Political Learning In Adulthood A Sourcebook Of Theory And Research:

Political Learning in Adulthood Roberta S. Sigel, 1989 In the wake of World War II the issues of political stability in general and the survival of stable democracies in particular captured the attention of American political scientists An inevitable offshoot of this interest was the study of political behavior how it is acquired and how and why it persists In its early stages work on political socialization focused exclusively on childhood and adolescence as if the learning process ends when adulthood begins Only recently has adult socialization emerged as a legitimate field of study within political science In *Political Learning in Adulthood* social scientists for the first time examine the changes in political outlook and behavior that take place during the adult years providing an invaluable overview of the problems theories and methodological approaches that characterize the field of political socialization They consider which political values remain constant and which are subject to change and they explore the ways in which both ordinary and extraordinary life events affect adults political worldviews Among specific topics considered are the effects of age and aging the relation between participation in the work force and the development and expression of political views continuity and change in the wake of revolutionary social and political movements and the effects of such traumatic and life threatening situations as war and terrorist activity

Jacobson,2019-02-06 How is Donald Trump s presidency likely to affect the reputation and popular standing of the Republican Party Profoundly according to Gary C Jacobson From Harry S Truman to Barack Obama every postwar president has powerfully shaped Americans feelings positive or negative about their party The effect is pervasive influencing the parties reputations for competence their perceived principles and their appeal as objects of personal identification It is also enduring as presidents successes and failures continue to influence how we see their parties well beyond their time in office With Presidents and Parties in the Public Mind Gary C Jacobson draws on survey data from the past seven administrations to show that the expansion of the executive branch in the twentieth century that gave presidents a greater role in national government also gave them an enlarged public presence magnifying their role as the parties public voice and face As American politics has become increasingly nationalized and president centered over the past few decades the president s responsibility for the party s image and status has continued to increase dramatically Jacobson concludes by looking at the most recent presidents effects on our growing partisan polarization analyzing Obama s contribution to this process and speculating about Trump s potential for amplifying the widening demographic and cultural divide **Social Structures,**

Political Engagement of the Young in Europe Peter Thijssen, Jessy Siongers, Jeroen Van Laer, Jacques Haers, Sara Mels, 2015-12-14 Although many scholars are convinced of the apparent civic disengagement of youth others suggest that civic participation of young people is stable and increasingly expressed through non institutionalized forms of practicing politics This book makes a key contribution to this discussion by asking whether the decline or shift paradigm is sufficient in understanding political participation of the youth It argues that we need to move beyond this framework and develop a renewed reflection on the meaning of civic and political engagement It asks crucial questions such as How can the young be educated into assuming civic and political responsibility Why and how do young people engage in social and political action How do the principal mediating institutions education media and the family contribute to new or different forms of youth civic engagement This text contains contributions from acknowledged specialists such as Constance Flanagan Mark Elchardus Marc Hooghe and Bert Klandermans and will be of key interest to students and scholars of youth and young citizens civic political involvement European politics youth studies sociology political participation and electoral behaviour

Peacebuilding and Ex-Combatants Johanna Söderström, 2014-12-17 The book examines how ex combatants in post war and peacebuilding settings engage in politics as seen in the case of Liberia The political mobilization of former combatants after war is often perceived as a threat ultimately undermining the security and stability of the state This book questions this simplified view and argues that understanding the political voice of former combatants is imperative Their post war role is not black and white they are not just bad or good citizens but rather engage in multiple political roles spoilers victims disengaged beneficiaries as well as motivated and active citizens By looking at the political attitudes and values of

former combatants and their understanding of how politics functions the book sheds new light on the political reintegration of ex combatants It argues that political reintegration needs to be given serious attention at the micro level but also needs to be scrutinized in two ways first through the level of political involvement which reflects the extent and width of the ex combatants voice Second in order to make sense of political reintegration we also need to uncover what values and norms inform their political involvement The content of their political voice is captured through a comparison with democratic ideals Based on interviews with over 100 Liberian ex combatants the book highlights that their relationship with politics overall should be characterized as an expression of a politics of affection This book will be of much interest to students of peacebuilding African politics democratization political sociology conflict resolution and IR Security Studies in general
