Policies Affecting Fertility And Contraceptive Use An Assessment Of Twelve Sub Saharan Countries:

Policies Affecting Fertility and Contraceptive Use Susan Scribner, 1995 World Bank Technical Paper No 272 Public examinations in developing countries play a critical role in the selection of students for participation in the educational system. The exams dictate what is taught, how it is taught, and what is and is not learned. They are academic, have little reference to the everyday lives of the students, are limited to pencil and paper tests, and are biased toward high achievers. Thus, students who leave school at an early stage are provided with inadequate opportunities for acquiring relevant knowledge and skills. This study identifies practices associated with examinations that may create inequities for some students. These include scoring procedures, the use of culturally inappropriate questions, fee requirements, private tutoring, exams in a language unfamiliar to the student, and a variety of malpractices. Quota systems that deal with differences in performance associated with location, ethnicity, or language group membership also create inequities for some students. The report concludes that the limited available evidence does not indicate that examinations create inequities between genders, and that ranking schools on the basis of students' examination performance may not provide a fair assessment of the work of schools.

The Condition of Young Children in Sub-Saharan Africa Nat J. Colletta, Jayashree Balachander, Xiaoyan Liang, 1996-01-01. Reviews the World Bank's experience in industrial restructuring in 46 countries during the past 14 years. The study finds that for most completed public enterprise restructuring operations, sustainability of benefits was a large problem, mainly because of fragile sector reforms and inadequate governance and management. Those completed for the private sector experienced poor outcomes from inadequate attention to country economic conditions and policy distortions. To overcome such problems, the study recommends that future restructuring operations be designed and implemented to have an impact at the firm level.
