Reallife Problem Solving A Collaborative Approach To Interdisciplinary Learning:

Real-life Problem Solving Beau Fly Jones, 2009 This book is organized in terms of goals rather than chapters In goal 1 we present various strands of research as well as different models of PBL problem based learning that address why interdisciplinary problem based learning approaches are important In Goal 2 we look at what our model is by examining the features of PBL CD Problem Based Learning as Codevelopment Goal 3 describes our model in more depth focusing on the codevelopment process how teacher teams codevelop PBL curricula and how teachers and students engage in codevelopment throughout a problem based unit Goals 4 to 7 contain Profiles developed by author teams working on specific problem based learning units The author teams represent diverse learning contexts some urban some suburban some focused on learning for gifted students others on learning for students at risk some projects within 1 school some involving multiple schools some projects with technology others without We wrote this book for practitioners who as part of their own professional growth are interested in examining learning environments and codeveloping curricula that are both interdisciplinary and problem based PsycINFO Database Record c 2004 APA all rights reserved **Literacy Leader Fellowship Program Reports**, 1996

The Role of Criticism in Understanding Problem Solving Samuel Fee, Brian Belland, 2012-05-26 In 1991 Denis Hlynka and John Belland released *Paradigms Regained* a well received reader for graduate students in the field of educational technology The Role of Criticism in Understanding Problem Solving updates some of those ideas initially proposed in *Paradigms Regained* and extends the conversation into the contemporary discourse regarding problem based learning PBL *Paradigms Regained* proposed the idea of criticism as a third method for the conduction of educational research the first two being qualitative and qualitative The concept of criticism as a tool for research is not well established in educational technology although it is well established in other educational research traditions such as Curriculum Studies Unfortunately it is not always clear how criticism can be applied This book views criticism as a way to step back and look at an educational intervention within educational technology through a particular critical lens Criticism is viewed as a valuable approach to guiding meta analyses and theoretical studies serving to prevent the proverbial spinning of the wheels that often happens in educational research By indicating new potential research questions and directions criticism approaches can invigorate educational research This book revisits the ideals of criticism in order to establish their usefulness for studying educational technology interventions to support problem based learning First a few foundational chapters set the stage for the conversations on criticism Then the role criticism can play in enhancing analysis and interpretation of the PBL literature is explored Finally case studies addressing the central concepts of the text are presented and dissected This book represents a complete overhaul and rethinking of the use of criticism as a method for understanding and furthering the research area of PBL within the field of Educational technology Literacy Leader Fellowship Program Reports: no.1. Learning to think, learning to learn: what the science of thinking and learning has to offer adult education Eunice Nicholson Askov, 2000 Project-Based Learning for

Academically-Able Students Joseph C.L Tan, 2016-11-24 This book explores the dynamic approach to student centred learning known as project based learning or project work It addresses both the concepts and practical application of project based learning to enhance teaching and learning It describes empirical case study research into the impact of research based project work on independent learning for academically able secondary school students at Hwa Chong Institution a premier independent school in Singapore The research investigated how students dealt with an innovative project based learning curriculum built on a social constructivist approach designed to foster independent learning attitudes The students had to research and initiate their own projects and see through the entire process with guidance from their teacher mentors The case study findings give rich insights into student perspectives and experiences as they engage in projects and respond to real life challenges and problems A new theory of project based learning is presented in the form of theoretical propositions The research has implications for the professional development of teachers as project work mentors to help prepare their students to be future proof in dealing with 21st century study work and social challenges with confidence The book highlights compelling reasons for schools to include some form of research based project work within their curricula thereby allowing students to engage in collaborative authentic research
