Plays and Players ,1997 Exercised Daniel Lieberman,2021-01-05 If exercise is healthy so good for you why do many people dislike or avoid it These engaging stories and explanations will revolutionize the way you think about exercising not to mention sitting sleeping sprinting weight lifting playing fighting walking jogging and even dancing Strikes a perfect balance of scholarship wit and enthusiasm Bill Bryson New York Times best selling author of The Body If we are born to walk and run why do most of us take it easy whenever possible Does running ruin your knees Should we do weights cardio or high intensity training Is sitting really the new smoking Can you lose weight by walking And how do we make sense of the conflicting anxiety inducing information about rest physical activity and exercise with which we are bombarded In this myth busting book Daniel Lieberman professor of human evolutionary biology at Harvard University and a pioneering researcher on the evolution of human physical activity tells the story of how we never evolved to exercise to do voluntary physical activity for the sake of health Using his own research and experiences throughout the world Lieberman recounts without jargon how and why humans evolved to walk run dig and do other necessary and rewarding physical activities while avoiding needless exertion Exercised is entertaining and enlightening but also constructive As our increasingly sedentary lifestyles have contributed to skyrocketing rates of obesity and diseases such as diabetes Lieberman audaciously argues that to become more active we need to do more than medicalize and commodify exercise Drawing on insights from evolutionary biology and anthropology Lieberman suggests how we can make exercise more enjoyable rather than shaming and blaming people for avoiding it He also tackles the question of whether you can exercise too much even as he explains why exercise can reduce our vulnerability to the diseases mostly likely to make us sick and kill us *Monographic Series* Library of Congress,

A Politic Theatre: The Drama of David Hare Scott Fraser, 2022-06-08 This analysis of twenty published texts by David Hare employs definitions from contemporary semiotic literary theory as a means of describing typologies of political drama By tracing the incorporation of stylistic devices from agitational propaganda caricature self referentiality the frisson between oral and visual signification throughout the typologies the study illustrates how each text subverts audience expectation based on established dramatic genres The collection of texts is seen as inherently self referential and politically subversive At the centre of each typology is a protagonist who functions as a martyr to or parodic emblem of contemporary society Consistently the hermeticism of public institutions which represent the political status quo makes them immune from any form of individual protest from the Left or Right In the satirical anatomy the emblem of political dissent is coopted by involvement within the institution or the stage is dominated by a conservative who controls the action In the demythology private individuals are seen as incapable of altering the public frame of history but here private suffering subverts the collective mythology of the historical construct In the martyrology the emblem of dissent is associated with a moral virtue which is inimical to contemporary society the audience's expectation of the triumph of the individual being subverted when he she is expelled from the onstage world on the grounds of political ideology It is only in the final typology the conversion that a conservative emblem is seen as directly influenced by such martyrdom and the audience is provided with an actual example of political change Thus the study describes how each typology builds on the construction of the previous and all generate from agitational propaganda
