Political Communication

INTRODUCTION

Political communication relates to the communication of knowledge, values and attitudes. The processes of socialization, participation and recruitment are dependant upon it as the political activity of the individual is determined by the process of political communication. In the words of Althoff and Rush, "Political communication is the transmission of politically relevant information from one part of the political system to another and between the social and the political system". According to Karl W. Deutsch, "it is the dynamic element of a political system".

The study of political communication has acquired growing importance in recent years. The effectiveness of the different political systems is examined through a comparative analysis of the performance of political communication. "Communication performance can hinder or enhance the development of other kinds of system activity. Thus, underlying interest articulation is the opportunity for individuals to exchange thoughts freely which greatly enhances the likelihood of their forming groups and making demands upon the political system. Information obtained from newspapers or television about conditions in the political system or about actions of political leaders may determine the types of support rendered and demands initiated".

COMMUNICATION STRUCTURES

- informal face to face contacts,
- traditional social structures relating to family or religious group relationship,
- political output structures such as interest groups, pressure groups, trade unions and political parties,

Perrin, 2014-04-10 In this groundbreaking book sociologist Andrew Perrin shows that rules and institutions while important are not the core of democracy Instead as Alexis de Tocqueville showed in the early years of the American republic democracy is first and foremost a matter of culture the shared ideas practices and technologies that help individuals combine into publics and achieve representation Reinterpreting democracy as culture reveals the ways the media public opinion polling and changing technologies shape democracy and citizenship As Perrin shows the founders of the United States produced a social cultural and legal environment fertile for democratic development and in the two centuries since citizens and publics use that environment and shared culture to re imagine and extend that democracy American Democracy provides a fresh innovative approach to democracy that will change the way readers understand their roles as citizens and participants Never will you enter a voting booth or answer a poll again without realizing what a truly social act it is This will be necessary reading for scholars students and the public seeking to understand the challenges and opportunities for democratic citizenship from Toqueville to town halls to Twitter
