Policing the Inner City Maurice Punch, 1979-06-17

Legitimacy and Trust in Criminal Law, Policy and Justice

Nina Peršak, 2016-04-22 Whereas previous studies of legitimacy and trust have mostly dealt with procedural justice and the police this book focuses on other crucial understudied aspects of legitimacy within criminal law policy and criminal justice

The chapters expand and develop current criminological legal and socio legal research by addressing conceptions of legitimacy linked to criminal law norms criminalisation and sanctioning by examining EU legal and policy aspects of the phenomenon and by exploring some specific court related issues of legitimacy and trust hitherto neglected With contributions from across the EU this interdisciplinary collection presents a valuable discussion on the importance of trust in legal institutions of modern democracies and suggests ideas for future research in this area to challenge ways of thinking about legitimacy

International Handbook of Police Ethnography

Jenny Fleming, Sarah Charman, 2023-01-31 Ethnography has a long history in the humanities and social sciences and has provided the base line in the field of police studies for over 60 years We have recently witnessed a resurgence in ethnographic practice among police scholars and this Handbook is a response to that revival Students and academics are returning to the ethnography arena and the study of police in situ to explain the evocative worlds of the police The list of ethnographic sites is vast and all have fed the rejuvenation of ethnographic endeavour Together they suggest innovation theoretical depth broad geographical boundaries multi site experiments and multi disciplinary all of which are central to the exploration of police and policing in the twenty first century This Handbook encapsulates the revival of police ethnography by exploring its multidisciplinary field and cataloguing the ongoing ethnographic work It offers an original and international contribution to the field of police studies and research methods providing a comprehensive and overarching guide to police ethnography We see the previous classics in every page and still note the influence of the early ethnographers At the same time we see the innovative breadth and diversity of these

narratives The aim of this Handbook is to highlight the mosaic that is police ethnography at a point in time and note with pleasure its contribution to the field once more Ethnography may be messy difficult and at times uncooperative but its results offer a unique insight into the perspectives of people and organisations that can hide in plain sight An accessible and compelling read this Handbook will provide a sound and essential reference source for academics researchers students and practitioners engaged in police and criminal justice studies Cops Across Borders Ethan A. Critical Perspectives on Police Leadership Claire Davis,Marisa Silvestri,2020-03-11 In a critical analysis of conventional understanding leading authors Claire Davis and Marisa Silvestri present bold new conceptualisations of police leadership Drawing on empirical research in criminology sociology and leadership studies they present a thoughtful critique of the nature and practice of leadership in contemporary policing The book Critically explores the identities of leaders and their positions within wider organisational structures and processes Provides a critique of contemporary reform to police professionalisation training and education equalities and diversity by situating these developments within wider historical social and political contexts Draws on critical theory to offer an alternative challenging and novel interpretation of police leaders as not simply the result of individual experiences and attitudes but of the social institutional and historical processes of policing and the cultures that exist within it Points towards future directions and a reimagining of leadership in the police Accessible and stimulating this is an essential text for policing students and valuable reading for current leaders and those interested in policing criminology and leadership **The Policing Web** Jean-Paul Brodeur,2010-09-30 In this comprehensive study Jean Paul Brodeur examines the diversity of the policing web Policing agencies such as criminal investigation units intelligence services private security companies and military policing organizations are examined in addition to public uniformed police to show the extent to which policing extends far beyond the confines of public police working in uniform and visible to all The study also includes a consideration of military policing both when compatible with the values of democracy and when in opposition It also examines criminal organizations enforcing their own rules in urban zones deserted by the police and criminal individuals acting as police informants since they too are part of the policing web even though they do not qualify as legitimate policing agents or agencies The underlying argument of *The Policing Web* is that the diverse strands of the policing web are united by a common definition that emphasizes the licence granted to policing agencies to use either legally or with complete impunity means that are otherwise prohibited as crimes to the rest of the population This claim is argued for throughout the book and its paradoxical consequences investigated Although much effort is devoted to presenting a comprehensive model linking all the components of policing it is acknowledged that the policing web is by no means a neat and well integrated structure Even the belief that it will develop into a tightly coordinated system is in itself questionable Indeed the study shows that there is not just one policing web but several depending on the country police history and culture and the images of policing which shape the mind of the community These often overlooked

factors are nonetheless essential components of the context of policing and are discussed within an international framework

Drug smuggler nation Stephen Snelders, 2021-02-09 Why did the international drug regulatory regime of the twentieth century fail to stop an explosive increase in trade and consumption of illegal drugs This study investigates the histories of smugglers and criminal entrepreneurs in the Netherlands who succeeded in turning the country into the so called Colombia of Europe or the international drug supermarket Increasing state regulations and

interventions led to the proliferation of a hydra of small anarchic groups and networks ideally suited to circumvent the enforcement of regulation Networks of smugglers and suppliers of heroin cocaine cannabis XTC and other drugs were organized without a strict formal hierarchy and based on personal relations and cultural affinities rather than on institutional arrangements These networks created a thriving underground industry of illegal synthetic drug laboratories and indoor cannabis cultivation in the Netherlands itself Their operations were made possible and developed because of the deep historical social and cultural embeddedness of criminal anarchy in Dutch society Using examples from the rich history of drug smuggling Drug smuggler nation investigates the deeper and hidden grounds of the illegal drug trade and its effects on our drug policies

Interpreting Policework Roger Grimshaw, Tony Jefferson, 2023-03-31 In the 1980s there existed wide and often acrimonious disagreement over the purposes and objectives of police organizations the ways in which their activities were structured and their relations with the wider society Interpreting policework requires a rounded conception of policing based on both a thorough critique of the main theoretical trends in police sociology and close familiarity with actual patterns of policing on the streets in the stations and inside the police headquarters where key policies are formulated Originally published in 1987 the achievement of this book is that it combines rigorous theoretical analysis with a wealth of descriptive material drawn from first hand observation of policing and decision making at all levels and thus relates sociological theory to practice and political debate at the time The introduction provides a careful analysis of central theoretical and political strands in police sociology and proposes a new general conception of policework The authors go on to provide vivid illustrations of this conception from the worlds of uniformed unit beat patrols and resident beat officers and from the fora in which policy for operational practice is considered A final section draws the wider lessons of these concrete analyses for sociological theory and for our understanding of past policy shifts from one form of beatwork to another and spells out the radical implications of the study for the political debate on the future of policing Interpreting Policework thus had relevance to students and researchers in police studies sociology public policy and the law at the time and will still be of historical interest today The authors are experienced researchers practised in investigating a wide range of criminological and social control issues
