Political Systems and the Distribution of Power Michael Banton, 2012-11-12 Modern political anthropology began in 1940 with the first systematic comparative studies of how primitive societies maintained law and order The focus was on government and the presence or absence of state institutions Recently interest has shifted to the study of power to examining the manipulation of political relations and to the task of elaborating a classification of governmental systems that will throw light on the important problems for research First published in 1965 *World Political Systems after Polarity* Nerses Kopalyan, 2017-06-14 What will the current global political order look like when American unipolarity ends Historically the power configurations of world political systems have been defined by four structures multipolarity tripolarity bipolarity and unipolarity These concepts inform both the formulation and the analysis of short term policies and long term grand strategies of powerful actors in the world political order and may be of profound importance to the future peace and stability of the global system The concept of nonpolarity however has never been addressed as a possible or a potential structural formulation in the nomenclature of global political systems This book provides a coherent conceptualization of nonpolarity and how diplomacy will operate in a more collective age and fits into the ongoing discussion about the nature of the political world order as we approach the end of the American century **Measurement and Analysis of Political Systems**
