Polish Air Force Fighter Aircraft, 1940-1942 Peter Sikora, 2024-01-18 Polish fighter pilots received their baptism of fire over their own country in September 1939 when they were overwhelmed by the aerial might of Germany and the Soviet Union Despite this they claimed over 120 enemy aircraft destroyed When the Polish Air Force was reborn in France the same men fought against the same enemy yet with more experience and with better understanding of their opponents tactics though as the author reveals the aircraft they flew were in most cases quite different Polish airmen also proved themselves during the Battle of Britain when 145 men from Poland the biggest non British contingent in Fighter Command fought for the survival one of the last bastions of democracy With an impressive tally of 126 enemy aircraft destroyed over Poland and a further fifty one in France these men including combat pilots flying instructors and test pilots had to be trained to serve under the command of the RAF They had to learn a new language that was crucial for them to be part of the Fighter Command organisation and when they finally did for every 100 men involved in fighting G ring s Luftwaffe in the air up to twenty of them were Polish During the Battle of Britain fighter pilots from Poland destroyed over 202 enemy aircraft with 303 Squadron becoming the most successful unit in the whole of Fighter Command Ten Polish fighter squadrons were eventually formed and went on to fight alongside their British Canadian Australian Belgian or Dutch brothers in arms in the RAF s offensive over northern Europe that began in earnest in 1941 In so doing the Polish fighter pilots achieved many successes against the enemy in the sky as well as on the ground though inevitably at a cost Polish Air Force Fighter Aircraft 1940 1942 tells the story that the men and machines of the Polish squadrons underwent from the Battle of France to the Dieppe Raid The latter was almost as disastrous in the air as it was on the ground though from the Polish perspective it confirmed the long developed skills of their pilots This book however is not just about the aircraft the Polish aircrew flew it also reveals how these men lived and fought in the early years of the Second World War

The Polish Air Force at War Jerzy B. Cynk, **Vichy Air Force at War** Jonathan Sutherland, Diane Canwell, 2011-01-01 At the beginning of World War II the French faced the German invasion with 4 360 modern combat aircraft and 790 new machines currently arriving from French and American factories each month When the phony war finally ended some 119 of 210 squadrons were ready for action on the north eastern front The others were reequipping or stationed in the French colonies Of the 119 squadrons France could bring into action only one fourth of the aircraft were battle ready With France overrun by June 1940 what remained of the French air force was either concentrated in the unoccupied zone or had been hastily redeployed to the

colonies Nonetheless in retaliation for the British attack on the French fleet in Oran French bombers based in French Morocco carried out retaliatory air raids over Gibraltar The Armee de l Air de Vichy was born and would fight to the best of its ability against the Free French s allies in theatres as distant as north west Africa Syria Lebanon Madagascar and the Far East Not only would they take to the skies against the British and later the Americans they would also willingly take part in aerial duels against Free French pilots Only a handful of books have been written on French aircraft but never has there been a complete history of the operations of the Vichy Air Force and its fratricidal war This title literally spans the globe examining forgotten air combats It is also important to note that many of the Vichy pilots that survived the air combats later volunteered to join the Free French and would fight with great courage and distinction alongside the very pilots that they had been trying to kill rnrnThis book describes all major theatres of combat examines the aircraft flown and lengthy appendices cover operational units victory credits and the Aeronautique Navale Dust jacket **Military Air Power in Europe**

picture of the Second World War and the terrible military technological and ethical issues that relentlessly drove all its participants into an abyss. Reviews: Magnificent must now be regarded as the standard work on the bombing war. It is probably the most important book published on the history of the second world war this century. Richard J. Evans, Guardian. Monumental: this is a major contribution to one of the most controversial aspects of the Second World War, full of new detail and perspectives, hugely impressive. James Holland, Literary Review. This tremendous book does what the war it describes signally failed to do. With a well thought out strategy and precision it delivers maximum force on its objectives. The result is a masterpiece of the historian's art. The Times. It is unlikely that a work of this scale, scope and merit will be surpassed. Times Higher Education. What distinguishes Mr Overy's account of the bombing war from lesser efforts is the wealth of narrative detail and analytical rigour that he brings to bear. Economist. Excellent. Overy is never less than an erudite and clear-eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends. Financial Times. Hard to surpass. If you want to know how bombing worked, what it did and what it meant, this is the book to read. Times Literary Supplement. About the author: Richard Overy is the author of a series of remarkable books on the Second World War and the wider disasters of the twentieth century: The Dictators, Hitler's Germany, Stalin's Russia, won both the Wolfson Prize for History and the Hessell-Tiltman Prize. He is Professor of History at the University of Exeter. Penguin publishes: 1939, Countdown to War, The Morbid Age, Russia's War, Interrogations, The Battle of Britain and The Dictators. He lives in London.
