Politics Of Childrens Survival

G. Kent

Politics Of Childrens Survival:

The Politics of Children's Survival George Kent, 1991 The central concern of this pioneering study is the high rate of child mortality worldwide and the prospects for its reduction Taking as his major focus socioeconomic factors and their effect on children s survival George Kent asks not only what technical interventions might be undertaken within meager health budgets but also why are those budgets so inadequate He examines the social and political roots of child mortality around the world and finds that the problem arises from widespread powerlessness in the populations of less developed countries Thus he argues remedies should center on strategies of empowerment designed in such a way that their benefits persist long after the intervention has ended Following an introductory chapter which describes overall patterns of children s mortality the author examines the individual and household factors which contribute to the problem and the programmatic responses associated with these factors Subsequent chapters explore child survival in relation to larger societal issues discussing in turn food poverty war repression and population as they affect child mortality Kent then turns his attention to strategies for child survival that are sensitive to these social factors Separate chapters address alternative designs of social systems the idea of viewing children as a form of human capital the problem of motivating the politically powerful to support child survival work rethinking the meaning of national development and the challenge of planning for children s survival in concrete site specific situations Finally Kent discusses the potential of national and international law and institutions for improving children s prospects An ideal supplemental text for courses in economic development and political economy this book is also essential reading for policymakers and relief organization managers concerned with the widespread problem of child mortality

The Politics of Child Support in America Jocelyn Elise Crowley, 2003-08-25 Political observers have long since struggled with understanding how new ideas are placed on the public agenda In their studies most social scientists have relied on biographical sketches and intensive case studies to explore the intricacies of innovation Researchers have had much more difficulty however in moving from these individual success stories to more generalizable theories of entrepreneurship This book builds such a theory by focusing on the critical issue of child support enforcement in the United States Covering over a 100 year period this book tracks the evolution of multiple sets of political entrepreneurs as they grapple with the child support problem charity workers with local law enforcement in the nineteenth century social workers throughout the 1960s conservatives during the 1970s women s groups and women legislators in the 1980s and fathers rights groups in the 1990s and beyond

Children in the International Political Economy G. Kent, 1995-09-13 The first line of responsibility for children lies with their parents but what if the parents fail to look after their children Who else is involved and what should they do Children in the International Political Economy examines the moral responsibilities of different individuals and agencies towards children and argues that some responsibilities should be codified as concrete legal duties If all else fails children must look to the international community for help Thus international agencies should recognize specific

obligations to look after the well being of children around the world **The Politics of Child Protection** Nigel Parton, 2014-03-24 From Every Child Matters and the Munro Review to changing shifts in thinking from Coalition government the child protection system has seen dramatic political and policy developments over recent years This book brings you a critical analysis of these developments from a leading writer and commentator It begins by exploring the origins of present day arrangements locating English policy and practice in both a wider British and international context It examines tragic cases such as Baby P and Maria Colwell considering their impact on public and professional attitudes and in turn the implications for the child protection system Looking to the future of child protection Nigel Parton considers the current state of the system and argues that we need to address wider social and political issues including poverty class and inequality Original authoritative and up to date *The Politics of Child Protection* is an important book for all students practitioners and researchers interested in safeguarding and child protection *The Politics of International Health* William Muraskin, 1998-10-07 Tracing the history of the Children s Vaccine Initiative CVI this book examines its successes and failures in promoting the development of both new and improved vaccines for the Third World The CVI has achieved many successes including making vaccination a top international public sector priority Most of its failures have stemmed from the often bitter competition between the fledgling Initiative and the notoriously turf conscious and inefficient World Health Organization WHO over their respective roles in championing vaccines Vaccines are the most inexpensive means of improving the health and lowering the mortality of people in the Third World where infectious diseases kill millions of children every year As a result of the biotechnology revolution it is possible that a whole array of new vaccines can be created for diseases which are not yet preventable What has stood in the way of this major medical breakthrough has been that vaccine product development has been in the hands of commercial companies whose activities are dominated by the need for maximizing profit which the Third World poor cannot generate **The Domestic Politics of Foreign Aid** Erik Lundsgaarde, 2013 This book explains the choices that states make concerning the volume of development aid they provide and what types of priorities are supported with this assistance The core argument of the book is that aid choices are a product of domestic politics in donor countries which involve a variety of actors that differ in character across the donor community *Handbook of Politics* Kevin T. Leicht, J. Craig Jenkins, 2009-11-28 Political sociology is the interdisciplinary study of power and the intersection of personality society and politics The field also examines how the political process is affected by major social trends as well as exploring how social policies are altered by various social forces Political sociologists increasingly use a wide variety of relatively new quantitative and qualitative methodologies and incorporate theories and research from other social science cognate disciplines The contributors focus on the current controversies and disagreements surrounding the use of different methodologies for the study of politics and society and discussions of specific applications found in the widely scattered literature where substantive research in the field is published This approach will

solidly place the handbook in a market niche that is not occupied by the current volumes while also covering many of the same theoretical and historical developments that the other volumes cover The purpose of this handbook is to summarize state of the art theory research and methods used in the study of politics and society This area of research encompasses a wide variety of perspectives and methods that span social science disciplines The handbook is designed to reflect that diversity in content method and focus In addition it will cover developments in the developed and underdeveloped worlds

Population, Gender and Politics

Roger Jeffery, Patricia Jeffery, 1997-07-13 Roger and Patricia Jeffery are well known for their work on religion and gender in South Asia In their latest book a study of the demographic processes of two castes in rural north India they ask why fertility levels are higher among the Muslim Sheikhs than the Hindu Jats They conclude that explanations can only partially be attributed to gender relationships and religion and it is the economic and political interests of both groups which are the defining factors Their marginal economic position provides little incentive for the Sheikhs to raise small families while the Jats who are locally dominant are encouraged to use birth control and educate their children The authors go on to demonstrate the significance of this analysis for a wider understanding of the problems of population and politics in India generally The book will be invaluable for students of South Asia and for anyone interested in the demography of developing countries

International Conference on Political Economy of Water Purnima George, Elvis Thomas, Meghna Vesvikar, 2016-05-11 Access to water is a fundamental right of all human beings given that it significantly affects quality of life and enables people especially the poor to live with dignity A significant number of organisations and governments throughout the world are working on this challenge and developing sustainable intervention models There are several community driven approaches which attempt to bring water within the reach of people and to help establish people's ownership and rights over it The social work profession with its commitment to working with the marginalised and the underprivileged cannot be immune to the challenges posed by the scarcity of water and must inevitably join the various efforts made the world over to tackle this problem head on This book examines specific nuances of water scarcity and develops viable social work intervention strategies based on the experiences of successful intervention models

The Political Life of Children Robert Coles, 1986 Robert Coles one of the most eminent child psychiatrists in the world spent over a decade researching this book and its companion volume *The Moral Life of Children* Coles visits children all over the world listening with willing ears and he captures their thoughts and feelings with remarkable sympathy As Coles demonstrates in this fascinating work children learn much more than we think they do about political issues While we have always taken it for granted that parents teach their children about language religion and morality Coles shows how mothers and fathers also instill a strong understanding of political life in their offspring
