process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including The Art of Public Policy Analysis and with Roger D Shull Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation

International Law: Politics and Values Louis Henkin, 2023-11-27 This volume derives from a series of lectures delivered as the general course at the Hague Academy of International law in July 1989 Like those lectures this volume does not pretend to provide a complete treatise covering all international law Rather it offers a particular perspective on the principal subjects of traditional international law elaborates new developments and dares reexamine assumptions and premises The book is built on three themes The first addresses law as politics and international law as the law of a political system now comprised of more than 180 separate independent states The essential autonomy of states accounts for the political as well as economic and cultural heterogeneity in a pluralist and fragmented system and international law as its common denominator of normative expression A second theme explores change in international law as reflecting change in the values and purposes of the international political system It traces the pursuit through law of the traditional ideal of the state system to secure every state's right to realize its own agenda through its own institutions and the superimposed contemporary purpose to promote individual human rights and welfare in every society The third theme perceives a movement in the law from conceptualism to functionalism from logical deduction out of abstract principles to pragmatic attention to practical needs and solutions to new and old human problems Each of these themes dominates in several chapters but the other themes are not absent from any of them Each will add a fresh perspective and contribute to understanding the nature and operation of international law in the international political system at the turn of a new century
