Marco Giugni, Florence Passy, 2001 Giugni and Passy both political science U of Geneva along with contributors explore the political ramifications of solidarity movements which defy traditional explanations of political actors as fundamentally self interested Using country specific studies from France the United States Germany Great Britain and Switzerland they look at the growing internationalization of such movements the interactions between movements and states the moral vs self interest components of movements and the consequences of such movements Annotation copyrighted by Book News Inc Portland OR *Civil Society Organizations, Unemployment, and Precarity in Europe* Simone Baglioni, 2014-04-14 This book provides a Europe wide comparative analysis of the role of civil society organizations active in the field of unemployment and precarity It illustrates how crucial civil society organizations are for the inclusion of the young unemployed mainly in two ways by delivering services and by advocating policy *The Wiley Blackwell Companion to Social Movements* David A. Snow, Sarah A. Soule, Hanspeter Kriesi, Holly J. McCammon, 2023-01-04 The most up to date and thorough compendium of scholarship on social movements This second edition of *The Wiley Blackwell Companion to Social Movements* features forty original essays from the field With contributions from both established and ascendant scholars the Companion seeks to present current research on social movements in all its diversity It is the most up to date comprehensive volume of social science research on social movements available today The essays address facilitative and constraining contexts and conditions social movement organizations fields and dynamics strategies and tactics micro structural and social psychological dimensions of participation consequences and outcomes and various thematic intersections including the intersection of social movements and social class gender race and ethnicity religion human rights globalization political extremism and more Offers an illuminating guide to understanding the dynamics and operation of social movements within the modern global world Covers a diverse range of topics in the field of social movement studies Offers original state of the art essays by internationally recognized scholars *The Wiley Blackwell Companion to Social Movements* is recommended for graduate seminars on social movement and for scholars of social movements worldwide It is also an excellent text for college and university libraries especially with graduate programs in the social sciences **Global Activism** Ruth Reitan, 2012-08-21 This comprehensive study traces the transnationalization of activist networks analyzing their changing compositions and characters and examining the roles played by the World Social Forum in this process Comparing four of the largest global networks targeting the neoliberal triumvirate of the World Bank the IMF and the World Trade Organization the Jubilee anti debt campaigners Via Campesina peasant farmers Our World Is Not For Sale and the anarchistic Peoples Global Action Written by a scholar activist the book highlights that despite their diversity these collective actors follow a similar globalizing path and that networks in which solidarity is based on a shared identity perceived as threatened by neoliberal change are gaining strength Social forums are depicted as a fertile ground to strengthen networks and a common ground for

cooperative action among them but also a battleground over the future of the forum process the global anti neoliberal struggle and other possible worlds in the making Global Activism will appeal to students and scholars interested in globalization international relations IPE and social movements

The Horizontal Effect of Fundamental Rights in the European Union Eleni Frantziou, 2019-01-31 This book analyses the horizontal effect of fundamental rights in the European Union from a constitutional perspective It advances two main arguments First it argues that the horizontal effect of fundamental rights i e their application to disputes between private parties cannot be usefully discussed based on the existing EU horizontality doctrine which associates horizontality with the exercise of horizontal direct effect only That doctrine is characterised by a series of overly technical rules as to how the latter may be produced and has a case specific nature that lacks overall constitutional coherence Secondly the book argues that a substantive theory of horizontality is required in EU law and sketches its main parameters In the fundamental rights context horizontal effect has organisational implications for society which go beyond specific intersubjective disputes It is argued that its determination requires an explicit recognition of the public character of certain private platforms of will formation e g the workplace and a discussion of the role of fundamental rights therein At the same time a constitutionally adequate model of horizontality involves an acknowledgment of the supranational character of EU adjudication the determination of horizontal applicability of a fundamental right within a type of private authority relationship falls upon the Court of Justice but the precise manifestation of horizontal effect e g direct indirect or state mediated effect rests with national courts

