

the south-east, the Bakony and the Vértes north of the Balaton – but none rises higher than 600 metres. The landscape east of the Danube is profoundly different. The Great Hungarian Plain, which stretches without a single hill from Budapest to Oradea in the east and Belgrade in the south, can be regarded as a kind of appendix to the Eurasian steppe. The climate is rather more extreme here, with hot, dry summers, but the region is abundantly supplied with water by its main river, the Tisza, and its tributaries, which, before the nineteenth-century regulation works, meandered across the Great Plain. These rivers were flanked by marshlands, swamps and inundation forests, and also by fertile pastures and meadows, offering favourable conditions for fishing and livestock breeding. To the north, east and south-east of the Great Plain, in present-day Slovakia and Romania, there are mountain ranges that become progressively higher as one travels outwards from the Plain. They were formerly extremely rich in minerals; but, with the exception of the valleys, they have never been propitious to human settlement. Consequently, until the late Middle Ages these mountains were covered by forests and largely uninhabited, and colonization of them continued into the early modern period.

When, in the ninth century, the Hungarians emerged from the obscurity of prehistoric times they were living as nomadic horsemen on the steppe along the Black Sea. They spoke a language of Finno-Ugric origin, but their culture in general resembled that of the Turkic peoples of the steppe. In 895 they moved into the Carpathian basin under the leadership of their pagan prince, Árpád. Here they soon became notorious through their plundering raids into Western Europe in the tenth century. But Hungary as a political unit can only be spoken of from the year 1000, when Stephen I, a descendant of Árpád and later to be known as Saint Stephen, converted to Christianity and was crowned king. The kingdom founded by him became one of the great powers of the region and remained so for 500 years, until the sixteenth century, when it was crushed by the expanding Ottoman Empire. 1526, the year of the battle of Mohács, where King Louis II himself was killed, constitutes the traditional closing date of the history of medieval Hungary. The central part of the kingdom, including Buda, the capital, was soon overrun by the Turks and incorporated into their empire. In the east, Transylvania became an autonomous principality under Ottoman control, while the rest of the kingdom, which was defensible against the Turks, was to be governed by kings from the Habsburg dynasty until 1918. The latter, who were at the same time rulers of Austria and Bohemia and also Holy Roman Emperors, consistently regarded Hungary as one of their hereditary dominions. Between 1683 and 1699 they finally expelled the Turks from Hungary, annexing Transylvania in 1690, but the integrity of medieval Hungary

The Szekler Nation and Medieval Hungary Nathalie Kalnoky, 2019-12-26 In 13th century the Szeklers were granted a territory Terra Sirulorum on the eastern border of the kingdom of Hungary These lands were donated by the king to the community as a whole in exchange for the armed border guard service The use of Szekler customary law based on a military judicial and most likely multi ethnic clan structure was confirmed by the Hungarian crown Based on extensive archival sources from the 13th to 16th centuries this fascinating book examines how customary law maintains complex structures of clan membership as a condition of access to judicial and military dignities and how the Szeklers developed rules for land ownership and devolution These documents recall legal principles in which the clan has pre eminence over individuals all free and equal before their laws In this period one can observe an evolution towards individual property a factor of inequality constantly shaped and limited by the Szeklers determination to safeguard their freedom This unique text is vital reading for scholars interested in Hungarian history medieval law and clan structures

Hungary between Two Empires 1526-1711 Géza Pálffy, 2021-06-08 The Hungarian defeat to the Ottoman army at the pivotal Battle of Moh cs in 1526 led to the division of the Kingdom of Hungary into three parts altering both the shape and the ethnic composition of Central Europe for centuries to come Hungary thus became a battleground between the Ottoman and Habsburg empires In this sweeping historical survey G za P lffy takes readers through a crucial period of upheaval and revolution in Hungary which had been the site of a flowering of economic cultural and intellectual progress but battles with the Ottomans lead to over a century of war and devastation P lffy explores Hungary s role as both a borderland and a theater of war through the turn of the 18th century In this way Hungary became a crucially important field on which key debates over religion government law and monarchy played out Reflecting 25 years of archival research and presented here in English for the first time Hungary between Two Empires 1526 1711 offers a fresh and thorough exploration of this key moment in Hungarian history and in turn the creation of a modern Europe

Historical Dictionary of the Crusades Corliss K. Slack, 2013-05-09 The crusades were among the longest and most bitter wars in human history and consisted of no less than seven major expeditions from Western Europe

from the late 11th to the early 14th centuries for the purpose of wresting Jerusalem and the Holy Land from the control of the Muslims. In the end it was the Muslims who won and the Christians who suffered a major setback and the Middle East remained firmly in Muslim hands. This was one of the worst clashes between different religions and civilizations and for long it was largely forgotten or brushed over. That is no longer the case with many Muslims regarding Western interference in the region as a repeat of the crusades while launching their own jihads. So while an old conflict it is still with us today. Even at the time it was very hard to understand the causes and outcome of the crusades and that remains a problem today. This Historical Dictionary of the Crusades cannot claim to have resolved it but it most definitely does make the situation easier to understand. The introduction provides an overview tracing the crusades from one expedition to the next and assessing their impact. The actual flow of events is far easier to follow thanks to the chronology. And maps help to trace the events geographically. The entries and there are more than 300 of them in this second edition look more closely at notable figures including Pope Gregory VII, Richard the Lionhearted and Saladin as well as important places, Jerusalem, Constantinople and others, events, battles and sieges as well as the use of weapons and armor. The bibliography points to further reading.

The Routledge Handbook of East Central and Eastern Europe in the Middle Ages, 500-1300 Florin Curta, 2021-11-29

The Routledge Handbook of East Central and Eastern Europe in the Middle Ages 500-1300 is the first of its kind to provide a point of reference for the history of the whole of Eastern Europe during the Middle Ages. While historians have recognized the importance of integrating the eastern part of the European continent into surveys of the Middle Ages, few have actually paid attention to the region, its specific features, problems of chronology and historiography. This vast region represents more than two thirds of the European continent but its history in general and its medieval history in particular is poorly known. This book covers the history of the whole region from the Balkans to the Carpathian Basin and the Bohemian Forest to the Finnish Bay. It provides an overview of the current state of research and a route map for navigating an abundant historiography available in more than ten different languages. Chapters cover topics as diverse as religion, architecture, art, state formation, migration, law, trade and the experiences of women and children. This book is an essential reference for scholars and students of medieval history as well as those interested in the history of Central and Eastern Europe.

Medieval East Central Europe in a Comparative Perspective Gerhard Jaritz, Katalin Szende, 2016-05-12

Medieval East Central Europe in a Comparative Perspective draws together the new perspectives concerning the relevance of East Central Europe for current historiography by placing the region in various comparative contexts. The chapters compare conditions within East Central Europe as well as between East Central Europe, the rest of the continent and beyond. Including 15 original chapters from an interdisciplinary team of contributors, this collection begins by posing the question: What is East Central Europe? with three specialists offering different interpretations and presenting new conclusions. The book is then grouped into five parts which examine political practice, religion, urban experience and art and literature. The contributors

question and explain the reasons for similarities and differences in governance and strategies for handling allies enemies or subjects in particular ways They point out themes and structures from town planning to religious orders that did not function according to political boundaries and for which the inclusion of East Central European territories was systemic The volume offers a new interpretation of medieval East Central Europe beyond its traditional limits in space and time and beyond the established conceptual schemes It will be essential reading for students and scholars of medieval East Central Europe
