African American Perspectives on Political Science Wilbur Rich, 2007-01-15 Race matters in both national and international politics. Starting from this perspective African American Perspectives on Political Science presents original essays from leading African American political scientists. Collectively they evaluate the discipline its subfields the quality of race related research and omissions in the literature. They argue that because Americans do not fully understand the many faceted issues of race in politics in their own country they find it difficult to comprehend ethnic and racial disputes in other countries as well. In addition partly because there are so few African Americans in the field political science faces a danger of unconscious insularity in methodology and outlook. Contributors argue that the discipline needs multiple perspectives to prevent it from developing blind spots. Taken as a whole these essays argue with great urgency that African American political scientists have a unique opportunity and a special responsibility to rethink the canon the norms and the directions of the discipline.

Arguing that gender issues aren't simply a special topic in politics but an indicator and symbol of the character of the political system as a whole the significance of the politics of legitimacy as played out in issues of gender and law is not only about the content of policies and competition of interests but about the power to determine the nature of the political system itself.

the Age of Early Industrialization Kenneth Pomeranz, 2017-05-15 The essays selected for this volume show how the Pacific rapidly became part of an industrializing world Its raw materials notably rubber and copper were critical some of its handicraft industries were devastated by mechanized competition others survived and adapted contributing to distinctive patterns of industrialization that made Japan a new center of power and also laid the groundwork for later growth in Taiwan Korea and coastal China The Pacific coast of the Americas was also first drawn into an industrial world largely as an exporter of raw materials but North and South diverged rapidly portending futures even more different than those of Northeast and Southeast Asia By the 1930s when the uneven effects of industrialization would have much to do with plunging the Pacific into war one can already glimpse in outline the structural bases for many of the region s contemporary characteristics All this is set in context in the important introduction by Kenneth Pomeranz

Arab Nationalism B. Tibi, ed, trans Marion Farouk-Sluglett, Peter Sluglett, 1990-06-29 In this new edition Professor Tibi analyses the impact and function of nationalism and its contribution to social and political change in the Third World taking the rise of nationalism in the Middle East as a historical example He concentrates on the period after the First World War when many Arab intellectuals became disillusioned with Britain and France as a result of the occupation of their countries Professor Tibi s careful study of the writings and influence of Sati al Husri illustrates the connection between modern Arab nationalism and nineteenth century German Romantic nationalism which will be of particular interest to the English reader Professor Tibi concludes that while nationalism has played a necessary and important role in the movement for national independence in the Middle East it has since developed into an ideology which seems to obstruct further social and political emancipation This book will be of particular interest to historians and social scientists as well as to specialists in the area itself

Technological Transformation E.F. Byrne, Joseph C. Pitt, 2012-12-06 The philosophical study of technology has acquired only recently a voice in academic conversation This situation is due in part to the fact that technology obviously impacts on the real world whereas the favored stereotype of philosophy allegedly does not Furthermore in some circles it was assumed that philosophy ought not impinge on the world This bias continues today in the form of a general dismissal of the growing area now referred to as applied philosophy By contrast the academic scrutiny of science has for the most part been accepted as legitimate for some 30 years primarily because it has been conducted in a somewhat ethereal manner This is in part because it was believed that science being pure one could think even philosophically about science without jeopardizing one s intellectual purity Since World War II however practitioners of the metascientific arts have come to acknowledge that science also shows signs of having touched down on numerous occasions in what can only be identified as the real world No longer able to keep this banal truth a secret purists have sought to defuse its import by stressing the difference between pure and applied science and lest science be tainted by contact with the world through its applications they have devoted additional energy to separating applied science somehow from technology

Dictatorship, State Planning, and Social Theory in the German Democratic Republic Peter C.

Caldwell, 2003-03-27 The introduction of state planning and party dictatorship dramatically altered the environment for social theory in the German Democratic Republic But social thought did not disappear By the mid 1950s East German social theorists discovered the basic contradictions of state socialism that would eventually lead to its collapse the inability of the plan to function without markets and its inability to permit markets the inability of the party state to guarantee the rule of law and yet also the need for a regular system of rules in a modern industrial society and the contradictory philosophical claims of a Marxist Leninist philosophy that rejected idealism and Marxist Leninist dogma with its idealistic claim to know the laws of social modernization Making use of archival sources Caldwell examines the articulation of these analyses their subsequent suppression by party authorities in the late 1950s and their return under the guise of cybernetics in the 1960s