The Fight for Ethical Fashion Philip Balsiger, 2016-03-16 From consumer boycotts and buycotts to social movement campaigns examples of individual and collective actors forging political struggles on markets are manifold The clothing market has been a privileged site for such contention with global clothing brands and retailers being targets of consumer mobilization for the past 20 years Labels and product lines now attest for the ethical quality of clothes which has in turn given rise to ethical fashion The Fight for Ethical Fashion unveils the actors and processes that have driven this market transformation through a detailed study of the Europe wide coordinated campaign on workers rights in the global textile industry the Clean Clothes Campaign Drawing on insights from qualitative fieldwork using a wide range of empirical sources Philip Balsiger traces the emergence of this campaign back to the rise of consumer campaigns and shows how tactics were adapted to market contexts in order to have retailers adopt and monitor codes of conduct By comparing the interactions between campaigners and their corporate targets in Switzerland and France two countries with a very different history of consumer mobilization for political issues this ground breaking book also reveals how one campaign can provoke contrasting reactions and forms of market change

Cross-Border Solidarities in Twenty-First Century Contexts Janet M. Conway, Pascale Dufour, Dominique Masson, 2024-04-08 Conditions for global solidarities and social movements have changed radically since their high point in the 1990s United Nations conferences This collection considers how political solidarities are being understood and

constructed in a variety of cross border struggles and for what ends under twenty first century conditions In studies grounded in different world regions at a variety of scales authors address how the Cold War divide and its aftermath have structured contemporary asymmetries in European LGBT movements and in global feminisms how colonial difference in Latin America confronts feminist and social justice movements with problems of translation across worlds how travelling concepts essential to constructing solidarities across distance and difference traverse linguistic divides and attendant power imbalances in world cities and transnational networks how rurality as a form of colonial difference challenges established categories of intersectional feminism Feminist politics of power and difference and attention to gendered agency are at the centre of this inquiry into the possibility of twenty first century solidarities across borders *Empathy Beyond US Borders* Gary Adler, 2019-05-02 Why do colleges and churches travel to help distant others and what does transnational civic engagement actually accomplish [The Third World in the Global 1960s](#) Samantha Christiansen, Zachary A. Scarlett, 2013 Decades after the massive student protest movements that consumed much of the world the 1960s remain a significant subject of scholarly inquiry While important work has been done regarding radical activism in the United States and Western Europe events in what is today known as the Global South Asia Africa and Latin America have yet to receive the attention they deserve This volume inserts the Third World into the study of the 1960s by examining the local and international articulations of youth protest in various geographical social and cultural arenas Rejecting the notion that the Third World existed on the periphery it situates the events of the 1960s in a more inclusive context building a richer more nuanced understanding of the era that better reflects the dynamism of the period *Groups, representation and democracy* Darren Halpin, 2013-07-19 Whether called pressure groups NGOs social movement organisations or organised civil society the value of groups to the policy process to economic growth to governance to political representation and to democracy has always been contested However there seems to be a contemporary resurgence in this debate largely centred on their democratising potential can groups effectively link citizens to political institutions and policy processes Are groups an antidote to emerging democratic deficits Or do groups themselves face challenges in demonstrating their legitimacy and representativeness This book debates the democratic potential and practice of groups focussing on the vibrancy of internal democracies and modes of accountability with those who join such groups and to the constituencies they advocate for It draws on literatures covering national European and global levels and presents new empirical material from the UK and Australia *Social Movements and Their Technologies* Stefania Milan, 2013-11-06 Now in paperback for the first time *Social Movements and their Technologies* explores the interplay between social movements and their liberated technologies It analyzes the rise of low power radio stations and radical internet projects emancipatory communication practices as a political subject focusing on the sociological and cultural processes at play It provides an overview of the relationship between social movements and technology and investigates what is behind the communication infrastructure that made possible the main protest events of

the past fifteen years In doing so Stefania Milan illustrates how contemporary social movements organize in order to create autonomous alternatives to communication systems and networks and how they contribute to change the way people communicate in daily life as well as try to change communication policy from the grassroots She situates these efforts in a historical context in order to show the origins of contemporary communication activism and its linkages to media reform campaigns and policy advocacy *The Oxford Handbook of Social Movements* Donatella Della Porta, Mario Diani, 2015 The Oxford Handbook of Social Movements is an innovative volume that presents a comprehensive exploration of social movement studies mapping the field and expanding it to examine the recent developments in cognate areas of studies within and beyond sociology and political science This volume brings together the most distinguished social and political scientists working in this field each writing thought provoking essays in their area of expertise and facilitates conversations between classic social movement agenda and lines of research The Oxford Handbook of Social Movements discusses core theoretical perspectives recent contributions from the field and how patterns of macro social change may affect social movements as well as suggesting what contributions social movement studies can give to other research areas in various disciplines

