Durant, 2014-10-02 *Why Public Service Matters* conveys the importance purpose and nobility of a career as a civil servant in the United States It does so however with an unflinching eye on the realpolitik that drives public administration in America's compensatory state and on the pitfalls of reformers focus on bureaucratic rather than democratic administration The book links the nation's ability to handle contemporary policy problems with the strategic tactical and normative quality of public management In doing so it offers newcomers a rare concise and accessible overview of the field Readers will gain an appreciation for the challenges choices and opportunities facing public managers as they help advance a sense of common purpose informed by democratic constitutional values in twenty first century America *The Goldwater-Nichols Act and the Joint Duty Promotion Requirement* Michael C. Veneri, 2004 Under the Goldwater Nichols Act of 1986 several changes were instituted by Congress in an effort to reform the U S military Title IV Joint Officer Management of the Act was aimed at reforming the officer development of the services in an effort to eliminate the parochial service dispositions that had previously plagued U S military efforts Title IV instituted policies to provide officers with joint education and joint experience in an effort to develop officers with a multi service or joint perspective In an effort to provide senior officers with joint experience all officers promoted to the rank of brigadier general or rear admiral 07 must have completed a joint duty assignment prior to promotion This dissertation looks specifically at the joint duty promotion requirement instituted under Title IV in an effort to analyze the U S military's ability to implement a congressional mandate The implementation of the joint duty assignment as a promotion

Even if you do not receive welfare payments directly or indirectly you benefit from government services and funding. Yet how are policies and programs actually developed? Can social policy help us create a more just society? This book offers an introduction to the theory and practice of social policy making in Australia. Using detailed case studies it covers the ideas and values which inform the social policy process, how different groups can influence policy making, how social policy making takes place in social and political organisations, the political nature of policy making. *Making Social Policy in Australia* is the most up to date introduction to Australian social policy currently available and is essential reading for students and practitioners in human and community service work and government. Tony Dalton, Mary Draper and John Wiseman, lecture in Social Work and Social Sciences at RMIT Melbourne. Wendy Weeks, lectures in Social Work and Social Policy at the University of Melbourne and is author in collaboration of *Women Working Together: Lessons from feminist women's services*. Each of the authors has been involved in policy debate and development for many years.

Building the Compensatory State Robert F. Durant, 2019-09-24 Contemporary public administration research has marginalized the importance of taking history seriously. With few exceptions, little recent scholarship in the field has looked longitudinally rather than cross-sectionally, contextually and theoretically over extended time periods at big questions in public administration. One such big question involves the evolution of American administrative reform and its link since the nation's founding to American state building. This book addresses this gap by analyzing administrative reform in unprecedented empirical and theoretical ways. In taking a multidisciplinary approach it incorporates recent developments in cognate research fields in the humanities and social sciences that have been mostly ignored in public administration. It thus challenges existing notions of the nature, scope and power of the American state and with these important aspects of today's conventional wisdom in public administration. Author Robert F. Durant explores the administrative state in a new light as part of a compensatory state driven, shaped and amplified since the nation's founding by a corporate social science nexus of interests. Arguing that this nexus of interests has contributed to citizen estrangement in the United States, he offers a broad empirical and theoretical understanding of the political economy of administrative reform, its role in state building and its often paradoxical results. Offering a reconsideration of conventional wisdom in public administration, this book is required reading for all students, scholars or practitioners of public administration, public policy and politics.

Policy Implementation in Federal and Unitary Systems - Questions of Analysis and Design K. Hanf (Ed), 1985 The power of the centre Dionyssis

Dimitrakopoulos, 2018-02-28 This book examines a hitherto under-researched aspect of the European Union's policy process: the extent and the nature of the involvement of central governments in the implementation of EU public policy. It discusses how the co-ordination of these institutions affects their capacity to shape the way in which the commitments that they make

in Brussels are turned into concrete reality at the national level It shows that the nature of their involvement in implementation reflects the pattern of their involvement in the formulation of EU policy However since implementation unfolds over long periods of time its patterns can change over time The author draws on empirical evidence regarding the liberalisation of public procurement to demonstrate how the institutions of central governments bring about change Comparing the central governments of Greece France and Britain over a twenty five year period the author demonstrates that far from being the passive conduits of pressure emanating from the EU the institutions of national central governments actively steer the implementation of EU public policy

Waste Trading among Rich Nations Kate O'Neill,2000-06-19 When most people think of hazardous waste trading they think of egregious dumping by U S and European firms on poor countries in Africa Latin America and the Caribbean But over 80 percent of the waste trade takes place between industrialized nations and is legal by domestic and international standards In *Waste Trading among Rich Nations* Kate O Neill asks why some industrialized nations voluntarily import such wastes in the absence of pressing economic need She focuses on Britain as an importer and Germany as an exporter and also looks at France Australia and Japan According to O Neill most important in determining whether an industrialized democracy imports waste are two aspects of its regulatory system The first is the structure of the regulatory process how powers and responsibilities are allocated among different agencies and levels of government and the structure of the hazardous waste disposal industry The second is what O Neill calls the style of environmental regulation in particular access to the policy process and mode of implementation Hazardous waste management is in crisis in most industrialized countries and is becoming increasingly controversial in international negotiations O Neill not only examines waste trading empirically but also develops a theoretical model of comparative regulation that can be used to establish links between domestic and international environmental politics
