## **Policymaking For Conservation In Latin America National Parks Reserves And The Environment:**

Policymaking for Conservation in Latin America Jack W. Hopkins, 1995-10-20 The book a study of policymaking for conservation in Latin America employs comparative analysis to explain the policy process in three countries Argentina Chile and Costa Rica Case studies and examples of important policy decisions made in the three countries are employed to help illuminate variations in the policy process from country to country The analysis is set against the constant conflict between demands for economic development and conservation Hopkins has selected important examples of policy problems in the areas of conservation national parks and environmental protection in the three countries and set these against the political system in each country for comparison The cases range from the controversial issue of Lago Chungara in Chile to Corcovado National Park in Costa Rica to the Yacyreta hydroelectric project in Argentina The study aims at beginning to fill an important gap in the literature on national parks conservation and environmental protection in Latin America As such the volume will be of interest to students of contemporary Latin America policymaking and environmental studies *Routledge Handbook of Latin America in the World* Jorge Dominguez, Ana Covarrubias, 2014-10-17 The Handbook of Latin America in the World explains how the Latin American countries have both reacted and contributed to changing international dynamics over the last 30 years It provides a comprehensive picture of Latin America s global engagement by looking at specific processes and issues that link governments and other actors social and economic within the region and beyond Leading scholars offer an up to date state of the field theoretically and empirically thus avoiding a narrow descriptive approach The Handbook includes a section on theoretical approaches that analyze Latin America s place in the international political and economic system and its foreign policy making Other sections focus on the main countries actors and issues in Latin America s international relations In so doing the book sheds light on the complexity of the international relations of selected countries and on their efforts to act multilaterally The Routledge Handbook of Latin America in the World is a must have reference for academics researchers and students in the fields of Latin American politics international relations and area specialists of all regions of the world **Latin America in Times of Global Environmental Change** Cristian Lorenzo, 2019-08-05 This volume discusses the challenges of Latin America in global environmental geopolitics Written by leading experts this book brings together Latin American research on global environmental change They cover a range of topics such as climate change water forest and biodiversity conservation connected with science policies public opinion priorities of international funds and international politics of Latin American countries The book describes the discrepancy between the international priorities and the regional needs or country interests It includes several case studies and analyses the cooperation in multilateral negotiations on climate change It also offers a synthesis of debates around global environmental changes and Latin American politics which the authors have previously promoted in different academic events in South America including in Santiago de Chile in Chile and Buenos Aires and Ushuaia in Argentina This book assesses the environmental problems

from different perspectives highlights the scientific development in the environmental changes affecting Latin America and offers a new view on geopolitics to help face those issues Specialist readers in international relations political sciences environmental sciences geography and geopolitics will appreciate this up to date examination of Latin America and the global environmental change

**Routledge Handbook of Latin American Politics** Peter Kingstone, Deborah J. Yashar, 2013-03-05 Latin America has been one of the critical areas in the study of comparative politics The region's experiments with installing and deepening democracy and promoting alternative modes of economic development have generated intriguing and enduring empirical puzzles In turn Latin America's challenges continue to spawn original and vital work on central questions in comparative politics about the origins of democracy about the relationship between state and society about the nature of citizenship about the balance between state and market The richness and diversity of the study of Latin American politics makes it hard to stay abreast of the developments in the many sub literatures of the field The Routledge Handbook of Latin American Politics offers an intellectually rigorous overview of the state of the field and a thoughtful guide to the direction of future scholarship Kingstone and Yashar bring together the leading figures in the study of Latin America to present extensive empirical coverage new original research and a cutting edge examination of the central areas of inquiry in the region

