Public Program Evaluation Laura Langbein,2014-12-18 This readable and comprehensive text is designed to equip students and practitioners with the statistical skills needed to meet government standards regarding public program evaluation Even those with little statistical training will find the explanations clear with many illustrative examples case studies and applications Far more than a cookbook of statistical techniques the book begins with chapters on the overall context for successful program evaluations and carefully explains statistical methods and threats to internal and statistical validity that correspond to each evaluation design Laura Langbein then presents a variety of methods for program analysis and advise readers on how to select the mix of methods most appropriate for the issues they deal with always balancing methodology with the need for generality the size of the evaluator s budget the availability of data and the need for quick results Evaluating the Complex Kim Forss,Mita Marra,Robert Schwartz,2011-12-31 In the economic atmosphere following the crisis of 2008 not only have governments reacted by creating more complex policy initiatives but they have also promised that all of these initiatives will be evaluated Due to the complexity of many of the initiatives the ways of evaluating

are becoming equally complex The book begins with a theoretical and conceptual explanation of the process and shows how this translates into the practice of evaluation The chapters cover a wide variety of subjects such as poverty homelessness smoking prevention HIV AIDS and child labor The use of case studies sheds light on the conceptual ideas at work in organizations addressing some of the world s largest and most varied problems The evaluation process seeks a balance between order and chaos The interaction of four elements simplicity inventiveness flexibility and specificity allows complex patterns to emerge The case studies illustrate this framework and provide a number of examples of practical management of complexity in light of contingency theories of the evaluation process itself These theories in turn match the complexity of evaluated policies strategies and programs The evaluation process is examined for its impact on policy outcomes and choices
