Policing An Introduction To Concepts And Practice:

Policing: An introduction to concepts and practice Alan Wright, 2012-12-06 This book provides a highly readable introduction to the role and function of the police and policing examining the issues and debates that surround this It looks at the core functions of the police the ways in which police functions have developed their key characteristics and the challenges they face From the outset questions are asked about the conceptual contestability and ambiguity of policing and different views of police roles are addressed in turn policing as social control crime investigation managing risk policing as community justice and as a public good

Human Rights and Policing Ralph Crawshaw, Stuart Cullen, Dr. Tom Williamson, 2007 This is a second thoroughly revised and expanded edition of a book that has four clear objectives to provide a concise account and analysis of international human rights and humanitarian law standards relevant to policing to set out arguments for compliance with those standards to show how they may be met in two key areas of policing interviewing suspects of crime and policing in times of armed conflict disturbance and tension and to make practical recommendations on the management of police agencies Good practice on interviewing suspects and on policing conflict is included because they are areas of policing where human rights are most at risk Good management practice is included because intelligent management by enlightened leaders is necessary to secure effective lawful and humane policing

Handbook of Policing Tim Newburn, 2008 This work covers policing in the UK reflecting the transformations that have taken place and the increasing professionalisation of one of the country's most important services It covers policing in its comparative and historical context and considers the context in which policing takes place

Handbook of Policing, Ethics and Professional Standards Allyson MacVean, Peter Spindler, 2012-12-20 Low confidence in the police and the increasing crime rates during the 1990s led to a series of government initiatives directed at changing both the structure and management of the police service In 2006 in an attempt to define what a principled police service should resemble the Home Office Minister Hazel Blears announced the development of new Code of Professional Standards for the police service informed by the Taylor Review of 2005 While there has been a growing awareness of the role of Professional Standards within law enforcement activity to date there has been little scholarly debate on the understanding of ethics and how that is applied to practical policing This book provides a single text of different perspectives on how professional standards and ethics has been conceptualised and developed into practical policing processes for the purposes of policing not only by the police but also by the partner agencies Leading academics and practitioners consider the moral minefield of policing through examinations of undercover operatives MI5 and deaths in police custody as well as looking forward to the future considerations and practices in professional conduct It will be of interest to those working within the field of policing as well as students and academics focussed on policing and criminal justice