Nationalizing

Nature Frederico Freitas, 2021-03-04 Today one quarter of all the land in Latin America is set apart for nature protection In Nationalizing Nature Frederico Freitas uncovers the crucial role played by conservation in the region's territorial development by exploring how Brazil and Argentina used national parks to nationalize borderlands In the 1930s Brazil and Argentina created some of their first national parks around the massive Iguazu Falls shared by the two countries The parks were designed as tools to attract migrants from their densely populated Atlantic seaboard to a sparsely inhabited borderland In the 1970s a change in paradigm led the military regimes in Brazil and Argentina to violently evict settlers from their national parks highlighting the complicated relationship between authoritarianism and conservation in the Southern Cone By tracking almost one hundred years of national park history in Latin America's largest countries Nationalizing Nature shows how conservation policy promoted national programs of frontier development and border control

**Communities in Transition: Protected Nature and Local People in Eastern and Central Europe** Saska Petrova, 2016-05-23 The role of local people in contemporary nature conservation practices is often poorly understood or neglected This book therefore examines questions of local participation at the nature society nexus within national parks in the transitional context of Central and Eastern Europe CEE The post 1990 reconfiguration of conservation paradigms in this part of the world has reopened various age old debates about the protection and administration of natural heritage Further complicating the situation has been the introduction of market based principles which has embedded the entire process in broader dynamics of neoliberalization and the capitalist space economy Providing an integrated perspective on why how and for whom nature conservation practices have been implemented in CEE this book sheds further light upon the mechanisms through which such practices both redefine and are affected by the everyday life of people living in national parks Offering a critical global review of the environmental motivations and power interests behind the creation of national parks as well as a typology of the relations between local people and the dynamics of nature protection in them this work challenges the dichotomy between developed and developing countries that pervades much of the academic literature on nature protection Author Saska Petrova highlights the lessons that can be learnt by applying the experiences of local community participation in environmental management in CEE to other locations undergoing major systemic change in their environmental governance practices such as the low carbon transition that is currently unfolding at a global scale

**Market, State, and Society in Contemporary Latin America** William C. Smith, Laura Gómez-Mera, 2010-02-22 Market State and Society demonstrates the crucial role of differing configurations of domestic actors interests and institutions in mediating the effects of globalization on welfare regimes labor politics and popular contestation A variety of theoretical and methodological perspectives shed light on the recent transformations in relations among market state and society in Latin American countries Results are based on thorough empirical research Challenges simplistic arguments concerning state decline and describes the more complex nature of the situation

**Caribbean** Stephen N. Edwards,1999      *Capacity Building in National Environmental Policy* Helmut Weidner,Martin Jänicke,2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building see Appen dix The OECD defines environmental capacity building as a society s ability to identify and solve environmental problems While various institutions including UNEP FAO World Bank and OECD have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries we have extended the concepts to industrialized countries as well The first collection edited by Martin Janicke Helge Joergens both Free University Berlin and Helmut Weidner Social Science Research Center Berlin was pub lished in 1997 under the title National Environmental Policies A Comparative Study of Capacity Building Berlin etc Springer Verlag It included 13 studies of countries As in the first volume chapter I presents the conceptual framework underlying the national case studies It is a slightly shorter version of the corresponding chap ter in volume I The design of all case studies in the two volumes is largely con gruent with this conceptual framework Although the various sections of the stud ies do not always have identical titles and subtitles the central elements of the capacity building approach have been applied in all cases

**The International Politics of Bird Conservation** Robert Boardman,2006-01-01 This book will prove a fascinating read for researchers academics organisations and specialists in a wide range of fields including bird conservation and wildlife protection environmental law and policy global governance regionalism and transborder c      Politicized Enforcement in Argentina Matthew Amengual,2016-01-25 Countries throughout the world have passed regulations that promise protection for workers and the environment but violations of these policies are more common than compliance All too often limitations of state capacity and political will intertwine hindering enforcement Why do states enforce regulations in some places and in some industries but not in others In *Politicized Enforcement in Argentina* Amengual develops a framework for analyzing enforcement in middle income and developing countries showing how informal linkages between state officials and groups within society allow officials to gain the operational resources and political support necessary for enforcement This analysis builds on state society approaches in comparative politics but in contrast to theories that emphasize state autonomy it focuses on key differences in the way states are porous to political influence      **Comparative Study of Ecotourism Policy in the Americas, 1998** Stephen N. Edwards,1999      Environmental Justice in Latin America David V. Carruthers,2008

