Kress, Derrick Z. Jackson, 2015-04-28 Project Puffin is the inspiring story of how a beloved seabird was restored to long abandoned nesting colonies off the Maine coast As a young ornithology instructor at the Hog Island Audubon Camp Dr Stephen W Kress learned that puffins had nested on nearby islands until extirpated by hunters in the late 1800s To right this environmental wrong he resolved to bring puffins back to

one such island Eastern Egg Rock Yet bringing the plan to reality meant convincing skeptics finding resources and inventing restoration methods at a time when many believed in letting nature take its course Today Project Puffin has restored more than 1 000 puffin pairs to three Maine islands But even more exciting techniques developed during the project have helped to restore rare and endangered seabirds worldwide Further reestablished puffins now serve as a window into the effects of climate change The success of Dr Kress s project offers hope that people can restore lost wildlife populations and the habitats that support them The need for such inspiration has never been greater