The Origins of Global Humanitarianism Peter Stamatov, 2013-12-23 This book locates the historical origins of modern global humanitarianism in the recurrent conflict over the ethical treatment of non Europeans **Anti-War Activism** K. Gillan, J. Pickerill, F. Webster, 2008-10-01 The first academic account of the 21st century anti war and peace movement Empirically rich and conceptually innovative Anti War Activism pays especially close attention to the changed information environment of protest the complex alliances of activists the diversity of participants as well as campaigners use of new and old media *The Rise of Modern Jewish Politics* C. S. Monaco, 2013 Contends that the starting point from which the new Jewish politics emerged was the organized joint Jewish Christian protest against anti Jewish legislation in Russia which was held in London in 1827 From this event on the British Jewish community perceived itself as the champion of the rights of Jews everywhere Traces the development of these politics from 1827 1903 dwelling on the main campaigns and Jewish diplomatic efforts during this period including the Damascus Affair of 1840 the Mortara Affair in 1858 the diplomatic struggle for the civil rights of Romanian Jews and against the pogroms there in the 1860s 70s and reactions to the pogroms in Russia in 1881 82 and the Kishinev pogrom of 1903 Gradually from the mid 19th century on American Jewry joined in the British Jewish protest campaigns and diplomatic efforts Relates the activities of some Jewish leaders e g Moses E Levy from Florida and Moses Montefiore Not all of the Jewish interventions were successful however the significance of the new Jewish politics can be measured not only by the formal successes of its campaigns From the start this new politics attracted masses of Jews in Britain and the USA and developed into broad social movements The tradition of popular movements for the defense of Jews worldwide continued during the rise of Nazism in Germany in the 1930s and during the campaign for the rights of Jews in the USSR in the 1970s , **European Solidarities** Lars Magnusson, 2007 This volume discusses

tensions between a market Europe and a social Europe between politics of serial dumping and politics of social protectionism and between Europe as a possibility and as a threat **Methods of Social Movement Research** Bert

Klandermans, Suzanne Staggenborg, 2002 Citing the critical importance of empirical work to social movement research the editors of this volume have put together the first systematic overview of the major methods used by social movement theorists Original chapters cover the range of techniques surveys formal models discourse analysis in depth interviews participant observation case studies network analysis historical methods protest event analysis macro organizational analysis and comparative politics Each chapter includes a methodological discussion examples of studies employing the method an examination of its strengths and weaknesses and practical guidelines for its application Protest Movements in Asylum and Deportation Sieglinde Rosenberger, Verena Stern, Nina Merhaut, 2018-04-18 This open access book deals with

contestation from below of legal policies and implementation practices in asylum and deportation Consequently it covers three types of mobilization solidarity protests against the deportation of refused asylum seekers refugee activism campaigning for residence rights and inclusion and restrictive protests against the reception of asylum seekers By applying both a longitudinal analysis of protest events and a series of in depth case studies in three immigration countries this edited volume provides comparative insights into these three types of movement in Austria Germany and Switzerland over a time span of twenty five years Embedded in concepts of political change limited state sovereignty and migration control the findings shed light on actors repertoires and the effects of protest activities The contributions illustrate how local contexts national political settings issue specifics and social ties lead to distinctly different forms of protest emergence dynamics and strategies Additionally they give a profound understanding of the mechanisms and constellations that contribute to protest success both in terms of preventing deportations of individuals as well as changing policies In sum this book constitutes a major contribution to empirically informed theoretical reflections on collective contestation in the fields of refugee studies and social protest movements *Mobilising against Marginalisation in Europe* Didier Chabanet, Frédéric Royall, 2009-12-14

This book brings together twelve scholars from various universities and research centres in Europe and Canada All look at developments in the collective action of marginalised and or disadvantaged people such as Gypsies migrants cleaners or unemployed people in contemporary West European societies The authors analyse how these people organise and mobilise within or across countries such as Belgium Finland France Germany Great Britain Ireland or Italy They note that although the collective actions of marginalised and or disadvantaged people are not necessarily unusual all these nationally based or cross national mobilisations have in common the fact that many of these people seek to overcome various cultural social and political obstacles act collectively and intervene in the public space The various contributors in this book observe that the mobilisations of the marginalised and or disadvantaged are often linked to new patterns and forms of social and political marginalisation and inequality The contributors analyse therefore these emerging patterns and they investigate the extent to

which marginalised and or disadvantaged people are of political significance in many of today s West European societies