Scholars and activists investigate the emergence of a distinctively Latin American environmental justice movement offering analysis and case studies that illustrate the connections between popular environmental mobilization and social justice in the region      **Karst Management** Philip E. van Beynen,2011-06-21 Focusing specifically on the management of karst environments this volume draws together the world s leading karst experts to provide a vital source for the study and management of this unique physical setting Although karst landscapes cover 12% of the Earth s terrain and provide 25% of the world s drinking water the resource management of karst environments has only previously received indirect attention

Through a comprehensive approach Karst Management focuses on engineering issues associated with surface karst such as quarries dams and agriculture subsurface topics such as the management of groundwater show caves cave biota and geo archaeology projects Chapters that focus on karst as an integrated system look at IUCN World Heritage sites national parks policy and regulation measuring systematic disturbance information management and public environmental education The text incorporates the most up to date research from leading karst scientists This volume provides important perspectives for university students educators geoengineers resource managers and planners who are interested in or work with this unique physical landscape

**Comparative Environmental Politics** Paul F. Steinberg, Stacy D. VanDeveer, 2012 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems

Achieving Sustainable Development Hans T. Bressers, Walter A.

Rosenbaum, 2003-12-30 Bressers Rosenbaum and their contributors analyze what until recently has been among the least examined issues implicit in the growing global discourse about sustainable development the creation of institutions and processes for effective governance of sustainability policies The creation and endurance of governance institutions capable of implementing sustainability policies is in fact fundamental for any viable conception of sustainable development The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles in the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union The writers focus particularly upon the special problem embedded in the sustainability paradigm that of organizing governance across scales that is to say across and between geographic political ecological or other social levels in a sustainable regime In recent years the scale problem has emerged as a major and enlarging concern as international efforts proliferate to implement various sorts of sustainability policies The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles The analyses place considerable emphasis upon the history and lessons to be learned from ongoing efforts to achieve such governance in several diverse international settings including the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union

Volcano and Geothermal Tourism Patricia

Erfurt-Cooper, Malcolm Cooper, 2010-08-12 There are over 1300 active volcanoes worldwide and many more dormant or extinct Some are developed as tourist destinations others are not but have great potential Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance while a number of volcanic areas in national parks for example Teide in Spain Yellowstone in the US Vesuvius in Italy and Tongariro in New Zealand attract between one to four million tourists each year In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism The volcano based tourism sector is further

augmented through a closely linked range of geothermal resources and attractions such as geysers and hot springs which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world It is shown that volcano and geothermal tourism is a subsection of nature based geotourism and incorporates a variety of other tourism categories such as adventure tourism extreme tourism ecotourism green tourism educational tourism and hot spring tourism This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research making it an essential resource for all in the field Includes colour plates

**Parks in Peril** Katrina Brandon, Kent H. Redford, Steven Sanderson, 1998-07 Using the experience of the Parks in Peril program a wide ranging project instituted by The Nature Conservancy and its partner organizations in Latin America and the Caribbean to foster better park management this book presents a broad analysis of current trends in park management and the implications for biodiversity conservation It examines the context of current park management and challenges many commonly held views from social political and ecological perspectives The book argues that biodiversity conservation is inherently political sustainable use has limitations as a primary tool for biodiversity conservation effective park protection requires understanding the social context at varying scales of analysis actions to protect parks need a level of conceptual rigor that has been absent from recent programs built around slogans and stereotypes Nine case studies highlight the interaction of ecosystems local peoples and policy in park management and describe the context of field based conservation from the perspective of those actually implementing the programs Parks in Peril builds from the case studies and specific park level concerns to a synthesis of findings from the sites The editors draw on the case studies to challenge popular conceptions about parks and describe future directions that can ensure long term biodiversity conservation Throughout contributors argue that protected areas are extremely important for the protection of biodiversity yet such areas cannot be expected to serve as the sole means of biodiversity conservation Requiring them to carry the entire burden of conservation is a recipe for ecological and social disaster
