Mental Health Public Policy in Global Context Timothy Philip Fadgen, 2020-09-16 This book explores the development of mental health systems in the Pacific Island Countries PICs of Samoa and Tonga through an examination of several policy transfer events from the colonial to the contemporary Beginning in the 1990s mental health became an area of global policy concern as reflected in concerted international organisation and bilateral aid and development agendas most notably those of the World Bank World Health Organization and the governments of Australia and New Zealand This book highlights how Tonga and Samoa both reformed their respective mental health systems during these years after relatively long periods of stagnation Using recent scholarship concerning public policy transfer this book explains these policy outcomes and expands it to include consideration of the historical institutional dimensions evidenced by contemporary mental health systems This book considers three distinct levels of policy implicated in mental health system transfer processes from developed to developing nations colonial authority and influence decolonisation processes and the global development agenda surrounding health systems In the process the author argues that there are in fact three levels of policy change that must be accounted for in examining contemporary policy change These policy levels include formal policy transfers which tend to be prescriptive involving professional problem construction and the designation of appropriate state apparatus for curative or custodial care provision quasi formal transfers which tend to be aspirational and involve policy instruments developed through collaborative

participatory processes and informal transfers that tend to be normative and include practices by professional actors in delivering service merged with traditional cultural beliefs as to disease aetiology as well as reflecting a deep understanding of the cultural context within which the services will be delivered This book argues that a renewed focus on the importance of public policy and government institutional capacity is necessary to ensure human rights and justice are secured **EU Policies in a Global Perspective** Gerda Falkner, Patrick Müller, 2013-11-20 Recent decades have seen a rise in the significance of governance layers beyond the nation state and even Europe Nonetheless few efforts have been made thus far to systematically examine the EU's interaction with global policy regimes This book maps the relative importance of EU policies in the multi level global governance system in comparison with national and global activities It provides a unique comparative analysis of the EU's capacity for projecting its policies outward Focusing on trade policy agriculture food safety competition social rights environmental policy transport migration nuclear non proliferation or financial regulation each chapter contributes to a better understanding of the EU's role in shaping global policies the mechanisms it uses and the conditions leading to success or failure The contributors comparative research highlights that policy export is a demanding phenomenon that faces severe limitations and frequently comes with drawbacks Still EU policy export played a key role in shaping the rules of the global trade regime and influenced global policy outcomes at least to a minor extent or in technical aspects in the majority of the covered policy areas Overall however this book reveals that the EU not only aims to export its policies but interacts with its global environment in a number of distinct ways including policy import and policy protection to shield it from global pressures Concluding with a comparison of all policies on the meta level and relevant policy recommendations this book will be of interest to students scholars and practitioners of European politics European public policy global governance and international relations **Governance, Policy and Juxtaposition** Michael Roe, 2019-10-01 This book considers governance and policy making within the maritime sector and focuses significantly on the dimensional context within which governance works Recognising the importance of understanding governance and policy at times when the world is faced with social political and economic problems it highlights the fact that both areas are equally significant in understanding today's political economy By focusing on the maritime sector a pillar industry supporting international trade activities the book offers a unique perspective to explain the difficulties of balancing policy making with governance in order to provide solutions It also examines the importance of developing a governance process that encourages and accommodates juxtaposition in a way that ensures that the effect of independent policy making is understood upon the success or otherwise of policies across a range of contexts and problems Given the in depth nature of the text it is of interest to academics researchers and professionals in the field *Emerging Practices in Intergovernmental Functional Assignment* Gabriele Ferrazzi, Rainer Rohdewohld, 2017-06-26 Attaining the benefits of especially fiscal decentralization in government remains an enduring challenge in part because the re arrangement of public functions across levels of government has often been

carried out poorly This book aims to provide a firmer conceptual basis for the re arrangement of public functions across levels of government In doing so it offers practical advice for policy makers from developing and emerging countries and development cooperation practitioners engaged in such activity Combining a theoretical approach for inter governmental functional assignment with an in depth analysis of real life country cases where functional assignment FA has been supported in the context of international development cooperation it underscores the common technical and political challenges of FA and also demonstrates the need to expect and support country made and context specific solutions to FA processes and results Examples are drawn from a number of developing transition countries from the Asia Pacific region Africa and the OECD which outline and suggest advisory approaches tools principles and good practices and approaches This text will be of key interest to scholars students policy makers and practitioners in public policy decentralization local governance studies public administration and development administration studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
