print and popular culture The research covers the UK Europe Australia and America and explores police typologies in different international and institutional contexts using varied approaches sources and interpretive frameworks drawn from historical and criminological traditions This book will be essential reading for academics students and those interested in gender culture police and criminal justice history as well as police practitioners *Policing Change, Changing Police* Otwin Marenin,2018-10-24 First published in 1996 In keeping with the other volumes in the Current Issues in Criminal justice series this anthology is a prime example of joining readability and scholarship Editor Otwin Marenin has thoughtfully commissioned and compiled an excellent group of essays on the role of police in changing societies by a very knowledgeable group of scholars Moreover Marenin has added substantially to the collection through his own insightful contributions

Massacre at the Champ de Mars David Andress,2013 On 17 July 1791 the revolutionary National Guard of Paris opened fire on a crowd of protesters citizens believing themselves patriots trying to save France from the reinstatement of a traitor king To the National Guard and their political superiors the protesters were the dregs of the people brigands paid by counter revolutionary aristocrats Politicians and journalists declared the National Guard the patriots and their action a heroic defence of the fledgling Constitution Under the Jacobin Republic of 1793 however this massacre was regarded as a high crime a moment of truth in which a corrupt elite exposed its treasonable designs This detailed study of the events of July 1791 and their antecedents seeks to understand how Parisians of different classes understood patriotism and how it was that their different answers drove them to confront each other on the Champ de Mars David Andress is Professor of Modern History at the School of Social Historical and Literary Studies University of Portsmouth Undercover Police Surveillance in Comparative Perspective Cyrille Fijnaut,Gary T. Marx,2023-08-14 The United States and Europe have recently experienced a significant expansion in the use of undercover police tactics and technological means of surveillance In a democratic society such tactics raise significant questions for public policy and social research New and sophisticated forms of crime and social control and their internationalization represent an important and neglected topic Realizing this the leading scholars in this

field created a European and American working group for the comparative study of police surveillance This collaborative landmark volume reports the results of their work It is the first book ever devoted to the comparative study of the topic and includes articles on the historical development of covert policing in Europe and its spread to the United States where it was extended and recently exported back to Europe plus detailed accounts of the use of covert tactics in France Germany the Netherlands Belgium the United Kingdom Iceland Sweden Canada and the United States Audience Social scientists historians policy makers lawyers and criminal justice practitioners

Power and Politics in Old Regime France, 1720-1745 Peter Campbell, 2003-10-04 First Published in 2004 Power and Politics in Old Regime France is a major history of the politics of the first half of the reign of Louis XV It is based on exhaustive archival research and offers the first comprehensive analysis of the neglected ministries of the duc de Bourbon and the cardinal de Fleury Peter R Campbell deals first with court faction and policy A second section offers new interpretations of the crises provoked by Jansenism and the Paris parlement By contrasting the methods and practices of political management in this period of successful government with the crisis of the old regime in the 1780s he illuminates the underlying character of politics in the old regime and raises new questions about its collapse An unusually substantial bibliography represents an invaluable resource to the researcher

Non-Violence and the French Revolution Micah Alpaugh, 2015 Challenging scholarly emphasis on French Revolutionary violence this book instead examines the prevalence of peaceful democratic methods in Parisian protest
