The Political Economy of Business Ethics in East Asia Ingyu Oh,Gil Sung Park,2016-09-28 The Political Economy of Business Ethics in East Asia A Historical and Comparative Perspective deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia from the periods of the fourteenth century to the modern era Authors in this volume ask how and why governments in pre modern Joseon Korea modern Korea and

modern Japan used moral persuasion of different kinds in designing national economic institutions Case studies demonstrate that the concept of modes of exchange first developed by John Lie 1992 provides a more convincing explanation on the evolution of pre modern and modern economic institutions compared with Marx s modes of production as historically specific social relations or Smith s free market as a terminal stage of human economic development The pre modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history Furthermore business ethics or corporate social responsibility is not a purely European economic ideology because manorial market entrepreneurial and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange In a similar vein the domination of the market and entrepreneurial modes in the twenty first century world is also complemented by other competing modes of change such as state welfarism public sector economies and protectionism Compares Chinese Japanese and Korean business ethics from a comparative and historical context Explores recent theoretical approaches to capitalist development in modern history in non Western regions Discusses the theoretical usefulness of new institutionalism modes of exchange and neoclassical discussions of business ethics Evaluates historical texts in their own languages in its attempt to compare Chinese Japanese and Korean business ethics in the pre modern and modern times *Industrial Policy, Innovation and Economic Growth* Poh Kam Wong, C. Y. Ng, 2001 This text provides an analysis of the development experience of the five most advanced countries in East Asia Japan Taiwan Korea Singapore and Hong Kong It reviews of the role of the state in industrial development in each of the countries in general as well as in selected industries
