Reason Regulatn Realism Towards A Regulatory Systems Theory Of Reason And Evolutionary Epistemology:

Reason, Regulation, and Realism Clifford Alan Hooker, 1995-01-01 This book develops a new naturalist theory of reason and scientific knowledge from a synthesis of philosophy and the new sciences of complex adaptive systems In particular the theory of partially self organizing regulatory systems is now emerging as central to all the life and social sciences and this book shows how these ideas can be used to illuminate and satisfyingly reconstruct our basic philosophical concepts and principles Evolutionary epistemology provides a unifying subject for the book It is taken as proposing some important commonality between cognitive biological and cognitive epistemic processes Here that commonality is found by embedding both in a common model of complex adaptive system dynamics New reconstructions are offered on the theories of Jean Piaget Karl Popper and Nicholas Rescher which show how their ideas are more deeply illuminated from this perspective in contrast to the formal rationalist interpretations standard among philosophers and scientists Reason, Regulation, and Realism

Boden, 2002-10-03

Since Darwin scholars have noted that cultural entities such as languages laws firms and theories seem to evolve through sequences of variation selection and replication in many ways just like living organisms These essays consider whether modern evolutionary theory can help us to understand the dynamics of different cultural domains **The Certainty of Doubt** Miles Fairburn, William Hosking Oliver, 1996 Essays written by Peter Munz s friends and colleagues to celebrate his 75th birthday themes include history the philosophy of history the philosophy of science and the problems of knowledge reflect ing Munz s intellectual interests and achievements Back cover

Foundational Issues in Artificial Intelligence and Cognitive Science M.H. Bickhard, L. Terveen, 1996-10-15 The book focuses on a conceptual flaw in contemporary artificial intelligence and cognitive science Many people have discovered diverse manifestations and facets of this flaw but the central conceptual impasse is at best only partially perceived Its consequences nevertheless visit themselves as distortions and failures of multiple research projects and make impossible the ultimate aspirations of the fields The impasse concerns a presupposition concerning the nature of representation that all representation has the nature of

encodings encodingism Encodings certainly exist but encodingism is at root logically incoherent any programmatic research predicted on it is doomed too distortion and ultimate failure The impasse and its consequences and steps away from that impasse are explored in a large number of projects and approaches These include SOAR CYC PDP situated cognition subsumption architecture robotics and the frame problems a general survey of the current research in AI and Cognitive Science emerges Interactivism an alternative model of representation is proposed and examined **Two Sciences of Mind** Seán Ó Nualláin, Paul Mc Kevitt, Eoghan Mac Aogáin, 1997-06-26 The Reaching for Mind workshop held at AISB 95 explicitly addressed itself to the current crisis in Cognitive Science In particular the issue of how this discipline can address consciousness was a leitmotiv in the workshop The conclusion seems inescapable that there is a need for two sciences in this area Cognitive Science can be freed to become a fully fledged experimental epistemology by the creation of a science of consciousness also encompassing subjectivity This exciting collection of papers indicates where both these sciences may be heading Series B The programme committee of the workshop included Mike Brady Oxford Daniel Dennett Tufts Jerry Feldman Berkeley John Macnamara McGill and Zenon Pylyshyn Rutgers Einstein Meets Magritte: An Interdisciplinary Reflection Diederik Aerts, Jan Broekaert, Ernest Mathijs, 2012-12-06 Einstein Meets Magritte An Interdisciplinary Reflection presents insights of the renowned key speakers of the interdisciplinary Einstein meets Magritte conference 1995 Brussels Free University The contributions elaborate on fundamental questions of science with regard to the contemporary world and push beyond the borders of traditional approaches All of the articles in this volume address this fundamental theme but somewhere along the road the volume expanded to become much more than a mere expression of the conference s dynamics The articles not only deal with several scientific disciplines they also confront these fields with the full spectrum of contemporary life and become new science As such this volume presents a state of the art reflection of science in the world today in all its diversity The contributions are accessible to a large audience of scientists students educators and everyone who wants to keep up with science today Science Bought and Sold Philip Mirowski, Esther-Mirjam Sent, 2002-01-03 From essays examining economic welfare to the idea of scientists as agents to the digital aspects of higher education presents a comprehensive overview of the new directions of this expanding area *Daniel Dennett* Andrew Brook, Don Ross, 2002-01-21 Contemporary Philosophy in Focus will offer a series of introductory volumes of newly commissioned essays to many of the dominant philosophical thinkers of the current age Author of books such as Consciousness Explained and Darwin s Dangerous Idea Daniel C Dennett has reached a huge general and professional audience that extends beyond philosophy to the study of consciousness the development of the child s mind cognitive ethnology explanation in the social sciences artificial intelligence and evolutionary theory This volume is the only truly introductory collection that explores the implications of Dennett s work **Natural Moralities : A Defense of Pluralistic Relativism** Department of Philosophy Duke University David B. Wong Professor and Chair, 2006-09-07 David B Wong proposes that there can be a plurality of true

moralties moralities that exist across different traditions and cultures all of which address facets of the same problem how we are to live well together Wong examines a wide array of positions and texts within the Western canon as well as in Chinese philosophy and draws on philosophy psychology evolutionary theory history and literature to make a case for the importance of pluralism in moral life and to establish the virtues of acceptance and accommodation Wong s point is that there is no single value or principle or ordering of values and principles that offers a uniquely true path for human living but variations according to different contexts that carry within them a common core of human values We should thus be modest about our own morality learn from other approaches and accommodate different practices in our pluralistic society
