Berlin, Anita Fetzer, 2012 The volume considers politics as cooperative group action and takes the position that forms of government can be posited on a continuum with endpoints where governance is shared and where hegemony dictates ranging from politics as interaction to politics as imposition Similarly dialogue and dialogic action can be superimposed on the same continuum lying between truly collaborative where co participants exchange ideas in a cooperative manner and dominated by an absolute position where dialogue proceeds along prescribed paths The chapters address the continuum between these endpoints and present illuminating and persuasive analyses of dialogue in politics covering motions of support the relationship between politics and the press interviews debates discussion forums and multimodal media analyses across different discourse domains and different cultural contexts from Africa to the Middle East and from the United States to Europe **Politics and 'Politiques' in Sixteenth-Century France** Emma Claussen, 2021-06-17 During the French Wars of Religion the nature and identity of politics was the subject of passionate debate and controversy The word politique in both sixteenth century and contemporary French refers to the theory and practice of politics la politique and the statesman or politician le politique who theorised and practised this art The term became invested with significance and danger in early modern France Its mobilisation in dialogues treatises debates and polemics of the French Wars of Religion was a crucial feature of sixteenth century experiences of the political Emma Claussen investigates questions of language and power over the course of a tumultuous century when politics emerging as a discipline in its own right seemed to offer a solution to civil discord but could be fatally dangerous in the wrong hands By placing this important term in the context of early modern political doctrinal and intellectual debates Emma Claussen demonstrates how politics can be understood in relation to the wider linguistic and conceptual struggles of the age and in turn influenced them *The Politics of Dialogue* Ranabir Samaddar, 2017-07-05 Offering a detailed analysis of post colonial South Asia The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations It critiques existing knowledges and techniques which guide our

**Dialogue, Didacticism and the Genres of Dispute** Adrian J Wallbank,2015-10-06 Dialogue was a pivotal genre for the spread of Enlightenment ideas Focusing on non canonical British writers Wallbank examines the evolution of dialogue as a genre during the Romantic period Plato, Aristotle, and the Purpose of Politics Kevin M. Cherry,2012-04-30 In this book Kevin M Cherry compares the views of Plato and Aristotle about the practice study and above all the purpose of politics The first scholar to place Aristotle s Politics in sustained dialogue with Plato s Statesman Cherry argues that Aristotle rejects the view of politics advanced by Plato s Eleatic Stranger contrasting them on topics such as the proper categorization of regimes the usefulness and limitations of the rule of law and the proper understanding of phron sis The various differences between their respective political philosophies however reflect a more fundamental difference in how they view the relationship of human beings to the natural world around them Reading the Politics in light of the Statesman sheds new light on Aristotle s political theory and provides a better understanding of Aristotle s criticism of Socrates Most importantly it highlights an enduring and important question should politics have as its primary purpose the preservation of life or should it pursue the higher good of living well *Latin America-European Union relations in the twenty-first century* Arantza Gomez Arana,María J. García,2022-03-22 Latin America European Union relations in the twenty first century provides a valuable overview of transatlantic trade agreement negotiations and developments in the first decades of the twenty first century This edited collection examines key motivations behind trade agreements traces the evolution of negotiations and explores some of the initial impacts of new generation trade agreements with the EU on South American countries The book makes an important contribution to our understanding of relations between these regions by contextualising relations and trade agendas both in terms of domestic political and economic policies and broader global trends It demonstrates the importance of a shift toward mega regional trade agreements in the 2010s particularly under the Obama administration in the United States in shaping South American and European agendas for trade agreement negotiations and their outcomes Detailed case studies in the book investigate EU relations and negotiations with countries that have successfully negotiated new generation trade agreements with the EU Mercosur the Andean states Chile and Mexico Other contributions offer a wider overview of EU Latin American relations including parliamentary and civil society relations The net result is a balanced analysis of contemporary EU relations with South America useful for students and scholars of foreign policy and political economy in both regions

**Empire and the Ends of Politics** Plato,Thucydides,2012-07-01 This text brings together for the first time two complete key works from classical antiquity on the politics of Athens Plato s Menexenus and Pericles funeral oration from Thucydides history of the

Peloponnesian War      **Lobbying and Foreign Interests in Chinese Politics** Stefanie Weil, 2016-12-01 This book offers a series of original arguments on the relationships that Western interest groups have with the Chinese state. It details their lobbying strategies and the leverage it gives them in policy making in China's political system. Analysis is provided in a comparative context. The author offers inside knowledge on Western business and analyses the nature of business government relations on domestic Chinese innovation policies. Identifying and analysing the conceptual difference between Chinese and Western actors in their relationship to the state, this book demonstrates how China's existing mechanisms for monitoring activities of Chinese interest groups are ill suited to exerting a similar degree of control over Western actors.

*Multiregionalism and Multilateralism* Sebastian Bersick, W. A. L. Stokhof, Paul Velde van der, Benedikt Seemann, 2006 The sovereign power of the nation state has been steadily eroding for decades under the pressure of multilateral organizations such as the United Nations and multiregional organizations such as the European Union. The increasing prominence of non governmental organizations such as Greenpeace and Human Rights Watch in times of crisis has also contributed since the problems such groups address often extend beyond national borders and are thus difficult for national governments to manage alone. *Multiregionalism and Multilateralism* investigates these forces as they factor into political and economic relations between Asia and Europe.

**Beyond Methodological Nationalism** Anna Amelina, 2012 This volume strives to establish a new agenda for methodologies in the social sciences summarizing the most important research strategies developed in the social sciences since the early globalization and transnationalization studies of the 1980s and 1990s namely the cosmopolitan approach, the transnational lens, the scalar approach and global and multi sited ethnography. The contributions go beyond the early criticisms of methodological nationalism providing insights into new strategies and illustrating how scholars apply these research strategies in different fields such as migration research and social anthropology. Analyzing the advantages and lacunae of new research strategies helps both to outline general methodological directions and to provide helpful guides for empirical analysis.

*Eros in Plato, Rousseau, and Nietzsche* Laurence D. Cooper, 2009-02-27 Human beings are restless souls ever driven by an insistent inner force not only to have more but to be more to be infinitely more. Various philosophers have emphasized this type of ceaseless striving in their accounts of humanity as in Spinoza's notion of conatus and Hobbes's identification of a perpetual and restless desire of power after power. In this book Laurence Cooper focuses his attention on three giants of the philosophic tradition for whom this inner force was a major preoccupation and something separate from and greater than the desire for self preservation. Cooper's overarching purpose is to illuminate the nature of this source of existential longing and discontent and its implications for political life. He concentrates especially on what these thinkers share in their understanding of this psychic power and how they view it ambivalently as the root not only of ambition, vigorous virtue, patriotism and philosophy but also of tyranny, imperialism and varieties of fanaticism. But he is not neglectful of the differences among their interpretations of the phenomenon either and

especially highlights these in the concluding chapter **The Practice of Research on Migration and Mobilities** Liliana Rivera-Sánchez, Fernando Lozano-Ascencio, 2014-01-03 The migration process is interpreted in a different way when researchers live in so called societies of origin than when it is interpreted from societies of destination even when research work is multi situated The localization of researchers in this field involves numerous factors that influence the modalities for conducting research Research agendas are clearly mediated by these localizations and this book on the contemporary social sciences points out those mediations breaking with the dichotomous readings that are implicit in this migration process origin destination north south and cause effect to mention just a few In the individual chapters priority is given to presenting the modalities through which research is conducted in multidisciplinary or interdisciplinary teams on the American Continent In summary the focus of this book is on the narrative of methodological experience of the Practice of Research on Migration and Mobilities
